Social Work with Groups

A Comprehensive Worktext

NINTH EDITION

Council on Social Work Education *Educational Policy and Accreditation Standards* by Chapter

Social Work with Groups: A Comprehensive Worktext, 9e, now includes explicit references to the *Educational Policy and Accreditation Standards*' (EPAS) 10 core competencies and 41 recommended practice behaviors. The column on the right informs the reader in which chapters the icons appear.

The 10 Competencies and 41 Recommended Practice Behaviors (EPAS 2008):

Chapter(s) Where Referenced:

EP 2.1.1	Identify as a Professional Social Worker and Conduct Oneself Accordingly:	Chapter(s) Where Referenced:
a.	Advocate for client access to the services of social work	2, 6
b.	Practice personal reflection and self-correction to assure continual professional development	2, 3, 4, 5, 6, 9, 10, 11, 12, M3, M4
c.	Attend to professional roles and boundaries	2, 12
d.	Demonstrate professional demeanor in behavior, appearance, and communication	2, 4, 6, 12
e.	Engage in career-long learning	2
f.	Use supervision and consultation	2
EP 2.1.2	Apply Social Work Ethical Principles to Guide Professional Practice:	
a.	Recognize and manage personal values in a way that allows professional values to guide practice	2, 7
b.	Make ethical decisions by applying standards of the National Association of Social Workers <i>Code of Ethics</i> and, as applicable, of the International Federation of Social Workers/International Association of Schools of Social Work <i>Ethics in Social Work, Statement of Principles</i>	2, 12
c.	Tolerate ambiguity in resolving ethical conflicts	2
d.	Apply strategies of ethical reasoning to arrive at principled decisions	2, 6
EP 2.1.3	Apply Critical Thinking to Inform and Communicate Professional Judgments:	
a.	Distinguish, appraise, and integrate multiple sources of knowledge, including research-based knowledge and practice wisdom	2
b.	Analyze models of assessment, prevention, intervention, and evaluation	2
c.	Demonstrate effective oral and written communication in working with individuals, families, groups, organizations, communities, and colleagues	2, 5, 6
EP 2.1.4	Engage Diversity and Difference in Practice:	
a.	Recognize the extent to which a culture's structures and values may oppress, marginalize, alienate, or create or enhance privilege and power	2, 7
b.	Gain sufficient self-awareness to eliminate the influence of personal biases and values in working with diverse groups	2, 7
c.	Recognize and communicate their understanding of the importance of difference in shaping life experiences	2, 7
d.	View themselves as learners and engage those with whom they work as informants	2, 7

The 10 Competencies and 41 Recommended Practice Behaviors (EPAS 2008):	Chapter(s) Where Referenced:
EP 2.1.5 Advance Human Rights and Social and Economic Justice:	
a. Understand forms and mechanisms of oppression and discrimination	2, 7
b. Advocate for human rights and social and economic justice	2, 7
c. Engage in practices that advance social and economic justice	2, 7
EP 2.1.6 Engage in Research-Informed Practice and Practice-Informed Research:	
a. Use practice experience to inform scientific inquiry	2, 14
b. Use research evidence to inform practice	2, 14
EP 2.1.7 Apply Knowledge of Human Behavior and the Social Environment:	
a. Utilize conceptual frameworks to guide the process of assessment, intervention, and evaluation	1, 2, 6, 7, 9, 10, 11, M1, M3, M4
b. Critique and apply knowledge to understand person and environment	2, 8
EP 2.1.8 Engage in Policy Practice to Advance Social and Economic Well-Being and to Deliver Effective Social Work Services:	
a. Analyze, formulate, and advocate for policies that advance social well-being	2, 6
b. Collaborate with colleagues and clients for effective policy action	2, 6
EP 2.1.9 Respond to Contexts That Shape Practice:	
a. Continuously discover, appraise, and attend to changing locales, populations, scientific and technological developments, and emerging societal trends to provide relevant services	2, 6, 10, M3, M4
b. Provide leadership in promoting sustainable changes in service delivery and practice to improve the quality of social services	2
EP 2.1.10 Engage, Assess, Intervene, and Evaluate with Individuals, Families, Groups, Organizations and Communities:	
a. Substantively and affectively prepare for action with individuals, families, groups, organizations, and communities	2, 6, 9, 12, 13, M1, M2
b. Use empathy and other interpersonal skills	2, 12, 13
c. Develop a mutually agreed-on focus of work and desired outcomes	2, 6, 12, 13
d. Collect, organize, and interpret client data	2, 12, 13
e. Assess client strengths and limitations	2, 5, 7, 12, 13
f. Develop mutually agreed-on intervention goals and objectives	2, 12, 13
g. Select appropriate intervention strategies	2, 9, 11, 12, 13
h. Initiate actions to achieve organizational goals	2
i. Implement prevention interventions that enhance client capacities	2
j. Help clients resolve problems	2, 12, 13
k. Negotiate, mediate, and advocate for clients	2, 6
l. Facilitate transitions and endings	2, 12, 13
m. Critically analyze, monitor, and evaluate interventions	2, 14

About the Author xviii

CHAPTER 1 Groups: Types and Stages of Development 1

Historical Development of Group

Work 1

Settlement Houses 2

Young Men's Christian Association (YMCA) 2

Types of Groups 3

Social Conversation 3

Recreation/Skill Building 3

Education 4

Task 4

Problem Solving and Decision Making 4

Focus 6

Self-Help and Mutual-Aid 7

Socialization 7

Treatment 8

Common Types of Treatment Groups 8

Psycho-Educational Groups 11

Symptom Management Groups 11

Anger Management Groups 11

Life Skills Groups 11

Social Skills Groups 12

Process Groups 12

Stress Management Groups 12

Specialty Groups 12

Sensitivity and Encounter Training 13

Initial Development of Groups 16

Determining Objectives 16

Size 16

Open-Ended Versus Closed-Ended Groups 17

Duration 17

Stages of Groups 18

Intake 18

Selection of Members 18

Assessment and Planning 18

Group Development and Intervention 19

Evaluation and Termination 19

Models of Group Development over Time 19

Garland, Jones, and Kolodny Model 19

EXERCISE 1.1 The Garland, Jones, and Kolodny Model 21

Tuckman Model 21

EXERCISE 1.2 The Tuckman Model 22

Northern and Kurland Model 22

EXERCISE 1.3 The Northern and Kurland Model 23

Sequential Stage Models of Group

Development 23

Bales Model 24

Group Cohesion 24

EXERCISE 1.4 Variables That Impact Group Cohesion 26

Membership and Reference Groups 26

Breaking the Ice 27

EXERCISE 1.5 Understanding Membership and Reference Groups 28

Experiential Learning 28

Ethics and Guidelines for Conducting Exercises 29

Pitfalls to Avoid in Conducting Class Exercises 30

Summary 31

Group Exercises 31

EXERCISE A Getting Acquainted 31

EXERCISE B Introducing a Partner 32

EXERCISE C Personal Expectations for the Group 32

EXERCISE D Searching for Descriptors 32

EXERCISE E Why I Decided to Be a Social Worker 33

CHAPTER 2 Social Group Work and Social Work Practice 34

Definition of Social Work 34

Relationship Between Social Work and Social Welfare 35

What Is the Profession of Social Work? 35

Generalist Social Work Practice 36

EXERCISE 2.1 Your Areas of Interest in Social Work 37

The Change Process	38
Phase 1: Engaging Clients in an Appropriate Working Relationship	40
Phase 2: Identifying Issues, Problems, Needs, Resources, and Assets	40
Phase 3: Collecting and Assessing Information	41
Phase 4: Planning for Service Delivery	41
Phase 5: Using Communication Skills, Supervision, and Consultation	41
Phase 6: Identifying, Analyzing, and Implementing Empirically Based Interventions Designed to Achieve Client Goals	42
Phase 7: Applying Empirical Knowledge and Technology	43
Phase 8: Evaluating Program Outcomes and Practice Effectiveness	43
A Variety of Roles	44
Enabler	44
Broker	44
Advocate	44
Empowerer	44
Activist	44
Mediator	45
Negotiator	45
Educator	45
Initiator	45
Coordinator	45
Researcher	46
Group Facilitator	46
Public Speaker	46
A Systems Perspective	46
EXERCISE 2.2 Your Interest in Various Social Work Roles	47
Medical Model Versus Ecological Model	48
Medical Model	48
EXERCISE 2.3 Understanding the Major Mental Disorders	48
Ecological Model	50
EXERCISE 2.4 Understanding the Medical Model and the Ecological Model	51
Goals of Social Work Practice	52
Goal 1: Enhance the Clients' Problem-Solving, Coping, and Developmental Capacities	52
Goal 2: Link Clients with Systems That Provide Resources, Services, and Opportunities	52
Goal 3: Promote the Effective and Humane Operation of Systems That Provide Resources and Services	52
Goal 4: Develop and Improve Social Policy	52
Goal 5: Promote Human and Community Well-Being	53
A Problem-Solving Approach	53
EXERCISE 2.5 Your Interest in Achieving the Goals of Social Work	54
EXERCISE 2.6 Applying the Problem-Solving Approach	55
Micro, Mezzo, and Macro Practice	55
Social Casework	55
Case Management	56
Group Work	57
Group Treatment	57
Family Treatment	57
Community Organization	58
Policy Analysis	58
Administration	58
EXERCISE 2.7 Identifying Your Interest in Various Social Work Activities	59
Knowledge, Skills, and Values Needed for Social Work Practice	60
Social Group Work as a Component of Social Work Practice	63
Summary	64
Group Exercises	65
EXERCISE A Options Planning	65
EXERCISE B Social Work with Groups and Generalist Practice	66
EXERCISE C Assessing Core Competencies and Practice Behaviors	66
EXERCISE D Assessing Core Competencies and Practice Behaviors in Class and in Field Placement	70
EXERCISE E Social Work Value Issues	78
EXERCISE F Olga and Igor	80
EXERCISE G Genie and the Magic Lantern	81
EXERCISE H Pregnancy and Tragedy	81
CHAPTER 3 Group Dynamics: Leadership	84
Approaches to Leadership	84
The Trait Approach	84
EXERCISE 3.1 The Charismatic Leader	86
EXERCISE 3.2 Machiavellian Leaders	87
The Position Approach	87
The Leadership-Style Approach	88
The Distributed-Functions Approach	88
EXERCISE 3.3 Authoritarian, Democratic, and Laissez-Faire Leaders	89
Servant Leadership Approach	90
EXERCISE 3.4 Applying the Distributed-Function Approach	90
EXERCISE 3.5 Servant Leaders	92
Leadership Roles	92
Task and Maintenance Roles	92
Other Roles	94
EXERCISE 3.6 Your Task and Maintenance Contributions to a Group	95

Power and Influence in Groups	96	EXERCISE 4.5 Group Norms in This Class	131
Power Bases in Groups	97	Conformity	132
Reward Power	97	Idiosyncrasy Credits	134
Coercive Power	97	Do's and Don'ts of Norms	134
Legitimate Power	97	EXERCISE 4.6 Your Yielding to Group Pressure	135
Referent Power	98	Problems of Conformity	135
Expert Power	98	EXERCISE 4.7 Understanding Idiosyncrasy Credits	136
EXERCISE 3.7 The Power Bases in This Class	98	Types of Disruptive Behavior	137
Effects of Unequal Power	100	Handling Disruptive Behavior	140
Coleadership of a Group	101	Reducing the Likelihood of Disruptive Behavior	142
Benefits	101	EXERCISE 4.8 Handling Disruptive Behavior of a Group Member	143
EXERCISE 3.8 Groups of Equal Power and Unequal Power	102	Summary	144
Disadvantages	103	Group Exercises	145
Guidelines for Forming and Leading a Group	104	EXERCISE A Setting Personal and Group Goals	145
Homework	104	EXERCISE B A Sphinx Foundation Grant	145
Planning a Session	105	EXERCISE C The Nominal Group Approach	146
Relaxing Before You Start a Meeting	106	EXERCISE D Identifying and Changing Group Norms	147
Cues Upon Entering the Meeting Room	106	EXERCISE E An Ornerly Instructor	147
Seating Arrangements	106	EXERCISE F How Group Decisions Affect Values	148
Introductions	107	EXERCISE G Confrontation and I-Messages	150
Clarifying Roles	107	EXERCISE H Confronting and Being Confronted by Others	150
Agenda	108	CHAPTER 5 Verbal and Nonverbal Communication	152
Additional Guidelines for Leading a Group	108	A Model of Communication	152
Standards for Social Work Practice with Groups	109	One-Way Communication	153
Summary	116	EXERCISE 5.1 The Emotional Effects of One-Way Communication	155
Group Exercises	116	Two-Way Communication	156
EXERCISE A Desensitizing Fears of Leading a Group	116	Perception	156
EXERCISE B Task Functions and Group Maintenance Functions	116	The Perceptual Process	156
EXERCISE C Power Bases	117	Physiological Influences	157
EXERCISE D Leading a Group	118	Sociopsychological Influences	158
CHAPTER 4 Group Dynamics: Goals and Norms	119	EXERCISE 5.2 Using Defense Mechanisms	160
Setting Personal and Group Goals	119	EXERCISE 5.3 Defensive Communication	162
Personal Goals	120	Self-Disclosure	163
EXERCISE 4.1 Identifying Your Personal Goals	121	The Johari Window	164
Hidden Agendas	121	EXERCISE 5.4 Feeling Good After Self-Disclosure	165
EXERCISE 4.2 Hidden Agendas and Their Effects	122	EXERCISE 5.5 Johari Windows	167
Establishing Group Goals	123	How to Communicate Effectively	168
Operational and Measurable Goals	124	Sender	168
EXERCISE 4.3 Group Goals and Personal Goals in This Class	125	Receiver	168
Competition Versus Cooperation	127	Listening Skills	169
EXERCISE 4.4 The Effects of a Competitive Group Member	128	Active Listening	169
The Nominal Group Approach	128	I-Messages	170
Group Norms	130	EXERCISE 5.6 Learning to Use I-Messages	171
How Norms Are Learned and Developed	130		

EXERCISE 5.7 Resolving Collisions of Values	172
Collisions of Values	173
Nonverbal Communication	173
Functions of Nonverbal Communication	174
Repetition	174
Substitution	174
Accentuation	174
Regulation	174
Contradiction	174
The Risk of Misinterpretation	174
Forms of Nonverbal Communication	174
EXERCISE 5.8 Interpreting Nonverbal Cues	175
Posture	176
Body Orientation	176
Facial Expressions	176
Eye Contact	177
Gestures	177
Touching	178
Clothing	179
Personal Boundaries	180
Territoriality	181
Voice	182
Physical Appearance	182
EXERCISE 5.9 Reading Nonverbal Cues	183
Environment	184
Other Nonverbal Cues	185
Summary	185
Group Exercises	186
EXERCISE A The Johari Window	186
EXERCISE B Defense Mechanisms	186
EXERCISE C Distortions in Transmitting Information	186
EXERCISE D The Intruder	187
EXERCISE E Active Listening	188
EXERCISE F My Nonverbal Communications	188
EXERCISE G Nonverbal Cues	189
EXERCISE H A Popular Faculty Member	189
EXERCISE I Double Messages	189
EXERCISE J The Flat Tire	190
EXERCISE K Communicating While Blindfolded	190
EXERCISE L Giving and Receiving Feedback About Nonverbal Communication	191
EXERCISE M Zones of Personal Space	191
Size of the Group	196
Orienting Members to the Group	196
Meeting Place and Room	196
First Meeting	196
Working with Resistive and Disruptive Members	197
The Middle Stages	197
Adjourning a Meeting	197
Evaluating and Terminating	197
EXERCISE 6.1 Successful and Unsuccessful Group Experiences	198
Problem-Solving Approach	199
Identification and Definition	199
Assessment of Size and Causes	200
Development of Alternative Strategies	200
Assessment of Strategies	200
Selection and Implementation	200
Evaluation	200
Barriers to Effective Problem Solving	201
Inadequate Definitions	201
Invalid Hypotheses	201
Poor Communication	201
Lack of Skills	201
Lack of Resources	202
Lack of Motivation	202
Brainstorming	202
Conflict	203
Techniques for Resolving Conflicts	203
Win-Lose Approach	203
EXERCISE 6.2 My Tolerance for Conflicts	204
No-Lose Problem Solving	205
Role Reversal	207
EXERCISE 6.3 Creativity Inspired by Conflict	207
Empathy	208
Inquiry	208
I-Messages	208
Disarming	208
Stroking	209
EXERCISE 6.4 Disarming and Stroking	209
Letting Go or Forgiving	210
Mediation	210
What If These Strategies Do Not Work?	212
Intergroup Conflict	212
EXERCISE 6.5 Resolving Your Conflicts Effectively	213
Decision Making	216
The Bases of Decisions	216
Approaches to Decision Making	217
Consensus	218
Simple Majority Vote	218
Two-Thirds or Three-Fourths Majority Vote	219
Delegated Decisions	219
Multiple Voting	220
Averaging Individual Opinions	220
CHAPTER 6 Task Groups	193
A Variety of Task Groups	193
Guidelines for Leading Task Groups	195
Establishing the Group's Purpose	195
Potential Sponsorship of the Task Group	195
Selecting Potential Members	195
Recruiting Members	195

Group Versus Individual Decision Making	221	Problem-Solve	263
Groupthink	222	Feminist Intervention	263
EXERCISE 6.6 My Groupthink Experience	223	Principles of Feminist Therapy	264
Summary	224	EXERCISE 7.6 Feminist Intervention	267
Group Exercises	224	Using Feminist Intervention in Groups	267
EXERCISE A Suspended from High School	224	Evaluation of Feminist Therapy	268
EXERCISE B Brainstorming	225	Group Development Stages in Women's Groups	269
EXERCISE C Busing to Achieve Racial Integration	225	Summary	270
EXERCISE D Creative Thinking	227	Group Exercises	271
EXERCISE E The Manhattan Glass	227	EXERCISE A Coming Out of the Closet	271
EXERCISE F Brainteasers	229	EXERCISE B Spaceship to Futura	271
EXERCISE G Resolving Conflicts	230	EXERCISE C Feminist Intervention in Counseling	272
EXERCISE H Funding Social Programs Involves Hard Choices	230	EXERCISE D Are You a Feminist?	273
EXERCISE I Consensus	231	EXERCISE E Double Standards	273
EXERCISE J Subjective Influences on Merit Raises	232	EXERCISE F Applying Indicators of Cultural Competence	274
EXERCISE K Midterm Exam Using Jigsaw Puzzles	234	EXERCISE G Understanding Stereotypes	275
CHAPTER 7 Working with Diverse Groups	239	CHAPTER 8 Self-Help Groups	276
Definitions of Key Terms	240	Mended Hearts: An Example	276
EXERCISE 7.1 Some of My Stereotypes	241	Definition and Characteristics	277
Stereotyping and Multiculturalism: A Perspective	242	Classification of Self-Help Groups	278
Your Stereotypes and Preconceptions	244	Katz and Bender Classification	278
EXERCISE 7.2 Questionnaire About Gays and Lesbians	244	Powell Classification	279
Knowledge About Diverse Groups	247	Benefits of Self-Help Groups	280
Working with the LGBTIQQ Population in Groups	250	EXERCISE 8.1 Merits and Shortcomings of a Self-Help Group	281
Posture of Reciprocity	251	Linkage with Social Workers	282
EXERCISE 7.3 Victimized in Iran	252	Starting a Self-Help Group	282
Which Intervention Techniques Work?	253	Online Self-Help Groups	284
Anger Management	253	EXERCISE 8.2 Checking Out Online Self-Help Groups	285
Cultural Communication	253	EXERCISE 8.3 Using the American Self-Help Group Clearinghouse	290
Ethnic-Sensitive Practice	255	Summary	290
Empowerment	256	Group Exercises	291
Strengths Perspective	256	EXERCISE A Alcoholics Anonymous	291
EXERCISE 7.4 The Strengths Perspective Applied to a Homeless Family	257	EXERCISE B Combating Terrorism	291
Culturally Competent Practice	258		
Indicators for the Achievement of the Standards for Cultural Competence	259	 	
EXERCISE 7.5 Culturally Competent Standards	260	CHAPTER 9 Social Work with Families	293
Safeguarding Human Rights	260	 	
The RAP Framework for Leading Multiracial Groups	262	Diversity of Family Forms	293
Recognize	262	Societal Functions of Families	295
Anticipate	262	EXERCISE 9.1 Composition and Strengths of My Family	296
		Family Problems and the Nature of Social Work	297
		Family Assessment	299

The Eco-Map	299
EXERCISE 9.2 An Eco-Map of My Family	302
The Genogram	302
EXERCISE 9.3 A Genogram of My Family	305
Family Therapy	308
Verbal Communication	309
Avenues of Communication	309
Nonverbal Communication	310
EXERCISE 9.4 Problematic Verbal Communication Patterns in My Family	311
Family Group Norms	311
EXERCISE 9.5 Problematic Nonverbal Communication Patterns in My Family	312
EXERCISE 9.6 Functional and Problematic Norms in My Family	313
Family Roles	314
EXERCISE 9.7 Functional Roles and Problematic Roles of My Family Members	315
Personal and Group Goals	315
EXERCISE 9.8 Personal Goals, Group Goals, and Hidden Agendas in My Family	317
Hidden Agendas	318
Family Conflicts, Problems, and Resolutions	318
Marital Difficulties	318
Parent/Child Relationship Difficulties	320
Personal Problems of Individual Family Members	321
External Environmental Stresses	323
EXERCISE 9.9 Challenges Faced by My Family	324
Three Approaches to Family Therapy	325
A Communication Pattern Approach	325
A Family Subsystem Approach	326
A Cognitive-Behavioral Approach	328
EXERCISE 9.10 Applying Family Therapy Concepts to My Family	330
Summary	333
Group Exercises	333
EXERCISE A The Sitzke Family	333
EXERCISE B You and Your Family	335
EXERCISE C Analyzing Your Family in Terms of Group Concepts	336
CHAPTER 10 Organizations, Communities, and Groups	339
<hr/>	
Organizations	339
The Relationship Between a Group and an Organization	340
EXERCISE 10.1 Refuting Our Organizational Myths	340
Models of Organizations	342
The Autocratic Model	342
The Custodial Model	342
EXERCISE 10.2 Working for an Autocratic Boss	343
The Scientific Management Model	344
The Human Relations Model	345
Theory X and Theory Y	346
The Collegial Model	346
EXERCISE 10.3 Working for Theory X Versus Theory Y Managers	347
Theory Z	348
Management by Objectives	349
Total Quality Management	350
EXERCISE 10.4 Applying Concepts of Models of Organizations	351
Surviving in a Bureaucracy	352
EXERCISE 10.5 Your Orientation Toward Bureaucratic Systems	354
Organizational Effectiveness; Structure Versus Leadership Competency	356
Communities, Organizations, and Groups	357

Social Planning Model	363
Social-Action Model	365
Building and Sustaining Community Assets	366
Skills for Macro Practice	368
Evaluating Outcomes	368
Fundraising	369
Budgeting	369
Working with the Media	369
Conducting a Needs Assessment	369
Transformative Dialogue	370
Summary	371
Group Exercises	372
EXERCISE A Transformative Dialogue	372
EXERCISE B Analyzing a Human Services Organization	372
EXERCISE C Understanding and Applying Models of Organizations	373
EXERCISE D Theory X and Theory Y	373
EXERCISE E Appreciating Communities	374
EXERCISE F Analyzing a Community	374
EXERCISE G Analyzing Community Change	374

CHAPTER 11 Educational Groups: Stress Management and Time Management as Examples 376

Educational Groups	376
Stress Management	377
Conceptualizing Stress	377
Reactions to Stress	377
EXERCISE 11.1 My Physiological Reactions to High Levels of Stress	378
Stressors	379
EXERCISE 11.2 My Stress-Related Illnesses	380
Optimal Levels of Stress	381
Long-Term Distress	381
EXERCISE 11.3 Events and Self-Talk as Stressors	383
Burn-Out	385
EXERCISE 11.4 A Time When I Burned Out	386
Structural Causes of Burn-Out	386
Managing Stress and Preventing Burn-Out	388
Goal Setting and Time Management	388
Relaxation	388
Exercise	389
Taking Care of Your Physical Self	390
Social Support Groups	390
Talking to Others	390
Positive Thinking	390
Changing Stress-Producing Thoughts	391
Law of Attraction	392
EXERCISE 11.5 Qualities I Admire in Others	392
Changing or Adapting to Distressing Events	393
Personal Pleasures	393
EXERCISE 11.6 Stress Management Techniques for Me	394
Time Management	394
Setting and Prioritizing Goals and Tasks	395
Set Goals	395
Prioritize Goals	395
List Tasks for A Goals	396
Prioritize Tasks	396
Schedule Tasks	396
EXERCISE 11.7 My High-Value Goals and Tasks	397
Time-Saver Tips	398
Planning Tomorrow	398
Concentrated Study	398
Best Use of Time	398
Writing Papers and Reports	398
Physical Environment	399
Saying “No” Assertively	399
Deadlines	399
Avoid “Shoulds”	399
Be Optimistic	399
Amount of Sleep	399

Relaxation	399
Other Study Hints	399
Overcoming Procrastination	399
EXERCISE 11.8 My Time-Savers	400
Swiss Cheese Approach	400
EXERCISE 11.9 Ending My Procrastination	401
Other Suggestions	402
Advantages of Time Management	402
Summary	403
Group Exercises	404
EXERCISE A Resolving Current Stressors	404
EXERCISE B Relaxing Through Meditation	404
EXERCISE C Setting High-Value Goals and Tasks	406
EXERCISE D Time Diagram	407

APPENDIX TWO Answers to Group Exercises D–F in Chapter 6 619

Notes	621
Index	635

Preface

What inspired this book? In the spring of 1983, I was teaching my first group work course to an undergraduate social work class. Before the start of the semester, I wrote a number of lectures about group dynamics and how groups are used in social work practice with socialization groups, task groups, decision-making and problem-solving groups, self-help groups, and therapy groups. At the start of the semester, I dutifully began giving these lectures. Soon, however, I began sensing that the lectures were not being well received. During the third week, a student stayed after class and said, “I’m afraid this may hurt my grade, but most of the students in this class feel that you can’t teach a group work class with only lectures. The only way students will learn how to run groups is by having the experience (in class or out of class) of leading groups.” I thought about it for a few days and decided the student was exactly right. With the students’ consent, I redesigned the whole course, with the basic thrust being to have the students take turns in leading the class on group work topics that we mutually agreed upon. Because at that time there was no social work group text to facilitate this process, I attempted to write one. The first edition of this text was published in 1985.

The basic assumption of this text is that the best way for students to learn how to run groups is by leading groups in class. The classroom thus becomes a laboratory for students to practice and develop their group leadership skills. This text is designed to facilitate this laboratory approach to undergraduate and graduate group work courses.

This edition provides a number of opportunities for students to gain proficiency in social group work skills through the inclusion of numerous “skill-building” exercises in various sections of each chapter. The title of this text, *Social Work with Groups: A Comprehensive Worktext*, reflects this emphasis on using skill-building exercises to facilitate student development of group leadership skills.

A major focus of this edition is to provide text content and skill-building exercises that focus on students acquiring the 10 competencies and 41 practice behaviors of the 2008 EPAS (*Educational Policy and Accreditation Standards*) of the Council on Social Work Education (CSWE).

The advantage of using the exercises from this workbook is that the exercises are explicitly connected to the competencies and practice behaviors of 2008 EPAS. In addition, there is an assessment process in this workbook that will facilitate the evaluation of students on the extent to which they are attaining the competencies and practice behaviors of 2008 EPAS. The higher a student is assessed in attaining these competencies and practice behaviors, the more likely it is that the student is becoming a competent social worker. A table that identifies the chapters in the text and the practice exercises in this workbook that relate to the 41 practice behaviors in 2008 EPAS can be found on the inside covers of the text. (Students will progress in developing the knowledge, skills, and values needed for becoming a competent social worker by conscientiously completing these exercises.)

An additional advantage of this text is that it may be used in preparing self-study documents for accreditation—as documentation that the course in which *Social Work with Groups* is being used is covering the competencies and practice behaviors of 2008 EPAS. Coverage is provided with text content and with exercises.

Plan of the Book

Each chapter is designed according to the following format:

1. The learning objectives of the chapter are stated.
2. Theoretical material is presented on how the learning objectives can be achieved. If the learning objective is to learn how to handle disruptive members of a group, for example, the chapter describes appropriate strategies.
3. Several “skill-building” exercises are then interspersed throughout each chapter, and also at the end of each chapter. These exercises give students practice in acquiring the skills described in the chapter.

At the end of the book is a Group Treatment Theories Resource Manual (GTTRM). To highlight the uniqueness of the GTTRM, material is presented in modules rather than chapters. This GTTRM presents prominent theories of counseling that are widely used by social workers in working with treatment groups.

Using the Book

After the instructor covers the introductory material contained in the first chapter, it is suggested that students (either individually or in small groups) take turns preparing and conducting future class sessions by summarizing the theoretical material in the chapters and leading the class in related exercises. (Students may also be given the opportunity to select a topic not covered in the text.)

The skill-building exercises in this text may be used in a variety of ways. The assigned leader (who may be the instructor, a student, or a small group of students) for a chapter may use the exercises in the following ways: (1) The assigned leader may request that the other students complete certain exercises as a homework assignment prior to the next class period; the exercises are then reviewed when the class next meets. (2) The assigned leader may have the other students complete one or more exercises during the class. (3) The instructor may assign certain exercises as written homework to be submitted for evaluation. (4) The instructor may have each student complete several exercises and then place them in a portfolio, which the instructor may periodically review for evaluation purposes.

Students should make their presentations stimulating, interesting, and educational by speaking extemporaneously rather than reading and by adapting chapter topics using personal observations or research. Students should also prepare and distribute handouts that summarize the key points of their presentations and should move around the classroom to maintain and increase the interest of the class. The use of technological resources, such as Microsoft® PowerPoint®, is also suggested.

New to This Edition

Content has been added on:

- Dialectical behavior therapy in groups
- Servant leadership
- Working with the LGBTIQQ population in groups
- Can our thoughts alter our genetic code?
- Group work with people who are grieving
- Group work with people impacted by domestic violence
- Group work with older persons
- Group work with people who have an eating disorder
- Families coping with chronic disease
- Group service-learning projects for college students
- A group in a high school
- Task groups for Habitat for Humanity

- Multi-family groups
- Working with adolescents in groups
- Group therapy with substance use disorders

Much of this new content is written by group work practitioners who are contributing authors to this edition. (It is the primary author's belief that long-time group work practitioners are in the best position to write about how group work can best be used in direct practice in social work.)

(NOTE TO FACULTY: TWO ASSESSMENT INSTRUMENTS ARE PRESENTED AT THE END OF CHAPTER 2 THAT MEASURE THE EXTENT TO WHICH STUDENTS ARE ATTAINING THE COMPETENCIES AND PRACTICE BEHAVIORS SPECIFIED IN 2008 EPAS.)

Ancillaries

Additional teaching aids are available to instructors through login.cengage.com, including an Instructor's Manual and a chapter-by-chapter Test Bank with multiple-choice and true/false questions tagged to EPAS competencies and practice behaviors. In addition, preassembled PowerPoint® lecture slides can be adapted to fit instructors' classroom needs, and an online Curriculum Quick Guide aligns the material presented in the chapters with EPAS competencies.

Acknowledgments

A special thank you to the following contributing authors: Crystal S. Aschenbrener, Debra S. Borquist, Katherine Drechsler, Jacob Dunn, Rachel Dunn, Sarah Hessenauer, Karen K. Kirst-Ashman, Craig Mead, Brenda K. Nelson, Ann Petty, Michael Wallace, and Mary Weeden. Vicki Vogel is recognized for helping to prepare the manuscript and for preparing the ancillary materials.

I would like to thank the following reviewers who provided suggestions for changes for this edition:

Gregg Allinson
Beaufort County Community College

Brenda Armstrong Clark
Benedict College

Judith Gray
Ball State University

Michael Tebbe
University of Cincinnati

Joanne Whelley
Barry University

A final thank you to the staff at Cengage Learning for their support and highly professional assistance with the texts I've authored.

—Charles Zastrow

About the Author

CHARLES ZASTROW, MSW and PhD, is assistant director and professor in the social work program at George Williams College of Aurora University, Williams Bay, Wisconsin. He has worked as a practitioner in a variety of public and private social welfare agencies and has chaired 22 social work accreditation site visit teams for the Council on Social Work Education (CSWE).

He was, for 6 years, a member of the Commission on Accreditation of CSWE. He is a member of the International Association for Social Work with Groups, the National Association of Social Workers, the Council on Social Work Education, and the NASW Register of Clinical Social Workers. He is licensed as a Clinical Social Worker in Wisconsin. In addition to *Social Work with Groups*, he has written several other books, including the following textbooks: *Introduction to Social Work and Social Welfare* (11th ed.), *The Practice of Social Work* (10th ed.), and *Understanding Human Behavior and the Social Environment* (9th ed.) (with Dr. Karen Kirst-Ashman).

Groups: Types and Stages of Development

Learning Objectives (LO)

Each group develops a unique character or personality because of the principles of group dynamics. This chapter will help prepare students to:

- LO 1-1** Understand the history of social group work.
- LO 1-2** Identify the primary types of groups in social work.
- LO 1-3** Understand four models of group development over time.
- LO 1-4** Describe the differences between reference groups and membership groups.
- LO 1-5** Comprehend guidelines on how to conduct classroom exercises.
- LO 1-6** Apply several ice-breaker exercises.

Every social service agency uses groups, and every practicing social worker is involved in a variety of groups. Social work with groups is practiced in adoption agencies, correctional settings, halfway houses, substance abuse treatment centers, physical rehabilitation centers, family service agencies, private psychotherapy clinics, mental hospitals, nursing homes, community centers, public schools, and many other social service settings. To effectively serve clients in human service systems today, social workers in generalist practice positions must be trained in group methods. Often, social workers serve as leaders and participants in myriad groups requiring skills ranging from simple to complex. The beginning social worker is likely to be surprised at the diverse groups in existence and excited by the challenge of practicing social work in many different settings.

LO 1-1 Understand the History of Social Group Work

HISTORICAL DEVELOPMENT OF GROUP WORK

The roots of group social work began in the settlement houses, the Young Men's and Young Women's Christian Associations (YMCAs and YWCAs), Boy Scouts and Girl Scouts, and Jewish centers of the 1800s.¹ These agencies focused on providing group programs for people considered "normal." Recipients of early group services came for recreation, informal education, friendship, and social action. Euster notes that these recipients "learned to cooperate and get along with others socially; they enriched themselves through new knowledge, skills, and interests, and the overall state of society was bettered through responsible involvement in community problems."²

Settlement Houses

The first settlement house, Toynbee Hall, was established in London in 1884; many others were soon formed in large U.S. cities.³

Many of the early settlement-house workers were daughters of ministers. Usually from middle- and upper-class families, they would live in a poor neighborhood so they could experience the harsh realities of poverty. Using the missionary approach of teaching residents how to live moral lives and improve their circumstances, early settlement workers sought to improve housing, health, and living conditions; find jobs for workers; teach English, hygiene, and occupational skills; and improve living conditions through neighborhood cooperative efforts. The techniques settlement houses used to effect change are now called social group work, social action, and community organization.

Settlement houses emphasized “environmental reform,” but they also “continued to struggle to teach the poor the prevailing middle-class values of work, thrift, and abstinence as the keys to success.”⁴ In addition to dealing with local problems through local action, settlement houses played important roles in drafting legislation and organizing to influence social policy and legislation.

The most noted leader in the settlement-house movement was Jane Addams of Hull House in Chicago. She was born in 1860 in Cedarville, Illinois, the daughter of parents who owned a successful flour mill and wood mill.⁵ After graduating from Rockford Seminary in Rockford, Illinois, she attended medical school briefly but was forced to leave due to illness. She then traveled for a few years in Europe, perplexed as to what her life work should be. At the age of 25, she joined the Presbyterian church, which helped her find a focus for her life: religion, humanitarianism, and serving the poor. (She later joined the Congregational Church, now known as the United Church of Christ.) Addams heard about the establishment of Toynbee Hall in England and returned to Europe to study the approach. The staff of college students and graduates, mainly from Oxford, lived in the slums of London to learn conditions firsthand and to improve life there with their own personal resources, including financial ones.

Jane Addams returned to the United States and rented a two-story house, later named Hull House, in an impoverished neighborhood in Chicago. With a few friends, Addams initiated a variety of group and individual activities for the community. Group activities included a literature reading group for young women, a kindergarten, and groups that focused on social relationships, sports, music, painting, art, and discussion of current affairs. Hull House also provided services to individuals who needed immediate help, such as food, shelter, and information on and referral for other services. A Hull House Social Science Club studied social problems in a scientific manner and then became involved in social action efforts to improve living conditions. This group worked successfully for passage of Illinois legislation to prevent the employment of children in sweatshops. Addams also became interested in the various ethnic groups in the neighborhood. She was fairly successful in bringing the various nationalities together at Hull House, where they could interact and exchange cultural values.

The success of Hull House served as a model for the establishment of settlement houses in other areas of Chicago and many other large cities in the United States. Settlement-house leaders believed that by changing neighborhoods, they could improve communities, and by altering communities, they could develop a better society. For her extraordinary contributions, Jane Addams received the Nobel Prize for Peace in 1931.

Young Men’s Christian Association (YMCA)

The founder of the Young Men’s Christian Association (YMCA), George Williams,⁶ was born and reared on a small farm in England. He stopped attending school at the age of 13 to work on his father’s farm, but at 14, he became an apprentice to a draper (a manufacturer and dealer of cloth and woolen materials) and learned the trade. He grew up in a religious environment and joined the Congregational Church at the age of 16. At 20, he moved to London and worked for another drapery firm.

Like Williams, the business owner, George Hitchcock, was deeply religious and allowed his new employee to organize prayer meetings at work.

The size of the prayer circle gradually grew, and the meetings featured Bible reading as well as prayers. The success of this group inspired Williams and his associates to organize similar groups at other drapers' establishments. The prayer circle Williams formed with 12 fellow employees marked the beginning of YMCAs. In 1844, the resulting prayer circles at 14 businesses formed an association called the Young Men's Christian Association. Each group conducted weekly religious services that included prayer, Bible readings, and discussions of spiritual topics.

The YMCA soon began to expand its activities. Prominent speakers from various fields of public and scholarly life addressed its members. An office was selected, and Protestant clergy in France, Holland, and other countries were persuaded to form YMCAs. Gradually, the programs were expanded to meet the unique needs of the communities in which the YMCAs were located.

In 1851, Thomas V. Sullivan, a retired mariner, picked up a religious weekly in Boston and read about the YMCA movement in London.⁷ Sullivan gathered a few friends and established the first YMCA in the United States. Similar to the London association, the U.S. movement spread quickly to other communities. In only 7 years, YMCAs were serving communities throughout the United States.

The U.S. YMCA had many firsts. It was the first organization to aid troops during wartime in the field and in prison camps. It pioneered community sports and athletics, invented volleyball and basketball, and taught water safety and swimming. It devised an international program of social service similar to that of the Peace Corps. It originated group recreational camping, developed night schools and adult education, initiated widespread nondenominational Christian work for college students, and reached out to assist foreign students. From an origin that involved a narrowly focused religious objective, YMCAs have expanded their objectives in a variety of directions. The success of YMCAs helped spur the first Young Women's Christian Association (YWCA), formed in Boston in 1866.⁸

LO 1-2 Identify the Primary Types of Groups in Social Work

TYPES OF GROUPS

There are a variety of groups that occur in social work—social conversation, recreation skill building, educational, task, problem solving and decision making, focus, self-help, socialization, treatment, and sensitivity and encounter training. According to Johnson and Johnson, a group may be defined as two or more individuals in face-to-face interaction, each aware of positive interdependence as they strive to achieve mutual goals, each aware of his or her membership in the group, and each aware of the others who belong to the group.⁹

Social Conversation

Social conversation is often employed to determine what kind of relationship might develop with people we do not know very well. Because talk is often loose and tends to drift aimlessly, there is usually no formal agenda for social conversations. If the topic of conversation is dull, the subject can simply be changed. Although individuals may have a goal (perhaps only to establish an acquaintanceship), such goals need not become the agenda for the entire group. In social work, social conversation with other professionals is frequent, but groups involving clients generally have objectives other than conversation, such as resolving personal problems.

Recreation/Skill Building

Recreational groups may be categorized as *informal recreational groups* or *skill-building recreational groups*.

A recreational group service agency (such as the YMCA, YWCA, or neighborhood center) may offer little more than physical space and the use of some equipment to provide activities for enjoyment and exercise. Often activities such as playground games and informal athletics are spontaneous, and the groups are practically leaderless. Some agencies claim that recreation and interaction with others help to build character and prevent delinquency among youths by providing an alternative to street life.

In contrast to informal recreational groups, a skill-building recreational group has an increased focus on tasks and is guided by an adviser, coach, or instructor. The objective is to improve a set of skills in an enjoyable way. Examples of activities include arts and crafts, and sports such as golf, basketball, and swimming, which may develop into competitive team sports with leagues. These groups are frequently led by professionals with recreational training rather than social work training, and the agencies involved include the YMCA, YWCA, Boy Scouts, Girl Scouts, neighborhood centers, and school recreational departments.

Education

While the topics covered vary widely, all educational groups teach specialized skills and knowledge, such as classes on childrearing, stress management, parenting, English as a foreign language, and assertiveness training. Orientations offered by social service organizations to train volunteers fall into this category as well. Educational groups usually have a classroom atmosphere, involving considerable group interaction and discussion; a professional person with expertise in the area, often a social worker, assumes the role of teacher.

Task

Task groups are formed to achieve a specific set of tasks or objectives. The following examples are types of task groups that social workers are apt to interact with or become involved in. A *board of directors* is an administrative group charged with responsibility for setting the policy governing agency programs. A *task force* is a group established for a special purpose and is usually disbanded after the task is completed. A *committee* of an agency or organization is a group that is formed to deal with specific tasks or matters. An *ad hoc committee*, like a task force, is set up for one purpose and usually ceases functioning after completion of its task.

Problem Solving and Decision Making

Both providers and consumers of social services may become involved in groups concerned with problem solving and decision making. (There is considerable overlap between task groups and these groups; in fact, problem-solving and decision-making groups can be considered a subcategory of task groups.)

Social service providers use group meetings for objectives such as developing a treatment plan for a client or a group of clients, or deciding how best to allocate scarce resources. Potential consumers of services may form a group to meet a current community need. Data on the need may be gathered, and the group may be used as a vehicle either to develop a program or to influence existing agencies to provide services. Social workers may function as stimulators and organizers of these group efforts.

In problem-solving and decision-making groups, each participant normally has some interest or stake in the process and stands to gain or lose personally by the outcome. Usually, there is a formal leader, and other leaders sometimes emerge during the process.

A Problem-Solving and Decision-Making Group: Family Group Conferencing

The family group conferencing approach with abused or neglected children originated in New Zealand. The approach has now been adopted in many other countries, including in the United States.

When evidence of child abuse by child protective services or the police has been documented, some child protective services agencies are now offering the parents of the affected children the option of using the family group conferencing approach to attempt to improve the parenting and end future abuse. The process is first explained to the parents. If the parents agree to involve their extended kinship network in planning, the process is then implemented.

The family decision-making conference is facilitated by a professional person (often associated with child protective services). The professional person is usually called the “family group coordinator.” Three characteristics are central to family group conferencing:

1. Family is widely defined to include extended family members, as well as other people who are significant to the family.
2. The family is given the opportunity to prepare the plan.
3. The professionals involved with the family must agree to the plan unless it is thought to place the child at risk.

The coordinator prepares and plans for the first meeting of the extended family. Such planning may take weeks.

Downs, Moore, McFadden, and Costin describe the initial planning process:

This involves working with the family; identifying concerned parties and members of the extended kinship network; clarifying their roles and inviting them to a family group meeting; establishing the location, time, and other logistics; and managing other unresolved issues. At the meeting the coordinator welcomes and introduces participants in a culturally appropriate manner, establishes the purpose of the meeting, and helps participants reach agreement about roles, goals, and ground rules. Next, information is shared with the family, which may involve the child protection workers and other relevant professionals such as a doctor or teacher involved with the child.^a

In the New Zealand model, the coordinator and other professional withdraw from the meeting in the next stage to allow the family privacy for their deliberations. (Some

programs in the United States and other countries allow the coordinator to remain in the meeting.) The kinship network makes plans to respond to the issues that are raised, including developing a plan for the safety and the care of the child. The coordinator and/or protective services retain the right to veto a family plan if they believe the child will not be protected. (In reality, a veto is rarely used.) Several meetings (over several days) may be necessary to develop the family plan.

Downs and colleagues summarize the challenges faced by social workers with this approach:

Working with family group decision making requires a new approach to family-centered practice. The social worker must expand his or her ideas about the family to recognize the strength and centrality of the extended kinship network, particularly in communities of color. Use of the strengths perspective is critical. The worker must understand the greater investment of kin in the well-being of the child and should also understand that, even when parts of the kinship system may seem to be compromised or dysfunctional, the healthier kinfolk can assess and deal with the problem. One of the greatest challenges for the social worker is incorporating the sharing of power or returning of power to the kinship network. Many social workers trained as family therapists or child welfare workers have assumed a power role and may find it difficult to relinquish a sense of control.^b

There are several advantages of family group conferencing. It facilitates getting the extended family involved in meeting the needs of the abused/neglected child or children and in meeting the needs of their parents. It reduces government intervention in people's lives. It recognizes the strengths of kinship networks to provide assistance to at-risk families. It reduces the number of children placed in foster homes. (Frequently, with this approach one or more extended family members temporarily take in the child, giving the parents an opportunity to receive whatever they need to become more stable and to learn better parenting skills.)

Family group conferencing has also been adapted to respond to other family issues, such as families with an adjudicated delinquent.

Focus

Focus groups are closely related to task groups and problem-solving and decision-making groups. They may be formed for a variety of purposes, including (1) to identify needs or issues, (2) to generate proposals that resolve an identified issue, and (3) to test reactions to alternative approaches to an issue. A focus group is

A group convened to discuss a specific issue or single topic, often with the aid of questionnaires and a moderator who actively keeps the conversation oriented to that topic. Such groups are often established to acquire information and generate ideas that would not be as accessible through individual interviews.¹⁰

A Self-Help Group: Parents Anonymous

Parents Anonymous (PA), a national self-help organization for parents who have abused or neglected their children, was established in 1970 by Jolly K. in California. For 4 years before forming the group, Jolly had struggled with an uncontrollable urge to severely punish her daughter. One afternoon she attempted to strangle the child. Desperate, she sought help from a local child-guidance clinic and was placed in therapy. When asked by her therapist what she could do about her problem, Jolly developed an idea. As she explained, "If alcoholics could stop drinking by getting together, and gamblers could stop gambling, maybe the same principle would work for [child] abusers, too." With her therapist's encouragement she formed "Mothers Anonymous" in 1970 and organized a few chapters in California. Nearly every major city in the United States and Canada now has a chapter, and the name has been changed to Parents Anonymous because fathers who abuse their children are also eligible to join.

PA is a crisis intervention program that offers two main forms of help: a weekly group meeting and personal and telephone contact. Members share experiences and feelings during weekly meetings and learn to better control their emotions. During periods of crisis, personal and telephone contact is especially important, particularly when a member feels a nearly uncontrollable desire to take anger or frustration out on a child. Parents may be referred to PA by a social agency (including protective services) or be self-referred as parents who recognize that they need help.

Cassie Starkweather and S. Michael Turner describe why abusive parents would rather participate in a self-help group than receive professional counseling:

It has been our experience that most [abusive] parents judge themselves more harshly than other, more objective people tend to judge them. The fear of losing their children frequently diminishes with reassurance from other members that they are not the monsters they think they are.

Generally speaking, PA members are so afraid they are going to be judged by others as harshly as they judge themselves that they are afraid to go out and seek help. Frequently our members express fears of dealing with a professional person, seeing differences in education, sex, or social status as basic differences that would prevent easy communication or mutual understanding.

Members express feelings of gratification at finding that other parents are "in the same boat." They contrast this with their feelings about professionals who, they often assume, have not taken out the time from their training and current job responsibilities to raise families of their own.^a

PA emphasizes honesty and directness, as parents who are prone to abuse their children have learned to hide this problem because society finds it difficult to acknowledge. In contrast to society's tendency to deny the problem, the goal of PA is to help parents admit that they are abusive. The term *abuse* is used liberally at meetings, and this insistence on frankness has a healthy effect on members. Abusive parents are relieved because they have finally found a group of people able to accept them as they are. Furthermore, only when they are able to admit they are abusive can they begin to find ways to heal themselves.

During meetings, parents are expected to actually admit to beating their child or engaging in other forms of abuse, and the members challenge each other to find ways to curb these activities. Members share constructive approaches to anger and other abuse-precipitating emotions and help each other develop specific plans for dealing with situations that have resulted in abusive episodes. Members learn to recognize danger signs and to take action to avoid abuse.

Leadership is provided by a group member selected by other members. The leader, called a chairperson, is normally assisted by a professional sponsor who serves as resource and back-up person to the chair and the group. The social worker who assumes the role of sponsor must be prepared to perform a variety of functions, including teacher-trainer, broker of community services needed by parents, advocate, consultant, and counselor.^b

Two examples of a focus group are a nominal group (described in Chapter 4) and a brainstorming session (described in Chapter 6).

A *representative group* is another version of a focus group. Its strength is that its members have been selected specifically to represent different perspectives and points of view in a community. At best, the representative group is a focus group that reflects the cleavages in the community and seeks to bring diverse views to the table; at worst, it is a front group for people who seek to make the community *think* it has been involved.

Self-Help and Mutual Aid

Self-help groups are increasingly popular and often successful in helping individuals overcome social or personal problems. Katz and Bender provide a comprehensive definition:

Self-help groups are voluntary, small group structures . . . usually formed by peers who have come together for mutual assistance in satisfying a common need, overcoming a common handicap or life-disrupting problem, and bringing about desired social and/or personal change. The initiators and members of such groups perceive that their needs are not, or cannot be, met by or through existing social institutions. . . . They often provide material assistance as well as emotional support, they are frequently “cause”-oriented, and promulgate an ideology or [set of] values through which members may attain an enhanced sense of personal identity.¹¹

Alcoholics Anonymous, developed by two recovering alcoholics, was the first self-help group to demonstrate substantial success. In *Self-Help Organizations and Professional Practice*, Powell describes numerous self-help groups that are now active.¹²

Closely related to self-help groups are mutual-aid groups, and the terms are sometimes interchangeable. Mutual-aid groups are informal or formal associations of people who share certain problems and meet regularly in small groups with professional leaders to provide emotional support, information, assistance in problem solving, and other help for each other.

Many self-help groups use individual confession and testimony techniques. Each member explains his or her problem and recounts related experiences and plans for handling the problem. When a member encounters a crisis (for example, an abusive parent having an urge to abuse a child), he or she is encouraged to call another group member, who helps the person cope. Having experienced the misery and consequences of the problem, group members are highly dedicated to helping themselves and their fellow sufferers. The participants also benefit from the “helper therapy” principle; that is, the helper gains psychological rewards.¹³ Helping others makes a person feel worthwhile, enabling the person to put his or her own problems into perspective.

Most self-help groups are “direct service” in that they help members with individual problems. Other self-help groups work on community-wide issues and tend to be more social-action oriented. Some direct service self-help groups attempt to change legislation and policy in public and private institutions. Others (parents of children with a cognitive disability, for example) also raise funds and operate community programs. However, many people with personal problems use self-help groups in the same way others use social agencies. An additional advantage of self-help groups is that they generally operate with a minimal budget. (For further discussion, see Chapter 8.)

Socialization

The primary objective of most socialization groups is to develop attitudes and behaviors in group members that are more socially acceptable.¹⁴ Developing social skills, increasing self-confidence, and planning for the future are other focuses. Leadership roles in socialization groups are frequently filled by social workers who work with groups for predelinquent youths to curb delinquency; youths of diverse racial backgrounds to reduce racial tensions; and pregnant, unmarried young females to help them make plans for the future. Elderly residents in nursing homes are often

remotivated by socialization groups and become involved in various activities. Teenagers at correctional schools are helped to make plans for returning to their home community. Leadership of all the groups mentioned in this section requires considerable skills and knowledge to help the group to foster individual growth and change.

Treatment

Treatment groups are generally composed of members with severe emotional, behavioral, and personal problems. Leaders of such groups must have superb counseling and group leadership skills, including the ability to accurately perceive the core of each member's response to what is being communicated. Group leaders must also have the personal capacities to develop and maintain a constructive atmosphere within a group. As in one-on-one counseling, the goal of treatment groups is to have members explore their problems in depth and then develop strategies for resolving them. Three treatment approaches (reality therapy, behavior therapy, and rational therapy) are described in the Group Treatment Theories Resource Manual (located at the end of the text). These three treatment approaches can be used to change dysfunctional behaviors and unwanted emotions of group members.

In summary, to be a competent group therapist, the professional should have superb interviewing and counseling skills, a working knowledge of the principles of group dynamics (described in Chapters 1, 2, 3, 4, 5, and 6 of this text), and a working knowledge of contemporary therapy approaches, three of which are described in the Group Treatment Theories Resource Manual, located at the end of this text.

Group treatment has several advantages over one-on-one therapy. The "helper" therapy principle generally is operative. Members at times interchange roles and become the helper for someone else, receiving psychological rewards and putting their own problems into perspective in the process. Group treatment also allows members with interaction problems to test new approaches. In addition, research has shown it is generally easier to change the attitudes of an individual in a group than one on one.¹⁵ Group treatment permits a social worker to treat more than one person at a time and represents a substantial savings of professional time. (See "Group Therapy with Substance Use Disorders".)

COMMON TYPES OF TREATMENT GROUPS*

Social workers are likely to encounter treatment groups in a wide variety of settings, such as outpatient mental health clinics, community-based social service agencies, inpatient psychiatric units, intensive outpatient programs, substance abuse programs, residential programs, domestic violence programs, special education programs, therapeutic day schools, veteran programs, day treatment programs, correctional institutions, juvenile justice programs, and other institutional programs. Most treatment groups in these settings are based upon a recovery model emphasizing that clients can achieve long-term recovery from serious mental illness, developmental and social problems, and behavioral health issues. This recovery is facilitated and achieved through skill building and psychosocial rehabilitation, which improves clients' abilities to self-manage symptoms and problems in their current environment. These groups are often called psychosocial rehabilitation or community support groups and focus on changing behavior, skill building, and increasing natural supports. Groups are frequently structured using cognitive and behavioral therapy approaches (see modules at end of text), and facilitators are often given substantial latitude as to the content and structure of specific group sessions. Next we'll look at some of the more common treatment groups social workers may encounter and be asked to facilitate. The types of groups an agency provides and the group names used will vary depending on agency, mission, population, and client needs.

Group Therapy with Substance Use Disorders*

Advantages of Group Treatment

Group therapy is one of the therapeutic tools used for treating people with substance use disorders. A benefit of using groups for treating people with substance use disorders is that groups intrinsically reduce feelings of isolation of group members, and participation in the group allows members of the group to realize that they are not the only ones dealing with the process of recovery. These qualities experienced by the group members can draw them into the culture of recovery. People who abuse substances often are more likely to remain abstinent and committed to recovery when treatment is provided in groups, because of rewarding and therapeutic forces such as affiliation, confrontation, support, gratification, and identification. Groups provide positive peer support and pressure to abstain from substances of abuse. Another reason groups work as a mode of treatment for substance use is that factors associated with substance use, such as depression, isolation, and shame, can be addressed. Great emphasis is placed on interpersonal process within the groups, which helps substance use clients resolve problems in relating to other people, problems that they may have attempted to avoid by means of addictive substances.^a

Defining Therapeutic Group Models in Substance Use Treatment

Five models of groups are used in substance use treatment:

- Psychoeducational groups
- Skills-development groups
- Cognitive-behavioral groups
- Support groups
- Interpersonal process group psychotherapy

Treatment providers routinely use the first four models and various combinations of them. Interpersonal process groups are not widely used because of the extensive training required to lead these groups and also the long duration to complete this type of group. This demands a high level of commitment from both the providers and the clients.^b The major purpose of psychoeducational groups is to create and expand awareness about the behavioral, medical, and psychological consequences of substance use. This type of group is very structured and presents group-specific content. The information presented is designed to have a direct application to the clients' lives to help instill self-awareness. This self-awareness presents options for growth and change, identifies community resources that can assist in the recovery process, and attempts to motivate clients to take action on their own to attend treatment. An example of a psychoeducational group activity would be to have group members read and discuss a handout on the potential physiological effects of alcohol.^c

Skills-development groups are primarily developed from a cognitive-behavioral approach. This approach is most often used in conjunction with psychoeducational elements. The most common type of skills-development group is one that teaches and helps group members develop coping skills. These skills may be directly related to substance use, such as learning refusal skills when offered drugs, or to broader areas in the client's life such as ways to manage anger or anxiety. Many of the skills that people with substance use need to develop are interpersonal in nature, so group therapy is a place for them to practice these skills.^d

Cognitive-behavioral groups identify that the substance use of the individual is a learned behavior that can be modified through various interventions. These interventions include identification of conditioned stimuli associated with the specific addictive behaviors, avoidance of such stimuli, development of enhanced contingency management strategies, and response-desensitization. The cognitive-behavioral group works to change the learned behavior by changing thinking patterns, beliefs, and perceptions (see Modules 1 and 3). The group activities help the individual develop social networks that will help support the individual's recovery. Cognitions developed by psychological elements such as thoughts, beliefs, decisions, opinions, and assumptions are challenged and strategies are learned to change these thought patterns. Cognitive-behavioral groups are most helpful in the beginning stages of recovery.^e

Participation in support groups help members strengthen their ability to manage their thinking and emotions and to develop interpersonal skills by interacting with group members. Group members help each other out by discussing pragmatic concerns members may currently be having. An example of this would be group members coaching an individual on how to manage current triggers of wanting to use substance as a way of coping. These groups are used to improve group members' self-esteem and self-confidence. Group leaders and group members offer words of support and encouragement to each other. Support groups can be found in all stages of substance use treatment. Learning specific recovery tools, such as relapse-prevention skills, can be the basis of forming a substance use support group.^f

Interpersonal process groups use psychodynamics, or knowledge of the way people function psychologically, to promote change in substance use recovery. The psychodynamic approach recognizes that unresolved conflicts in the mind (some that may be out of the person's awareness), may be influencing the person's behavior. Early experiences in the person's life may be influencing the person's substance use. The individual's perceptions may be distorting his or her reality, and behaviors, such as the use of a substance, may be chosen to deal with the situation.^g
