## Quick Access Menu

### Using A Speaker's Guidebook

The menu to the left briefly displays the book's content. Each menu box corresponds to a tabbed divider in the text. The dividers contain more detailed lists of contents in each section and are followed by "Speaker's Reference" pages that offer executive-like summaries of the subsequent chapters. At the back of the book, you will find:

- The index
- A list of feature boxes and checklists
- A list of sample speeches
- A list of visual guides

### Where Students Learn

Go to the interior back cover to learn how you can get access to LaunchPad and look for these icons throughout the book.

 LearningCurve, an adaptive quizzing program.

 Video—more than 300 video clips and full-length speech videos, including five new full-length speeches and related speech clips.

 E-readings—additional resources and reference materials, such as visual guides and documentation help.

# How to Use This Book and Digital Resources

A *Speaker's Guidebook: Text and Reference* has been carefully designed to help you easily and quickly access the information you need to prepare speeches and presentations. The text may be used in a public speaking course, in other college courses, in your working life after college, and in your civic activities in your community. Digital tools such as adaptive quizzing and sample speech videos are integrated throughout the book and through the LaunchPad platform. See the inside back cover to learn more about access.

## The Main Menu and Table of Contents

The twelve tab dividers (discussed in more detail on the next page) allow the book to flip open easily, and the book's binding lets it lie flat. On the inside front cover you will find the **Main Menu** that offers a listing of the thirty-one chapters in the text, color-coded by the corresponding tab, and a visual link to help you find each one. For even more information or to find a specific topic, simply turn to the full **table of contents** on p. xxix.

## The Tabs

A *Speaker's Guidebook* is divided into twelve tabbed sections that are arranged into four color banks—blue, orange, purple, and green. Each section opens with a tab divider; the front of the tab divider identifies the tab name and the chapters contained in that section. The back indicates chapter titles and detailed information about major topics covered. To find the specific information you want, look for the appropriate tab and open the book to it.

The back of each tab divider offers a table of contents for the chapters within that tabbed section. The Speaker's Reference pages for the chapters within the section follow each tab divider.

## Speaker's Reference Sections

You may well find one of the most useful features of *A Speaker's Guidebook* to be its Speaker's Reference pages that immediately follow each tab divider. These pages provide executive summaries of the material covered within the subsequent chapters. A list of **key terms** in the chapters appears at the end of the Speaker's Reference pages, just before the opening of the first chapter within that tabbed section.

**Speaker's Reference** pages offer a quick review of the most important information in subsequent chapters through summaries and key terms.

To refer to the full in-text coverage of a topic, simply flip to the page indicated in parentheses.

## FORMS OF SPEECHES

### CHAPTER 23 The Informative Speech

SPEAKER'S REFERENCE

**Focus on Sharing Knowledge and Demonstrating Relevance**

- Strive to enlighten (informative intent) rather than to advocate (persuasive intent). (p. 322)
- Use audience analysis to determine information needs. (p. 321)
- Show the audience why the topic is relevant to them. (p. 323)
- Present new and interesting information. (p. 323)
- Look for ways to increase understanding. (p. 324)

**Identify the Subject Matter of Your Informative Speech**

- Is it a speech about objects or phenomena—e.g., anything that isn't human? (p. 325)
- Is it a speech about people—e.g., individuals or groups who have made a difference? (p. 325)
- Is it a speech about an event—e.g., a noteworthy occurrence? (p. 325)
- Is it a speech about a process—e.g., an explanation of how something works, as in a series of steps leading to a product or end result? (p. 326)
- Is it a speech about an issue—e.g., a social problem or matter in dispute? (p. 326)
- Is it a speech about a concept—e.g., an idea, theory, or belief? (p. 326)

**Decide How to Convey the Information**

- Use *definition* to clarify. (p. 327)
- Provide *descriptions* to paint a picture. (p. 328)
- Provide a *demonstration*. (p. 328)
- Offer an in-depth *explanation*. (p. 328)

**Clarify Complex Information**

- Use analogies that link concepts to something familiar. (p. 329)
- Demonstrate underlying causes. (p. 330)
- Use visual aids, including models and drawings. (p. 331)

**Appeal to Different Learning Styles**

- Consider listeners' learning styles as part of your audience analysis. (p. 331)
- Offer information in a variety of modes—visually, with sound, with text, and with demonstrations. (p. 331)

## LaunchPad for *A Speaker's Guidebook*: [bedfordstmartins.com/speakersguide](http://bedfordstmartins.com/speakersguide)

**LaunchPad** is a new, easy-to-use platform that offers digital tools to support the speechmaking process, including adaptive quizzes, model full-length speech videos, student video clips, and video quizzes. LaunchPad can be packaged free with *A Speaker's Guidebook*, or purchased separately—see the inside back cover for more information or visit [launchpadworks.com](http://launchpadworks.com).

LaunchPad houses a variety of powerful learning tools, including:

### LearningCurve

LearningCurve is an online learning tool that adapts to what you already know and helps you learn the topics that you need to practice. Learning Curve ensures that you receive as much targeted practice as you need. Icons that appear at the beginning of each chapter and in the Speaker's Reference sections prompt you to visit LaunchPad and take adaptive review quizzes, testing your knowledge of the concepts from the text.

Icons for **LearningCurve** appear in the Speaker's Reference sections and at the beginning of each chapter to direct students to adaptive quizzes for each part in LaunchPad.

### Video

Anna Davis delivers the informative speech "Social Media, Social Identity, and Social Causes."

LaunchPad provides access to more than three hundred short video clips illustrating speech techniques described in the book. Five new full-length sample speeches appear in this edition. A list of video clips that map to important speechmaking topics appears after the index. Speeches that are printed in the book and available as videos in LaunchPad are listed on the last book page across from the inside back cover.

**Video** icons appear in the Key Terms sections and near sample speeches to encourage students to watch the related video in LaunchPad.

### e-readings

E-readings offer additional content online, including visual guides and online reference and research appendices.

Icons for **e-readings** are present in chapters that include additional reference materials, available in LaunchPad.

## Visual Guides

**Visual Guides** (eleven total) walk you through the most challenging aspects of the speechmaking process—from research and organization through creating presentation aids. A complete list of visual guides is available at the end of this book.

### FROM IDEA TO SPEECH

#### How to Transform an Idea into a Polished Speech

The authors of *A Speaker's Guidebook* worked on this speech project with Professor Gary Russell of Quincy University, a liberal arts university in Illinois. Professor Russell asked student Teresa Gorrell to work with us on her speech of introduction. Our goal was to show how a student can take a first draft of a speech and improve it. We wanted to see how Teresa could improve the language of her speech, as well as the delivery.

#### Teresa Chooses Her Topic

First, Teresa did some brainstorming, to decide what part of her life she'd like to speak about in her speech of introduction.

Teresa commented, "Based on the sample speeches of introduction that I was sent by my professor, I have gathered that my speech purpose should be to introduce myself by sharing a personal story concerning some life-shaping, character-forming aspect."

With this understanding, Teresa did some thinking and narrowed her options to two ideas for a direction to take.

Option 1:

I would relate my background as a homeschooled student in grades K-8, my transition into high school, and then into college, with a focus on how my experiences shaped me socially and personally.

Option 2:

I would tell the story of my first step into the world of athletics as a sophomore in high school when I joined the track team, and explain how, through hard work, I became an all-conference award runner and school record holder by my senior year and am now competing as a NCAA Division II athlete. I would focus on what running means to me and how it has defined me as a person.

#### Teresa Drafts Her Speech

Teresa's first draft speech was compelling, but the authors thought that she could add more colorful language and details to the introduction. The authors advised Teresa to "set the scene," so that the audience could imagine her daily routine.

## Checklists, Boxed Features, and Full-Text Speeches

Useful checklists, appearing in each chapter and providing students with easy-to-reference tips and advice on research and speech techniques, are a pedagogical hallmark of *A Speaker's Guidebook*. Throughout *A Speaker's Guidebook* you will also find three types of special boxed features. A Cultural Perspective explores the many ways that culture informs public speaking, ESL Speaker's Notes offer detailed guidance for non-native speakers, and Ethically Speaking boxes offer students ways to ensure an ethical stance when speaking. Throughout, you also will find eleven full-text sample speeches, seven by fellow student speakers that can serve as models to help you learn the art and craft of creating your own speeches. **For a full list of the checklists, boxes, and sample speeches, refer to the end of the book.**

# Preface

---

*A Speaker's Guidebook: Text and Reference* is a groundbreaking public speaking text that offers better solutions to the wide range of challenges that students face. Adopted at more than 850 schools since the first edition was published in 2001, the book grew out of the realization that public speaking courses are not ends in themselves. The principles and skills taught in this book are meant to be of lasting use to students and to help them beyond merely meeting the requirements of the course—with guidance for delivering presentations in their other college courses, in their working lives after college, and in the vital roles they may play in their communities. The book functions not only as a brief yet comprehensive classroom text but also as a unique and useful postclassroom reference, one that will prove an invaluable resource in any public speaking situation.

The key goal of *A Speaker's Guidebook* has always been to effectively address the fundamental challenges of public speaking, both inside and outside the speech classroom. And we recognize that as times have changed—especially due to advances in technology—the challenges of both formal public speaking and presentational speaking in the classroom and workplace have evolved as well. Thus, with the support of hundreds of instructors nationwide, we have developed a book that students use and keep, that reinforces basic skills while providing cutting-edge coverage, and that helps students apply what they've learned to their own speeches.

## Enduring Features

The following features have made *A Speaker's Guidebook: Text and Reference* extremely successful in its first five editions:

### An Invaluable Reference beyond the Speech Classroom

*A Speaker's Guidebook* features a unique, user-friendly design, convenient and accessible reference features throughout, and extensive reference and research appendices. The information in *A Speaker's Guidebook* is designed for quick and easy retrieval. Twelve tabbed dividers allow the book to flip open easily, and a comb binding lets it lie flat. A **Main Menu** on the inside front cover listing all tabs and chapters, paired with a full **table of contents** beginning on p. xxvii, quickly directs students to the sections they need.

**Speaker's Reference** pages at the beginning of each tabbed section allow students to quickly access and review the most important information in each chapter; convenient cross-references enable readers to flip quickly to a full discussion of the material.

Every chapter in *A Speaker's Guidebook* contains **Checklists** that offer step-by-step directions, self-assessments, and content review checks. Widely praised by reviewers for their precision and conciseness, these checklists help students and professionals both plan their speeches and assess their efforts.

The **Sample Speeches** appendix and a wealth of **Reference** appendices allow students to easily access practical information.

## A Comprehensive Classroom Text

*A Speaker's Guidebook* addresses every topic included in the standard public speaking texts—and much more. Although we designed the coverage to be accessible, we didn't lose sight of the need for comprehensiveness. *A Speaker's Guidebook* covers all the traditional topics, including listening, speaking ethically, managing speech anxiety, analyzing the audience, selecting a topic and purpose, locating and using supporting materials, organizing and outlining ideas, using language, creating presentation aids, delivering the speech, and constructing various speech types. The textbook also includes the most current coverage of public speaking topics that will help students in their future careers and work in other courses, including using presentation software, delivering online presentations, preparing business and professional presentations, and speaking in other courses.

To give students advice that is grounded in the theory of speech communication throughout the text, we have included references to current communication research and classical rhetorical theory, using this research as the basis for concrete suggestions in real-world speaking situations. Examples range from coverage of individual contemporary theorists and their work to down-to-earth discussions of classical theory.

Because persuasive speaking is a major aspect of most speech courses, *A Speaker's Guidebook* offers three full chapters on persuasion, more than any other text. Chapter 24 introduces the student to contemporary and classical approaches to persuasion, Chapter 25 to forming arguments, and Chapter 26 to organizing the persuasion speech.

Finally, *A Speaker's Guidebook* recognizes the importance of solid sample speeches, and it provides eleven in total. Speeches include two speeches of introduction, three informative speeches, four persuasive speeches, and two special occasion speeches. Each of the full-text model speeches offers textual annotations that help students understand the language, organization, and arguments used in the speech. The seven visually annotated speeches also include photographs of speakers delivering their presentations and connect to the videos available in LaunchPad. These visual annotations go beyond the traditional printed page by bringing the elements and analysis of speech delivery into clear focus.

## Global Perspective on Public Speaking

*A Speaker's Guidebook* also offers students a wealth of resources to help them adapt their speeches to the cultural requirements of the speech situation. Along

with extensive coverage within chapters, **A Cultural Perspective** boxes feature such topics as comparing cultural values, vocal delivery and culture, and variations in nonverbal communication.

Special consideration has also been given to the non-native speaker. **ESL Speaker's Notes** boxes focus on critical areas of concern to speakers whose first language is not English and offer practical ways to address those concerns. Sample features include “Avoiding the Pitfalls of Manuscript Delivery” and “Vocal Variety and the Non-Native Speaker.” Another characteristic that defines *A Speaker's Guidebook* is its strong focus on ethics. Chapter 5, “Ethical Public Speaking,” is devoted to this topic and includes an in-depth consideration of the role that values play in the ethical quality of speeches. **Ethically Speaking** boxes also appear throughout the text, continually reminding students that ethical conduct must apply to all aspects of the speechmaking process.

## A Superior Resource for a Lifetime of Public Speaking

Along with providing students with an accessible, up-to-date classroom guide, *A Speaker's Guidebook* contains many features that will make it an invaluable resource in other college courses and *after* the public speaking course.

**More about public speaking on the job.** *A Speaker's Guidebook* gives students more in-depth preparation than any other text for the kinds of speaking situations they are likely to encounter on the job. Chapter 30 covers business and professional speeches, sales presentations, progress reports, and staff reports.

**“Speaking in Other College Courses.”** Chapter 31 provides guidance for creating the kinds of oral presentations students are likely to deliver in other college courses, from the social sciences and humanities to science and engineering. Separate sections describe sample presentations in technical, scientific and mathematical, arts and humanities, social science, and education courses, along with a section on speaking in nursing and allied health courses.

**Extensive help with the research process.** Useful for any college course, print and online appendices provide advice on how to cite sources in a variety of reference styles, from APA to MLA to Chicago and more. Appendices E and F offer guidance on handling question-and-answer sessions and in preparing students for speaking in mediated communication situations such as television and radio. Appendices E–I are available within LaunchPad.

## The Story of the New Edition

In the sixth edition of *A Speaker's Guidebook*, print and digital tools converge to help students with every aspect of the speech building process, including a new online learning platform that seamlessly integrates e-book content, adaptive quizzes, and video. With students' needs foremost in mind, revised chapters on

fundamentals such as listening, ethical speechmaking, audience analysis, topic selection and support, and outlining offer newly relevant examples and accessible guidance. The authors have streamlined the text to make chapters easier for students to read and understand. The new edition represents the authors' collective efforts to review the literature and incorporate the most reliable and up-to-date research studies (113 total new studies). This revision includes new material on researching topics in print and online, using presentation tools, and gaining familiarity with delivering presentations online—all useful for the classroom, online education, and the professional arena.

New as well is a visually appealing and highly relevant collection of speech videos on topics ranging from freeganism to ethical manufacturing. In response to requests by adopters, this edition also includes a “before” and “after” speech by a current student—an early “needs improvement” version and a second more-polished version. The sample student speech videos are accompanied by quiz questions that test understanding of concepts. These speech video resources help students focus on how to strengthen their own speeches by analyzing model speech techniques and “needs improvement” speeches.

*A Speaker's Guidebook* is also available in a variety of digital formats, including the new LaunchPad edition. LaunchPad combines an interactive e-book, full-length speech videos and video clips, reference tools, LearningCurve adaptive quizzes, and e-readings that help support research in one convenient learning program.

## A Wealth of New Research

The sixth edition of *A Speaker's Guidebook* includes a record 113 new peer-reviewed studies, in chapters ranging from listening (12 new studies), ethics (12), and audience analysis (17) to persuasion (15) and others.

## Even Stronger Coverage of Public Speaking Fundamentals

- **A revised Chapter 1 reflects the true excitement and real-life relevance that public speaking can bring to students**, with inspiring new reportage on Dr. Martin Luther King Jr.'s “I Have a Dream” speech, compelling testimony from Warren Buffet on the pivotal role of public speaking in his success, and key surveys of employers on the pressing need for oral communication skills in the workplace. Here, as students embark on the speech course, they can easily see how skills gained in the speech class can improve their performance in their other courses, their working lives, and in their role as engaged citizens in their communities.
- **The latest scholarship on listening.** This fully revised chapter reflects current scholarship on listening-processing strategies and approaches to the listening event published in the *International Journal of Listening* and elsewhere, from the perspective of both listener and speaker. The chapter stresses the difference between hearing and listening, and offers practical advice on active listening.

- **Communication ethics, updated with the foundations.** This revised chapter retains its popular basic structure while offering students new tools with which to engage in ethical decision making. New to this edition is a brief overview of the three major ethical theories, each reflecting differing

Elijah Lui gives his persuasive speech “Preventing Cyberbullying” online. The full text of the speech is included in Chapter 26, and the full-length speech video and relevant video clips are available in LaunchPad.

standards by which to distinguish ethical from nonethical behavior, which allows students to reflect on and actively engage their own values when considering the role of ethics in the speechmaking process.

- **Persuasive techniques made more accessible and relevant to today’s students.** Persuasion lies at the heart of public speaking, but learning about it can be daunting for the first-time student. Clearer and more engaging explanations and examples appear throughout the chapters, from using the real-world Campus Kitchen Project to demonstrate the syllogism to all-new examples using fair trade, immigration, and climate change to illustrate the components of an argument.

## Cutting-Edge Coverage of the New Public Speaking Realities

Students live in a digital age in which the realities of preparing and delivering presentations continue to evolve. A growing number of instructors are teaching an online public speaking course for the first time, and more and more students (and professionals) are expected to prepare and deliver mediated presentations, creating new challenges across the board. In this edition, we have updated our groundbreaking coverage of online presentations and using presentation aids.

- **New chapter reflects new direction in online and print research.** Chapter 9, “Finding Credible Print and Online Materials,” offers an approach to searching for supporting materials aligned with the way that students do their research today—online—and demonstrates where and how to find reliable and credible resources, both print and digital.
- **Revised chapters show students how to create presentations in Prezi, Apple Keynote, and Microsoft PowerPoint.** Chapters 20–22 focus on presentation aids and software and show students how to create and deliver effective presentations, while avoiding technical glitches.
- **An updated chapter on online presentations.** Chapter 28 provides students with the most helpful tips and guidance on how to prepare online speeches—whether for use in an online class, for a recorded presentation, or for a virtual meeting. Introduced in the fifth edition, the sixth edition of *A Speaker’s Guidebook* provides innovative coverage of the steps involved in delivering online presentations, fully revised to reflect current practices.

## A Multifaceted Digital Experience Brings It All Together

**Digital resources for *A Speaker's Guidebook* are available in LaunchPad, a dynamic new platform** that combines a curated collection of video, homework assignments, e-book content, and the LearningCurve adaptive quizzing program in a simple design. LaunchPad can be packaged *free* with *A Speaker's Guidebook*, or it can be purchased separately.

- **Relevant videos are available by e-book chapter.** After students read about speech techniques, they can view videos that model these concepts.
- **Instructors can create reading, video, or quiz assignments easily.** LaunchPad provides premade assignments that instructors can use as-is or as a starting point for their own assignments.
- **With LaunchPad, instructors can upload and embed their own content.** Instructors can add their own readings, videos, and custom content to the ready-made content that exists in LaunchPad.
- **The Gradebook in LaunchPad enables instructors to track and analyze student progress.** Instructors can also keep an eye on their class's progress throughout the semester—reviewing progress for the whole class, individual students, or individual assignments.
- **LearningCurve's adaptive quizzing provides a personalized learning experience.** In every chapter, call-outs prompt students to tackle the LearningCurve quizzes to test their knowledge and reinforce learning of the material. Based on research on how students learn, LearningCurve motivates students to engage with course materials and learn important concepts. LearningCurve for *A Speaker's Guidebook* is organized by part, so students can review a range of topics.

## New and Improved Video Program in LaunchPad Helps Students Apply What They Learn to Their Own Speeches

- **New informative and persuasive speech videos** accompanied by questions show how speakers can polish every aspect of their speeches—by demonstrating effective introductions, conclusions, transitions, supporting material, patterns of organization, citation of sources, use of presentation aids, and techniques of delivery. These polished and professionally shot speech videos offer topics of real interest to students, such as social media, freeganism, and ethical manufacturing. Full-text versions of the speeches are printed in the book, with electronic transcripts and closed captioning in LaunchPad. Mirroring new realities, one of the new speeches on preventing cyberbullying is given as an online presentation, showing the process of setting up the presentation and techniques for keeping a remote audience engaged.
- **A comprehensive video collection containing more than three hundred clips and thirty three full-length student speeches** highlights typical

issues—in model speeches that show expert speech techniques and “needs improvement clips”—in order for students to develop their own skills.

## Print Resources for Students

***The Essential Guide to Rhetoric*** by William M. Keith, University of Wisconsin, Milwaukee, and Christian O. Lundberg, University of North Carolina, Chapel Hill. This guide is a powerful addition to the public speaking class, providing an accessible and balanced overview of key historical and contemporary rhetorical theories. Written by two leaders in the field, this brief guide uses concrete, relevant examples and jargon-free language to bring these concepts to life.

***The Essential Guide to Presentation Software, Second Edition***, by Allison Bailey, University of North Georgia, and Rob Patterson, University of Virginia. This completely revised guide shows students how presentation software can be used to support, not overtake, their speeches. Sample screens and practical advice on using PowerPoint, Prezi, and other presentation tools make this an indispensable resource for students preparing electronic visual aids.

***The Essential Guide to Interpersonal Communication and The Essential Guide to Group Communication***, both by Dan O’Hair and Mary Wiemann, and ***The Essential Guide to Intercultural Communication*** by Jennifer Willis-Rivera. These brief and readable guides offer succinct yet comprehensive coverage of key aspects of interpersonal, group, and intercultural communication, covering basic concepts and theories backed by current scholarship.

***Outlining and Organizing Your Speech*** by Merry Buchanan, University of Central Oklahoma. This student workbook provides step-by-step guidance for preparing informative, persuasive, and professional presentations and gives students the opportunity to practice the critical skills of conducting audience analysis, dealing with communication apprehension, selecting a speech topic and purpose, researching support materials, organizing and outlining, developing introductions and conclusions, enhancing language and delivery, and preparing and using presentation aids.

***Media Career Guide: Preparing for Jobs in the 21st Century, Ninth Edition***, by James Seguin, Robert Morris University, and Sherri Hope Culver, Temple University. Practical, student-friendly, and revised for recent trends in the job market—like the role of social media in a job search—this guide includes a comprehensive directory of media jobs, practical tips, and career guidance for students considering a major in communication studies and mass media.

**Research and Documentation in the Digital Age, Sixth Edition**, by Diana Hacker, late of Prince George's Community College, and Barbara Fister, Gustavus Adolphus College. This handy booklet covers everything students need for college research assignments at the library and on the Internet, including advice for finding and evaluating Internet sources.

## Resources for Instructors

For more information or to order or download the Instructor Resources, please visit the online catalog at **[bedfordstmartins.com/speakersguide/catalog](http://bedfordstmartins.com/speakersguide/catalog)**.

**Online Instructor's Resource Manual** by LeAnne Lagasse, Texas Tech University; Jennifer Emerling Bone, State University of New York, Oneonta; Elaine Wittenberg-Lyles, University of Texas, San Antonio; and Melinda Villagran, George Mason University. Available in LaunchPad or downloadable online, this revised comprehensive manual is a valuable resource for new and experienced instructors alike. It offers extensive advice on topics such as helping students use their public speaking skills to become more engaged citizens; ideas for preparation and practice to reduce speech anxiety; setting and achieving student learning goals; managing the classroom; facilitating group discussion; understanding culture and gender considerations; dealing with ESL students; evaluating speeches (for both instructors and students); and evaluating Internet resources. In addition, each chapter of the main text is broken down into chapter challenges, detailed outlines, suggestions for facilitating class discussion from topics covered in feature boxes, additional activities and exercises, and recommended supplementary resources. The new edition includes more guidelines for first-time instructors, advice for integrating technology into the speech class, and expanded suggestions for videos and other classroom resources.

**Computerized Test Bank** by LeAnne Lagasse, Texas Tech University; Jennifer Emerling Bone, State University of New York, Oneonta; and Merry Buchanan, University of Central Oklahoma. *A Speaker's Guidebook* offers a complete testing program, available in LaunchPad or downloadable online, for Windows and Macintosh environments. Each chapter includes multiple-choice, true-false, and fill-in-the-blank exercises, as well as essay questions. Sample final examinations are also included in the testing program.

**PowerPoint Slides for A Speaker's Guidebook.** Available in LaunchPad or as a download, each chapter's slides include the most important points from the text, as well as key figures.

**Custom solutions.** Qualified adopters can customize *A Speaker's Guidebook* and make it their own by adding their own content or mixing it with ours. To learn more, visit **[bedfordstmartins.com/custom](http://bedfordstmartins.com/custom)**.

## Professional Development Series

**NEW! *ESL Students in the Public Speaking Classroom: A Guide for Instructors, Second Edition***, by Robbin Crabtree, Fairfield University, and David Allen Sapp, Fairfield University, with Robert Weissberg, New Mexico State University. This guidebook provides support for new and experienced instructors of public speaking courses whose classrooms include ESL and other linguistically diverse students. Based on landmark research and years of their own teaching experience, the authors provide insights about the variety of non-native English-speaking students (including speakers of global English varieties), practical techniques that can be used to help these students succeed in their assignments, and ideas for leveraging this cultural asset for the education of *all* students in the public speaking classroom.

***Teaching Public Speaking: A Guide for New Instructors*** by Paula Youra, Lynchburg College. This guidebook provides adaptable advice on cultivating credibility and comfort in the classroom, and on succeeding during the first day, week, and semester of the course.

***Coordinating the Communication Course: A Guidebook*** by Deanna L. Fassett, San José State University, and John T. Warren, Southern Illinois University, Carbondale. This resource offers practical advice on every topic central to the coordinator/director role.

## Acknowledgments

We are especially thankful for the contributions of several individuals who helped us develop this edition of *A Speaker's Guidebook*. Thanks to Kevin Ayotte of California State University, Fresno, and Brian Kanouse of Keene State College for their contributions to the sample speeches. Thanks to Gary Russell, Quincy University, for his help with the sample speech of introduction. Special thanks to Teresa Gorrell for working with us to draft and present her speech of introduction. We would like to thank Teri Varner of St. Edward's University and her students for their contributions to the sample speeches. We are also grateful to Kelley Cowden from the University of Kentucky for her helpful suggestions. We would like to thank LeAnne Lagasse of Texas Tech University for her excellent work revising the *Instructor's Resource Manual* (originally created by Elaine Wittenberg-Lyles of the University of Texas at San Antonio and Melinda Villagran of George Mason University, and revised for the third edition by Jennifer Emerling Bone of the State University of New York, Oneonta) and Test Bank (originally created by Tom Howard of the University of Oklahoma and Merry Buchanan of the University of Central Oklahoma, and updated by Jennifer Emerling Bone). Thank you also to Bruce Sherwin and Publishers Solutions for their work on Web quizzes and other resources to accompany *A Speaker's Guidebook*, Sixth Edition.

We very much appreciate the assistance of the hundreds of reviewers whose feedback and advice allowed us to make *A Speaker's Guidebook: Text and Reference*, Sixth Edition, better. Please see the following pages for a list of each of these reviewers.

The sixth edition of *A Speaker's Guidebook* demanded constant attention and labor from the dedicated team at Bedford/St. Martin's. Publisher Erika Guterrez has now been the guiding spirit for the book for over a decade, and we are ever grateful for her countless editorial, marketing, and sales contributions to its success. Senior Development Editor Lorraina Morrison devoted innumerable hours on all aspects of development, from editing chapters with great good cheer and tact, to spearheading a superb series of speech videos, to laboring over one thousand and one other details, and we are most grateful. We also thank Associate Editor Alexis Smith, whose contribution to the Learning-Curve questions adds a new and vital dimension to the text; and Editorial Assistant Joanna Kamouh for her always swift and efficient help, hard work, and good instincts. Pamela Lawson, Production Editor, expertly guided the text through a complicated production process under the direction of Steven Cestaro and Elise S. Kaiser. Thanks to Thomas Kane, Senior New Media Editor for helping us to develop LaunchPad. We are grateful to Thomas Digiano, Marketing Manager, for his sales and marketing efforts.

# GETTING STARTED WITH CONFIDENCE

## CHAPTER 1 Becoming a Public Speaker

### Recognize the Many Benefits of Public Speaking

- Gain real-life skills that lead to greater confidence and satisfaction. (p. 8)
- Advance your professional goals. (p. 8)
- Oral and written communication are most important skills employers look for in a college graduate. (p. 8)

### Enhance Your Career as a Student

- Hone your researching, writing and outlining, reasoning, critical thinking, and listening skills. (p. 9)
- Deliver better oral presentations in other courses, including speaking in science and mathematics, technical, social science, arts and humanities, education, nursing and allied health, and business courses. (p. 9)

### Find New Opportunities for Civic Engagement

- Use public speaking to become more involved in addressing issues you care about. (p. 9)
- Become a more active participant in our democracy. (p. 9)
- Learn the rules of engagement for effective and ethical public discourse. (p. 10)

### Recognize the Classical Roots of Public Speaking

- Rhetoric first flourished in the Greek city-state of Athens in the fifth century B.C.E. and referred to making effective speeches, particularly those of a persuasive nature. (p. 10)
- Public speaking played a central role in the development of democracy in ancient Greece and Rome and remains an essential tool in safeguarding democracy today. (p. 11)
- The ancient Greek agora and the Roman forum exist today as physical spaces, such as town halls as well as virtual forums streamed to listeners online. (p. 11)
- The *canons of rhetoric*, a five-part speechmaking process developed in ancient Greece, remain relevant for today's public speaker. (p. 11)

### Draw on the Familiar Skills of Conversation and Composition

- Consider that in both conversation and writing, you try to uncover the audience's interests and needs before speaking. (p. 13)
- Consider that in both conversation and writing, you check to make certain that you are understood, and adjust your speech to the listeners and to the occasion. (p. 13)
- Much of what you've learned about organizing written papers can be applied to organizing your speeches. (p. 13)

### Recognize Unique Aspects of Public Speaking

- More so than writers, successful speakers generally use familiar words, easy-to-follow sentences, and transitional words and phrases. (p. 13)
- Spoken language is often more interactive and inclusive of the audience than written language. (p. 13)

### Become an Inclusive Speaker

- Try to identify and respectfully address the diversity of values and viewpoints held by audience members. (p. 14)
- Work toward making every member of the audience feel recognized and included in your message. (p. 14)

### Recognize Public Speaking as a Category of Communication

- As in *conversation (dyadic communication)*, you attempt to make yourself understood, involve and respond to your conversational partner, and take responsibility for what you say. (p. 14)
- As in *small group communication*, you address a group of people who are focused on you and expect you to clearly discuss issues that are relevant to the topic and to the occasion. (p. 14)
- As in *mass communication*, you address a group with whom you have little or no interaction, as on television and radio. (p. 14)
- In public speaking, a speaker delivers a message with a specific purpose to an audience of people who are present during the delivery of the speech. (p. 14)

### Recognize That Public Speaking Is an Interactive Communication Process

- Understand elements of *source, receiver, message, and channel* and how they interact in public speaking. (p. 15)
- Understand and plan for the *rhetorical situation*—the circumstance that calls for a public response (the speech). (p. 16)

### Recognize the Similarities and Differences between Public Speaking and the Other Forms of Communication

- Opportunities for feedback are fewer than in conversation or in small group communication, and greater than in mass communication. (p. 17)
- Preparation required is greater than in other forms of communication. (p. 17)
- The degree of formality tends to be greater than in other forms of communication. (p. 17)

## CHAPTER 2 Giving It a Try: Preparing Your First Speech

### Use This Overview to Construct and Deliver Your First Speech

- Analyze the audience. (p. 18)
- Select a topic. (p. 18)
- Determine the speech purpose. (p. 19)
- Compose a thesis statement. (p. 19)
- Develop the main points. (p. 20)
- Gather supporting material. (p. 20)
- Separate the speech into its major parts: introduction, body, and conclusion. (p. 20)
- Outline the speech using coordinate and subordinate points. (p. 21)
- Consider presentation aids. (p. 23)
- Practice delivering the speech. (p. 23)

*Survey after survey confirms the value of verbal and written communication skills to employers across the board, making the public speaking course potentially the most valuable one you can take during your undergraduate career.*

As a student of public speaking, you are joining a very large and venerable club. People have studied public speaking in one form or another for well over two thousand years. Indeed, public speaking may be the single most studied skill in history! Since before the time of Aristotle, the brilliant Greek thinker who laid the groundwork for modern public communication (384–322 B.C.E.), and the Roman statesman and orator Cicero (106–43 B.C.E.), people have used public speaking to explain, persuade, and move others to act.

Martin Luther King Jr. was certainly a member of this ancient club. He was not only one of America's greatest civil rights leaders, but one of its most gifted public speakers. His "I Have A Dream" speech, delivered during the March on Washington in the waning days of August 1963, awed the huge (250,000-person) crowd rallying for racial equality and economic opportunity, as well as the millions more who watched it on the wavy lines of their black and white television sets. Of every color and creed and from all walks of life, the audience listened raptly as Reverend King, speaking in the cadenced rhythm of the Bible, shared the phrase "I have a dream" in eight successive sentences.

Time has done nothing to diminish the power of King's speech, which took just seventeen minutes to deliver. The words stir us still, symbolizing not only the struggle for racial justice but the power of speech to move people and change the course of history.

Our own frenzied era of electronic communication has not in any way diminished the need for this singularly effective form of communication, and public speaking remains an indispensable vehicle for the expression of ideas. Whatever people care deeply about, it offers a way to communicate their concerns to others. Indeed, few other activities offer quite the same opportunity to make one's voice heard.

This guidebook offers the tools you need to create and deliver effective speeches, from presentations made to fellow students, co-workers, or fellow citizens to major addresses. As great an orator as he was, King prepared meticulously for his speeches and often used parts of them repeatedly in different presentations. Here you will discover the basic building blocks of any good speech and acquire the skills to deliver presentations in a variety of

specialized contexts—from the college classroom to the civic, business, and professional arenas. You’ll also find proven techniques to build your confidence by overcoming the anxiety associated with public speaking.

## Why Study Public Speaking?

The ability to speak confidently and convincingly in public is a crucial skill for anyone who wants to take an active role in the classroom, workplace, and community. As you master the techniques of speaking in front of audiences, you’ll find that it is a powerful vehicle for personal and professional growth.

### Gain a Vital Life Skill

Skill in public speaking will give you an unmistakable edge in life, leading to greater confidence and satisfaction. Whether you want to do well in an interview, stand up with poise in front of classmates or in other group situations, or parlay your skills in your community or other public venues, public speaking offers you a way to fulfill your goals. Business magnate Warren Buffett passionately extols the role that public speaking has played in his success:

Be sure to do it, whether you like it or not . . . do it until you get comfortable with it. . . . Public speaking is an asset that will last you 50 or 60 years, and it’s a necessary skill; and if you don’t like doing it, that will also last you 50 or 60 years. . . . Once you tackle the fear and master the skill, you can run the world. You can walk into rooms, command people, and get them to listen to you and your great ideas.<sup>1</sup>

### Advance Your Professional Goals

Now, more than ever, public speaking has become both a vital life skill and a potent weapon in career development. Recruiters of top graduate school students report that what distinguishes the most sought-after candidates is not their “hard” knowledge of their majors, which employers take for granted, but the “soft skills” of communication, which fewer candidates display.<sup>2</sup> Similarly, dozens of surveys of managers and executives reveal that ability in oral and written communication is the most important skill they look for in a college graduate. In a recent survey of hundreds of business leaders, conducted on behalf of the Association of American Colleges and Universities (AAC&U), 93 percent ranked the ability to communicate clearly in oral and written form as more important than an undergraduate’s major.<sup>3</sup> Among employer members of the National Association of Colleges and Employers (NACE), communication skills top the list of skills desired in new college graduates (see Table 1.1). Survey after survey confirms the value of verbal and written communication skills to employers across the board, making the public speaking course potentially the most valuable one you can take during your undergraduate career.

## Enhance Your Career as a Student

Preparing speeches calls upon numerous skills that you can apply in other courses. As in the speech class, many courses also require that you research and write about topics, analyze audiences, outline and organize ideas, and support claims.

These and other skill sets covered in this guidebook, such as working with visual aids and controlling voice and body during delivery, are valuable in any course that includes an oral-presentation component, from English composition to nursing or engineering. Students in technical disciplines and the sciences are often called upon to explain complex information clearly and accessibly, and visual aids are often an important part of such presentations (Chapters 20–22). Identifying target audiences (Chapter 6), explaining concepts clearly (Chapter 23), and applying techniques of persuasion and argument (Chapters 24–26) are critical skills for anyone speaking to an audience, from the business student to the health sciences major. Guidelines for speaking across the curriculum, including speaking in science and mathematics, technical, social science, arts and humanities, education, nursing and allied health, and business courses, are the focus of Chapter 31, “Speaking in Your Other Courses.”

## Find New Opportunities for Civic Engagement

While skill in public speaking will help you in your courses and contribute to both career advancement and personal enrichment, it also offers you ways to enter the public conversation about social concerns and become a more engaged citizen. Public speaking gives you a voice that can be heard and can be counted.
