Contents

Preface to the Instructor 14

Acknowledgments 18

Chapter 1 Introduction to Academic Writing 19

1a Why Do Research? 21

1b Learning the Conventions of Academic Writing 22

1c Understanding and Avoiding Plagiarism 23

1d Understanding a Research Assignment 24

Understanding the Terminology 24

1e Establishing a Research Schedule 27

Chapter 2 Topic Selection 29

2a Relating Your Personal Ideas to a Scholarly Problem 31

Connecting Personal Experience to Scholarly Topics 31

Speculating about Your Subject to Discover Ideas and to Focus on the Issues 32

2b Talking with Others to Refine the Topic 36

Personal Interviews and Discussions 36

Online Discussion Groups 37

2c Using Online Searches to Refine Your Topic 37

Using an Online Subject Directory 38

Using an Internet Keyword Search 38

2d Using the Library's Electronic Databases to Find and Narrow a Topic 39

2e Using the Library's Electronic Book Catalog to Find a Topic 40

2f Developing a Thesis Statement, Enthymeme, or Hypothesis 42

2g Drafting a Research Proposal 45

The Short Proposal 45

The Long Proposal 46

Your Research Project 50

Chapter 3 Organizing Ideas and Setting Goals 51

- 3a** Using a Basic Order to Chart the Course of Your Work 51
- 3b** Using Your Research Proposal to Direct Your Notetaking 52
- 3c** Listing Key Terms and Phrases to Set Directions for Notetaking 53
- 3d** Writing a Rough Outline 53
- 3e** Using Questions to Identify Issues 54
- 3f** Setting Goals by Using Organizational Patterns 55
- 3g** Using Approaches across the Curriculum to Chart Your Ideas 56
- 3h** Using Your Thesis to Chart the Direction of Your Research 57
- Your Research Project 59**

Chapter 4 Finding Web-Based Resources 60

- 4a** Beginning an Online Search 61
- 4b** Reading an Online Address 65
- 4c** Using Keyword and Boolean Expressions 66
 - Subject Directory Search Engines 68
 - Robot-Driven Search Engines 68
 - Metasearch Engines 68
 - Specialized Search Engines 69
 - Educational Search Engines 69
 - Educational Search Engines Maintained by Libraries 71
- 4d** Using RSS and Social Bookmarking 72
 - RSS Feeds 72
 - Web 2.0 and Social Bookmarking 73
- 4e** Searching for Articles in Journals and Magazines 74
 - Online Journals 74
 - Online Magazines 75
- 4f** Searching for Articles in Newspapers and Media Sources 75
- 4g** Searching for Photographs and Other Visual Sources 77
- 4h** Accessing E-books 77
- 4i** Using Listserv, Usenet, Blogs, and Chat Groups 78
 - E-mail News Groups 78
 - Real-Time Chatting 78
- 4j** Examining Library Holdings via Online Access 79
- 4k** Finding an Internet Bibliography 79
 - Search Engine 79

- 4l** Conducting Archival Research on the Internet 80
 - Go to the Library 80
 - Go to an Edited Search Engine 80
 - Go to a Metasearch Engine 80
 - Go to a Listserv or Usenet Group 82
 - Utilize Newspaper Archives 82
- Your Research Project 82**

Chapter 5 Using Library Resources 83

- 5a** Launching the Search 83
- 5b** Developing a Working Bibliography 84
- 5c** Finding Books on Your Topic 85
 - Using Your Library's Electronic Book Catalog 86
 - Using the Library's Bibliographies 86
- 5d** Finding Articles in Magazines and Journals 89
 - Searching the General Indexes to Periodicals 89
 - Finding Indexes by Topic in the Appendix 93
 - Readers' Guide to Periodical Literature* 94
 - Social Sciences Index 94
 - Humanities Index 94
 - Searching for an Index to Abstracts 94
 - Searching for Abstracts of Dissertations 96
- 5e** Searching for a Biography 96
 - Biography Index 97
 - Current Biography Yearbook 97
 - Contemporary Authors 97
 - Dictionary of Literary Biography 97
- 5f** Searching for Articles in Newspaper Indexes 97
- 5g** Searching Special Subject Directories 98
- 5h** Searching for Government Documents 99
- 5i** Searching for Essays within Books 100
- Your Research Project 100**

Chapter 6 Conducting Field Research 102

- 6a** Investigating Local Sources 103
 - Interviewing Knowledgeable People 103
 - Writing Letters and Corresponding by E-mail 104

6 Contents

Reading Personal Papers 105

Attending Lectures and Public Addresses 105

6b Investigating Government Documents 106

6c Examining Audiovisual Materials, Television, and Radio 107

6d Conducting a Survey with a Questionnaire 108

6e Conducting Experiments, Tests, and Observation 110

Your Research Project 111

Chapter 7 Plagiarism and How to Avoid It 113

7a Using Sources to Enhance Your Credibility 114

7b Placing Your Work in Its Proper Context 114

7c Understanding Copyright 115

7d Avoiding Plagiarism 116

Common Knowledge 118

Correctly Borrowing from a Source 120

7e Sharing Credit in Collaborative Projects 123

7f Honoring and Crediting Sources in Online Classrooms 123

7g Seeking Permission to Publish Material on Your Website 125

Your Research Project 126

Chapter 8 Reading and Evaluating Sources 127

8a Finding Reliable Sources 127

8b Selecting a Mix of Primary and Secondary Sources 134

8c Evaluating Sources 134

Evaluating the Key Parts of an Article 134

Evaluating the Key Parts of a Book 136

Evaluating the Key Parts of an Internet Article 139

8d Outlining a Source 141

8e Summarizing a Source 141

8f Preparing an Annotated Bibliography 143

8g Preparing a Review of the Literature on a Topic 146

Your Research Project 152

Chapter 9 Developing Outlines and Writing Effective Notes 153

Gathering Printouts, Photocopies, Scanned
Images, and Downloaded Data 153

- 9a** Creating Effective Notes 154
 - Honoring the Conventions of Research Style 154
 - Using a Computer for Notetaking 154
 - 9b** Writing Personal Notes 154
 - 9c** Writing Direct Quotation Notes 156
 - Quoting Primary Sources 157
 - Quoting Secondary Sources 158
 - 9d** Writing Paraphrased Notes 159
 - 9e** Writing Summary Notes 161
 - 9f** Writing Précis Notes 163
 - Use the Précis to Review Briefly an Article or Book 164
 - Use the Précis to Write an Annotated Bibliography 164
 - Use the Précis in a Plot Summary Note 164
 - Use the Précis As the Form for an Abstract 165
 - 9g** Writing Notes from Field Research 166
 - 9h** Creating Outlines Using Academic Models 166
 - A General All-Purpose Model 166
 - Model for Advancing Your Ideas and Theories 167
 - Model for the Analysis of Creative Works 168
 - Model for Argument and Persuasion Papers 168
 - Model for Analysis of History 168
 - Model for a Comparative Study 169
 - 9i** Writing a Formal Outline 170
 - Using Standard Outline Symbols 170
 - Writing a Formal Topic Outline 171
 - Writing a Formal Sentence Outline 171
- Your Research Project 172**

Chapter 10 Drafting the Paper in an Academic Style 174

- 10a** Focusing Your Argument 175
 - Maintaining a Focus on Objective Facts
and Subjective Ideas 176
- 10b** Refining the Thesis Statement 176
 - Using Questions to Focus the Thesis 177
 - Adjust or Change Your Thesis During Research if Necessary 179
- 10c** Writing an Academic Title 180

8 Contents

- 10d** Drafting the Paper from Your Research Journal, Notes, and Computer Files 181
 - Writing from Your Notes 181
 - Writing with Unity and Coherence 183
 - Writing in the Proper Tense 183
 - Using the Language of the Discipline 184
 - Writing in the Third Person 184
 - Writing with the Passive Voice in an Appropriate Manner 186
 - 10e** Using Visuals Effectively in a Research Essay 186
 - File Formats 189
 - 10f** Avoiding Sexist and Biased Language 189
- Your Research Project 191**

Chapter 11 MLA Style: In-Text References 192

- 11a** Blending Reference Citations into Your Text 192
 - Making a General Reference without a Page Number 193
 - Beginning with the Author and Ending with a Page Number 193
 - Putting the Page Number Immediately after the Name 193
 - Putting the Name and Page Number at the End of Borrowed Material 194
- 11b** Citing a Source When No Author Is Listed 194
 - Citing the Title of a Magazine Article 194
 - Citing the Title of a Report 195
 - Citing the Name of a Publisher or a Corporate Body 195
- 11c** Citing Nonprint Sources That Have No Page Number 195
- 11d** Citing Internet Sources 196
 - Identify the Source with Name or Title 196
 - Identify the Nature of the Information and Its Credibility 196
 - Omitting Page and Paragraph Numbers to Internet Citations 197
- 11e** Citing Indirect Sources 198
- 11f** Citing Frequent Page References to the Same Work 200
- 11g** Citing Material from Textbooks and Large Anthologies 201
- 11h** Adding Extra Information to In-Text Citations 202
 - One of Several Volumes 202
 - Two or More Works by the Same Writer 203
 - Several Authors in One Citation 203
 - Additional Information with the Page Number 204

- 11i** Punctuating Citations Properly and Consistently 204
 - Commas and Periods 204
 - Semicolons and Colons 206
 - Question Marks and Exclamation Marks 206
 - Single Quotation Marks 207
- 11j** Indenting Long Quotations 207
- 11k** Citing Poetry 209
 - Quoting Two Lines of Poetry or Less 209
 - Quoting Three Lines of Poetry or More 209
 - Indenting Turnovers for Long Lines of Poetry 210
 - Retaining Internal Quotations within a Block 210
 - Providing Translations 211
- 11l** Handling Quotations from a Play 211
- 11m** Altering Initial Capitals in Quoted Matter 212
- 11n** Omitting Quoted Matter with Ellipsis Points 212
- 11o** Altering Quotations with Parentheses and Brackets 215
 - Parentheses 216
 - Brackets 216
- Your Research Project 217**

Chapter 12 Writing the Introduction, Body, and Conclusion 218

- 12a** Writing the Introduction of the Research Paper 218
 - Provide the Thesis Statement 218
 - Provide the Enthymeme 219
 - Provide a Hypothesis 220
 - Relate to the Well Known 220
 - Provide Background Information 221
 - Review the Literature 221
 - Review the History and Background of the Subject 222
 - Take Exception to Critical Views 222
 - Challenge an Assumption 223
 - Provide a Brief Summary 223
 - Define Key Terms 224
 - Supply Data, Statistics, and Special Evidence 224
- 12b** Writing the Body of the Research Paper 225
 - Organize by Chronology 225

10 Contents

Compare or Contrast Issues, Critical Views, and Literary Characters 227

Develop Cause and Effect 228

Define Your Key Terminology 228

Preface to the Instructor

For decades, this text has been the leader in offering current, detailed guidance about academic research, writing, and documentation. Over the last two decades, the world of academic research has changed dramatically. Most research is now done online, and this new universe of information has not only put an almost unimaginable wealth of new sources at our fingertips, but it has also brought challenges in evaluating the credibility and usefulness of those sources. Questions of academic integrity and unintentional plagiarism have arisen around the integration of electronic sources. This new fifteenth edition of *Writing Research Papers: A Complete Guide* confronts these new challenges and offers clear, detailed guidance to assist student researchers as they struggle to keep pace with online research, electronic publishing, and new documentation formats.

What Is New in This Edition?

- **New “Clear Targets” at the beginning of each chapter** provide students with a list of learning objectives that serve as a ready guide for finding documentation information quickly and that provide students with the key goals of the chapter.
- **New explanations of research techniques** in Chapter 4 show students how to apply cutting-edge tools and strategies in their research, including keyword searches with expanded Boolean operators and social networking sites.
- **Three new student papers** plus a new annotated bibliography provide fresh models of student research work.
- **Updated coverage of APA documentation style** brings students up to speed with the latest revisions especially how to handle electronic source documentation.

Key Features

The world of academic research is changing rapidly, especially with the ascendance of online research. Virtually every college student now writes on a computer and researches online. The fifteenth edition of *Writing Research Papers* continues to offer a wide array of resources to help students successfully plan and execute their research papers.

Help with Digital Research

The digital revolution is so pervasive in research writing today that a single chapter cannot properly encompass the topic. Instead, every chapter of this text has been updated to reflect the current context for academic writing, including the impact of technology on searching for appropriate topics, finding and evaluating source material, gathering notes and drafting the paper, avoiding plagiarism and embracing academic integrity, and, of course, documenting sources. Students are directed step by step through the various formats for documenting online sources and are offered clear, detailed guidance on blending electronic citations into their writing. The most extensive updated content is included in Chapter 4, where explanations are provided about new research techniques using social networking sites and keyword searches with expanded Boolean operators.

Current Documentation Guidelines

Since discipline-specific style guides offer very different methods for documenting sources—particularly electronic sources—depending on the academic field of research, a guide of this sort is vital to students who are responding to writing assignments in a variety of disciplines. To enable students to document sources correctly, this edition includes updated guidelines for the most important documentation formats.

- **Up-to-date coverage of MLA documentation style.** The Modern Language Association (MLA) significantly revised its documentation style for both print and electronic sources in the most recent edition of the *MLA Style Manual and Guide to Scholarly Publishing*, and the *MLA Handbook for Writers of Research Papers*. All sample citations and student papers in Chapters 1 to 14 reflect the current MLA style guides.
- **Revised APA documentation coverage.** The American Psychological Association (APA) also revised its documentation guidelines in the *APA Publication Manual*. All sample citations and student papers in Chapter 15 follow current APA documentation standards.
- **Current standards for CMS style.** The most recent edition of the University of Chicago Press' *Chicago Manual of Style* emphasizes the role of electronic research. All sample citations and student papers in Chapter 16 follow current CMS documentation standards.

Research Tips for Avoiding the Pitfalls of Plagiarism

Chapters 1 to 10 provide at least one “Research Tip,” a feature that offers instruction and examples for citing sources appropriately and ethically, and avoiding plagiarism. Beginning with the section “Understanding and Avoiding Plagiarism,” in Chapter 1, *Writing Research Papers* clearly

explains what plagiarism is and presents strategies students can use to avoid unintentional plagiarism. Moreover, there is a special emphasis on how to blend quotations into academic writing and document Internet sources.

Guidelines for Evaluating Online Sources

Understanding what constitutes an appropriate source for an academic paper is more and more challenging for students, as more and more sources become instantly available online. *Writing Research Papers* assists student researchers in deciding if and when to use familiar search engines such as Google or Yahoo!, and also offers detailed advice on how to find respected scholarly sources—and how to determine whether a source is in fact credible. A checklist, “Evaluating Online Sources,” helps students gauge the quality of online articles.

Student Papers

Student writing examples provide models for student writers of how other students have researched and drafted papers on a wide range of topics. With seven annotated sample papers, more than any other text of this kind, *Writing Research Papers* demonstrates format, documentation, and the different academic styles. Student papers include:

Ashley Irwin, “Sylvia Plath and Her ‘Daddy’” (MLA Style)

Kaci Holz, “Gender Communication” (MLA style)

Caitlin Kelley, “More Academics for the Cost of Less Engaged Children” (APA style)

Clare Grady, “The Space Race: One Small Step—One Giant Leap” (CMS style)

Sarah Bemis, “Diabetes Management: A Delicate Balance” (CSE style)

Sarah Morrison, “Annotated Bibliography: Media Ethics” (MLA style)

Sarah Morrison, “Media Ethics: A Review of the Literature” (MLA style)

Sample abstracts in MLA and APA style are also displayed. Additional sample research papers are available in the *Instructor’s Manual* and *Model Research Papers from across the Curriculum*.

Reference Works by Topic

The list of references in the Appendix, “Finding Reference Works for Your General Topic,” provides a user-friendly list of sources for launching your research project. Arranged into ten general categories, as listed on pages 375–382, the Appendix allows a researcher to have quick access to relevant library books, library databases, and Internet sites.

Accessible, Navigable Design

As in previous editions, *Writing Research Papers* is printed in full color, making information and features easier to find and more pleasing to read, and bringing strong, visual elements to the instruction. Icons identify special features, like the “Where to Look” boxes signaling cross-references.

Additional Resources for Instructors and Students

CourseSmart*. Students can subscribe to *Writing Research Papers*, Fifteenth Edition, as a CourseSmart eText (at www.coursesmart.co.uk). The site includes all of the book’s content in a format that enables students to search the text, bookmark passages, save their own notes, and print assignments that incorporate lecture notes.

Instructor’s Manual

This extensive guide contains chapter-by-chapter classroom exercises, research assignments, quizzes, and duplication masters. Instructors can visit www.pearsonglobaleditions.com/Lester to download a copy of this valuable resource.

*This product may not be available in all markets. For more details, please visit www.coursesmart.co.uk or contact your local Pearson representative.

Acknowledgments

Many key people supported the development of *Writing Research Papers: A Complete Guide*, Fifteenth Edition. I am grateful to the following students for their help and for allowing me to use their work as models in this book: Kaci Holz, Caitlin Kelley, Ashley Irwin, Clare Grady, Sarah Morrison, and Sarah Bemis.

I am of course grateful to the reviewers who provided helpful suggestions for this revision, including Emory Reginald Abbott, Georgia Perimeter College; Stevens R. Amidon, Indiana University-Purdue University Fort Wayne; Crystal Bacon, Community College of Philadelphia; John Christopher Ervin, Western Kentucky University; Morgan Halstead, Malcolm X Community College; Candy A. Henry, Westmoreland County Community College; Joseph Kenyon, Community College of Philadelphia; Mark M. Kessler, Washington State Community College; Paulette Longmore, Essex County College; Anna Maheshwari, Schoolcraft College; Andrew J. Peggman, Cuyahoga Community College, Eastern Campus; Sylvia Y. S. Rippel, Lincoln University; Jeffrey Roessner, Mercyhurst University; and Carrie Tomberlin, Bellevue College.

For editorial assistance that kept us focused, special thanks are extended to the Pearson group, in particular Joe Opiela, Vice President and Publisher for English; Katharine Glynn, Senior Sponsoring Editor; Rebecca Gilpin, Assistant Editor; and Savoula Amanatidis, Project Manager; as well as Electronic Publishing Services Inc.

Heartfelt appreciation is also extended to the members of my family: Martha, Mark, Caleb, Jessica, Peyton, Sarah, and Logan. Their love and patience made this project possible.

JAMES D. LESTER, JR.

Introduction to Academic Writing

Chapter 1 Clear Targets

Communication begins when we make an initial choice to speak or to record our ideas in writing. Regardless of the writer's experience, writing is a demanding process that requires commitment. This chapter charts a direction for your research project:

- Understanding why research is an important method of discovery
- Learning the conventions of academic writing
- Overcoming the pitfalls of plagiarism with proper documentation
- Understanding the terminology of a research assignment
- Establishing a schedule for your research project

The written word—whether it is a history paper, a field report, or a research project—creates a public record of our knowledge, our opinions, and our skill with language; hence, we must strive to make our writing accurate, forceful, and honest.

Discovering a well-focused topic, and more importantly a reason for writing about it, begins the process. Choosing a format, exploring sources through critical reading, and then completing the writing task with grace and style are daunting tasks.

Despite this, writing is an outlet for the inquisitive and creative nature in each of us. Our writing is affected by the richness of our language, by our background and experiences, by our targeted audience, and by the form of expression that we choose. With perceptive enthusiasm for relating detailed concepts and honest insights, we discover the power of our own words. The satisfaction of writing well and relating our understanding to others provides intellectual stimulation and insight into our own beliefs and values.

As a college student, you will find that your writing assignments will extend past personal thoughts and ideas to explore more complex topics. Writing will make you confident in your ability to find information

and present it effectively in all kinds of ways and for all sorts of projects, such as:

- A theme in a first-year composition course on the dangers of social networking sites.
- A paper in history on Herbert Hoover's ineffectual policies for coping with the Great Depression of the early 1930s.
- A report for a physical fitness class on the benefits of ballroom dancing as exercise.
- A sociological field report on free and reduced-cost lunches for school-aged children.
- A brief biographical study of a famous person, such as American agrarian labor leader César Chávez.

All of these papers require some type of “researched writing.” Papers similar to these will be assigned during your first two years of college and increase in frequency in upper-division courses. This book eases the pressure—it shows you how to research “online discussion groups” or “the Great Depression,” and it demonstrates the correct methods for documenting the sources.

We conduct informal research all the time. We examine various models and their options before buying a car, and we check out another person informally before proposing or accepting a first date. We sometimes search online for job listings to find a summer job, or we roam the mall to find a new tennis racket, the right pair of sports shoes, or the latest DVD. Research, then, is not foreign to us. It has become commonplace to use a search engine to explore the Internet for information on any subject—from personal concerns, such as the likely side effects of a prescribed drug, to complex issues, like robotics or acupuncture.

In the classroom, we begin thinking about a serious and systematic activity, one that involves the library, the Internet, or field research. A research paper, like a personal essay, requires you to choose a topic you care about and are willing to invest many hours in thinking about. However, unlike a personal essay, a research paper requires you to develop your ideas by gathering an array of information, reading sources critically, and collecting notes. As you pull your project together, you will continue to express personal ideas, but now they are supported by and based on the collective evidence and opinions of experts on the topic.

Each classroom and each instructor will make different demands on your talents, yet all stipulate *researched writing*. Your research project will advance your theme and provide convincing proof for your inquiry.

- *Researched writing* grows from investigation.
- *Researched writing* establishes a clear purpose.
- *Researched writing* develops analysis for a variety of topics.

Writing Research Papers introduces research as an engaging, sometimes exciting pursuit on several fronts—your personal knowledge, ideas gleaned from printed and electronic sources, and research in the field.

1a Why Do Research?

Instructors ask you to write a research paper for several reasons:

Research Teaches Methods of Discovery. Explanation on a topic prompts you to discover what you know on a topic and what others can teach you. Beyond reading, it often expects you to venture into the field for interviews, observation, and experimentation. The process tests your curiosity as you probe a complex subject. You may not arrive at any final answers or solutions, but you will come to understand the different views on a subject. In your final paper, you will synthesize your ideas and discoveries with the knowledge and opinions of others.

Research Teaches Investigative Skills. A research project requires you to investigate a subject, gain a grasp of its essentials, and disclose your findings. Your success will depend on your negotiating the various sources of information, from reference books in the library to computer databases and from special archival collections to the most recent articles in printed periodicals. The Internet, with its vast quantity of information, will challenge you to find reliable sources. If you conduct research by observation, interviews, surveys, and laboratory experiments, you will discover additional methods of investigation.

Finding material on electronic sources and the Internet, Chapter 4, pages 60–82.

Research Develops Inquiry-Based Techniques. With the guidance of your instructor, you are making inquiry to advance your own knowledge as well as increase the data available for future research by others.

Research Builds Career Skills. Many career fields rely on investigation and inquiry for fact-finding purposes. Researchers work across a broad spectrum of disciplines, including the physical and life sciences of biology, chemistry, and physics. Engineering sciences in the aerospace, computer science, and automotive production fields must rely on past research while forging new manufacturing trends. Social scientists in the fields of economics, sociology, psychology, and political science foster advancements in society through investigative studies. Research professionals are on the cutting edge of scientific and technological developments, and their work leads to new medicines, consumer products, industrial processes, and numerous other developments.

Research Teaches Critical Thinking. As you wade through the evidence on your subject, you will learn to discriminate between useful information and unfounded or ill-conceived comments. Some sources, such as the Internet, will provide timely, reliable material but may also entice you with worthless and undocumented opinions.

Research Teaches Logic. Like a judge in the courtroom, you must make perceptive judgments about the issues surrounding a specific topic. Your decisions, in effect, will be based on the wisdom gained from research

of the subject. Your paper and your readers will rely on your logical response to your reading, observation, interviews, and testing.

Research Teaches the Basic Ingredients of Argument. In most cases, a research paper requires you to make a claim and support it with reasons and evidence. For example, if you argue that “urban sprawl has invited wild animals into our backyards,” you will learn to anticipate challenges to your theory and to defend your assertion with evidence.

Making a claim and establishing a thesis, 2f, pages 42–45.

1b Learning the Conventions of Academic Writing

Researched writing in each discipline follows certain conventions—that is, special forms are required for citing sources and designing pages. These rules make uniform the numerous articles written internationally by millions of scholars. The society of language and literature scholars, the Modern Language Association, has a set of guidelines generally known as MLA style. Similarly, the American Psychological Association has its own APA style. Other groups of scholars prefer a footnote system, while still others use a numbering system. These variations are not meant to confuse; they have evolved within disciplines as the preferred style.

What is important for you, right now, is to determine which documentation style to use. Many composition instructors will ask you to use MLA style, as explained in Chapters 11–14, but they are just as likely to ask for APA style (Chapter 15) if your topic concerns one of the social sciences. In a like manner, your art history instructor might expect the footnote style but could just as easily request the

MLA Style, pages 268–276
 APA Style, pages 307–335
 Chicago (CMS) Style, pages 336–354
 CSE Style, pages 355–374

APA style. Ask your instructor early which style to use and organize accordingly.

Regardless of the research style that you employ, your writing should advance substantive issues and inquiry. Keep in mind three key investigative conventions:

- Analysis** Classify the major issues of your study and provide detailed analysis of each in defense of your thesis.
- Evidence** Provide well-reasoned propositions and statements that are supported by facts, details, and evidence with proper documentation.
- Discussion** Relate the implications of your findings and the merits of the study, whether an author’s poetic techniques, a historical movement, or a social issue.

1c Understanding and Avoiding Plagiarism

The most important convention of academic writing is the principle of giving proper credit to the work of others. **Plagiarism is defined as the act of claiming the words or ideas of another person as your own.** Plagiarism is a serious violation of the ethical standards of academic writing, and most colleges and universities have strict penalties, including academic probation or expulsion, for students who are guilty of plagiarism. Most schools publish an official code of student conduct (sometimes called an academic integrity policy), and you should be familiar with this document as it applies to your research and writing.

Some students will knowingly copy whole passages from outside sources into their work without documentation. Others will buy research papers from online sources or friends. These intentional acts of academic dishonesty are the most blatant forms of plagiarism. *Unintentional plagiarism*, however, is still a violation of academic integrity. Unacknowledged use of another person's sentences, phrases, or terminology is plagiarism, so provide a citation and use quotation marks to show exactly where you are drawing on others' work. Similarly, unacknowledged use of another person's ideas, research, or approach is also plagiarism, so write careful paraphrases.

Understanding and Avoiding Plagiarism, Chapter 7, pages 113–126.

CHECKLIST

Avoiding Unintentional Plagiarism

The following guidelines will help you avoid unintentional plagiarism.

- **Citation.** Let readers know when you borrow from a source by introducing a quotation or paraphrase with the name of its author.
- **Quotation marks.** Enclose within quotation marks all quoted words, phrases, and sentences.
- **Paraphrase.** Provide a citation to indicate the source of a paraphrase just as you do for quotations.
- **Parenthetical citations and notes.** Use one of the academic documentation styles (MLA, APA, CMS, or CSE) to provide specific in-text citations for each source according to the conventions of the discipline in which you are writing.
- **Works cited or references pages.** Provide a complete bibliography entry at the end of your paper for every source you use, conforming to the standards of the documentation style you are using.

1d Understanding a Research Assignment

Beyond selecting an effective subject, you will need a reason for writing the paper. Literature instructors might expect you to make judgments about the structure and poetic techniques of Walt Whitman. Education instructors might ask you to examine the merits of a balanced curriculum for secondary students. History instructors might want you to explore an event—perhaps the tactics and strategies of the abolitionist movement leading up to the American Civil War.

Understanding the Terminology

Assignments in literature, history, and the fine arts will often require you to *evaluate*, *interpret*, and *perform causal analysis*. Assignments in education, psychology, political science, and other social science disciplines will usually require *analysis*, *definition*, *comparison*, or a search for *precedents* leading to a *proposal*. In the sciences, your experiments and testing will usually require a discussion of the *implications* of your findings. The next few pages explain these assignments.

Evaluation

To evaluate, you first need to establish clear criteria of judgment and then explain how the subject meets these criteria. For example, student evaluations of faculty members are based on a set of expressed criteria—an interest in student progress, a thorough knowledge of the subject, and so forth. Similarly, you may be asked to judge the merits of a poem, an art exhibit, or the newest trends in touchscreen cameras. Your first step should be to create your criteria. What makes a good movie? How important is a poem’s form and structure? Is space a special factor in architecture? You cannot expect the sources to provide the final answers; you need to experience the work and make your final judgments on it.

Let’s see how evaluation develops with one student, Sarah Bemis, who was asked to examine diabetes. At first, Sarah worked to define the disease and its basic attack on the human system. However, as she read the literature she shifted her focus from a basic definition to evaluate and examine the methods for controlling diabetes. Her paper, “Diabetes Management: A Delicate Balance,” appears on pages 364–374.

In many ways, every research paper is an evaluation.

Interpretation

To interpret, you must usually answer, “What does it mean?” You may be asked to explain the symbolism in a piece of literature, examine a point of law, or make sense of test results. Questions often point toward interpretation:

What does this passage mean?

What are the implications of these results?

What does this data tell us?

Can you explain your reading of the problem to others?

For example, your instructor might ask you to interpret the 1954 Supreme Court ruling in *Brown v. Board of Education*; interpret results on pond water testing at site A, in a secluded country setting, and site B, near a petrochemical plant; or interpret a scene from Henrik Ibsen's *An Enemy of the People*.

In a paper on Internet dating, one student found herself asking two interpretive questions: What are the social implications of computer dating? and What are the psychological implications?

Definition

Sometimes you will need to provide an extended definition to show that your subject fits into a selected and well-defined category. Note these examples:

1. A low-fat diet reduces the risk of coronary disease.

You will need to define “low-fat” by describing foods that make up a low-fat diet and naming the benefits from this type of diet.

2. Title IX has brought positive changes to college athletic programs.

You will need to define the law in detail and specify the changes.

3. The root cause of breakups in relationships is selfishness.

This topic will require a definition of selfishness and examples of how it weakens relationships.

A good definition usually includes three elements: the subject (low-fat diet); the class to which the subject belongs (diets in general); and the differences between others in this class (low-carb or Atkins). Definition will almost always become a part of your work when some of the terminology is subjective. If you argue, for example, that medical experiments on animals are cruel and inhumane, you may need to define what you mean by *cruel* and explain why *humane* standards should be applied to animals that are not human. Thus, definition might serve as your major thesis.

Definition is also necessary with technical and scientific terminology, as shown by Sarah Bemis in her paper on diabetes. The paper needed a careful, detailed definition of the medical disorder in addition to the methods for managing it. By her inquiry, she reached her conclusion that medication in harmony with diet and exercise were necessary for victims of the disease. Her research paper appears on pages 364–374.

Proposal

A proposal says to the reader, “We should do something.” It often has practical applications, as shown by these examples:

- To maintain academic integrity, college administrators must enact stringent policies and punishments for cheating and plagiarism.
- A chipping mill should not be allowed in our town because its insatiable demand for timber will strip our local forests and ruin the environment.
