About the Author

Richard L. Daft, Ph.D., is the Brownlee O. Currey, Jr, Professor of Management and Principal Senior Lecturer in the Owen Graduate School of Management at Vanderbilt University. Professor Daft specializes in the study of organization theory and leadership. Professor Daft is a Fellow of the Academy of Management and has served on the editorial boards of *Academy of Management Journal*, *Administrative Science Quarterly*, and *Journal of Management Education*. He was the Associate Editor-in-Chief of *Organization Science* and served for three years as Associate Editor of *Administrative Science Quarterly*.

Professor Daft has authored or co-authored 14 books, including *The Executive and the Elephant: A Leader's Guide to Building Inner Excellence* (Jossey-Bass, 2010), *Building Management Skills: An Action-First Approach* (Cengage/South-Western, 2014), *Management* (Cengage/South-Western, 2018), *The Leadership Experience* (Cengage/South-Western, 2018), and *What to Study: Generating and Developing Research Questions* (Sage, 1982). He also published *Fusion Leadership: Unlocking the Subtle Forces That Change People and Organizations* (Berrett-Koehler, 2000) with Robert Lengel. He has authored dozens of scholarly articles, papers, and chapters. His work has been published in *Administrative Science Quarterly*, *Academy of Management Journal*, *Academy of Management Review*, *Organizational Dynamics*, *Strategic Management Journal*, *Journal of Management*, *Accounting Organizations and Society*, *Management Science*, *MIS Quarterly*, *California Management Review*, and *Organizational Behavior Teaching Review*. Professor Daft has been awarded several government research grants to pursue studies of organization design, organizational innovation and change, strategy implementation, and organizational information processing.

Professor Daft is also an active teacher and consultant. He has taught management, leadership, organizational change, organization theory, and organizational behavior. He has been involved in management development and consulting for many companies and government organizations, including the National Academy of Science, Oak Ridge National Laboratory, American Banking Association, AutoZone, Aegis Technology, Bridgestone, Bell Canada, Allstate Insurance, the National Transportation Research Board, the Tennessee Valley Authority (TVA), State Farm Insurance, Tenneco, the U.S. Air Force, the U.S. Army, Eli Lilly, Central Parking System, Entergy Sales and Service, Bristol-Myers Squibb, First American National Bank, and the Vanderbilt University Medical Center.

PART 1 Introduction to Organizations 001

1. Organizations and Organization Design 002

PART 2 Organization Purpose and Structural Design 047

2. Strategy, Organization Design, and Effectiveness 048
3. Fundamentals of Organization Structure 092

PART 3 Open System Design Elements 145

4. The External Environment 146
5. Interorganizational Relationships 184
6. Designing Organizations for the International Environment 222
7. Designs for Societal Impact: Dual-Purpose Organizations, Corporate Sustainability, and Ethics 270

PART 4 Internal Design Elements 313

8. Designs for Manufacturing and Service Technologies 314
9. Designs for Digital Organizations and Big Data Analytics 360
10. Organization Size, Life Cycle, and Decline 402

PART 5 Managing Dynamic Processes 441

11. Organizational Culture and Control 442
12. Innovation and Change 478
13. Decision-Making Processes 526
14. Conflict, Power, and Politics 576

Integrative Cases 621

- 1.0 Disorganization at Semco: Human Resource Practices as a Strategic Advantage 623
- 2.0 Walmart's Failures in Entering Three Developed Markets 633
- 3.0 IKEA: Scandinavian Style 639
- 4.0 Engro Chemical Pakistan Limited—Restructuring the Marketing Division 644
- 5.0 The New York Times Versus Amazon 656
- 6.0 Lean Initiatives and Growth at Orlando Metering Company 661
- 7.0 SCG Lampang: Overcoming Community Resistance to a Sustainability Project (A) 670
- 8.0 Costco: Join the Club 675
- 9.0 The Donor Services Department 679
- 10.0 Cisco Systems: Evolution of Structure 683
- 11.0 ToolTopia.com 689
- 12.0 Sometimes a Simple Change Isn't So Simple 693

PART 1 Introduction to Organizations **001**

Chapter 1: Organizations and Organization Design	002		
A Look Inside General Electric	003		
<i>The Jack Welch Era 1981–2001, 003 • The Jeff Immelt Era 2001–2017, 005 • Events Since 2017, 006</i>			
Organization Design in Action	007		
<i>Topics, 007 • Purpose of This Chapter, 008 • Current Challenges, 009</i>			
BOOKMARK 1.0: The Vanishing American Corporation: Navigating the Hazards of a New Economy	010		
IN PRACTICE: Foot Locker	013		
What Is an Organization?	014		
<i>Definition, 014 • From Multinationals to Nonprofits, 014 • Importance of Organizations, 016</i>			
IN PRACTICE : Zara SA	017		
Dimensions of Organization Design	018		
<i>Structural Dimensions, 018</i>			
		IN PRACTICE: Shizugawa Elementary School Evacuation Center and BP Transocean Deepwater Horizon Oil Rig	020
		<i>Contingency Factors, 020</i>	
		IN PRACTICE: Valve Software	023
		<i>Performance and Effectiveness Outcomes, 023</i>	
		The Evolution of Organization Design	025
		<i>Historical Perspectives, 025</i>	
		HOW DO YOU FIT THE DESIGN? Evolution of Style	027
		<i>It All Depends: Key Contingencies, 028</i>	
		The Contrast of Organic and Mechanistic Designs	029
		The Emerging Bossless Design Trend	032
		IN PRACTICE: Morning Star	033
		Framework for the Book	034
		<i>Levels of Analysis, 034 • Plan of the Book, 035 • Plan of Each Chapter, 035</i>	
		Chapter 1 Workshop: Measuring Dimensions of Organizations	038
		Case for Analysis: Craft Originalities, Inc.	039

PART 2 Organization Purpose and Structural Design **047**

Chapter 2: Strategy, Organization Design, and Effectiveness	048		
<i>Purpose of This Chapter, 050</i>			
The Role of Strategic Direction in Organization Design	050		
IN PRACTICE: The Kroger Company	051		
Organizational Purpose	054		
<i>Strategic Intent, 055</i>			
		BOOKMARK 2.0: Blue Ocean Shift: Beyond Competing; Proven Steps to Inspire Confidence and Seize New Growth	057
		<i>Operating Goals, 058 • Goal Conflict, 060 • The Importance of Goals, 060</i>	
		IN PRACTICE: Wells Fargo	061
		Two Frameworks for Selecting Strategy and Design	063
		<i>Porter's Competitive Strategies, 063</i>	

HOW DO YOU FIT THE DESIGN? Your Strategy/ Performance Strength	065	HOW DO YOU FIT THE DESIGN? The Pleasure/Pain of Working on a Team	106
IN PRACTICE: Allegiant Air	066	<i>Relational Coordination, 106</i>	
<i>Miles and Snow's Strategy Typology, 067 •</i> <i>How Strategies Affect Organization</i> <i>Design, 068 • Other Contingency Factors</i> <i>Affecting Organization Design, 069</i>		IN PRACTICE: Southwest Airlines	107
Assessing Organizational Effectiveness	071	Organization Design Alternatives	108
<i>Definition of Organizational Effectiveness, 071</i> • <i>Who Decides?, 072 • Goal Approach, 073</i> • <i>Resource-Based Approach, 075 • Internal</i> <i>Process Approach, 076</i>		<i>Required Work Activities, 109 • Reporting</i> <i>Relationships, 109 • Departmental Grouping</i> <i>Options, 109</i>	
IN PRACTICE: BNSF Railway	077	Functional, Divisional, and Geographic Designs	111
<i>Strategic Constituents Approach, 077</i>		<i>Functional Structure, 111 • Functional</i> <i>Structure with Horizontal Linkages, 112 •</i> <i>Divisional Structure, 113</i>	
An Integrated Effectiveness Model	079	IN PRACTICE: Google and Alphabet	114
IN PRACTICE: Samsung Group	082	<i>Geographic Structure, 116</i>	
Chapter 2 Workshop: Identify Your Goal Preferences	084	Matrix Structure	118
Case for Analysis: The Addington Gallery of Art	084	<i>Conditions for the Matrix, 119 • Strengths</i> <i>and Weaknesses, 120</i>	
Case for Analysis: Millier Machine Parts & Services	086	IN PRACTICE: Englander Steel	121
Chapter 3: Fundamentals of Organization Structure	92	Virtual Network Structure and Outsourcing	123
<i>Purpose of This Chapter, 94</i>		<i>How the Structure Works, 123 • Strengths</i> <i>and Weaknesses, 124</i>	
Organization Structure	094	Holacracy Team Structure	126
Information-Sharing Perspective on Structure	097	IN PRACTICE: Zappos	128
<i>Centralized Versus Decentralized, 097</i>		<i>Characteristics, 128 • Strengths and</i> <i>Weaknesses, 128</i>	
BOOKMARK 3.0: The Future of Management	098	Applications of Structural Design	130
IN PRACTICE: Toyota	099	<i>Mix and Match, 131 • Structural Alignment,</i> <i>131 • Symptoms of Structural Deficiency, 132</i>	
<i>Vertical Information Sharing, 099</i>		Chapter 3 Workbook: You and Organization Structure	134
<i>Horizontal Information Sharing and</i> <i>Collaboration, 100</i>		Case for Analysis: Holtzclaw Supermarkets, Inc.	134
IN PRACTICE: AT&T WarnerMedia	102	Case for Analysis: Aquarius Advertising Agency	137

PART 3 Open System Design Elements

145

Chapter 4: The External Environment	146	<i>Framework, 156</i>	
<i>Purpose of This Chapter, 147</i>		BOOKMARK 4.0: Confronting Reality: Doing What Matters to Get Things Right	156
The Organization's Environment	148	Adapting to Complexity and Dynamism	158
<i>Task Environment, 148 • General</i> <i>Environment, 150 • International</i> <i>Environment, 151</i>		<i>Adding Positions and Departments, 159 •</i> <i>Building Relationships, 159</i>	
IN PRACTICE: Uber and Didi Chuxing	152	IN PRACTICE: Seton Hall University and Dickinson College	160
The Changing Environment	153	<i>Differentiation and Integration, 162 •</i> <i>Organic Versus Mechanistic Management</i> <i>Processes, 163</i>	
<i>Complexity, 154 • Dynamism, 154</i>			
IN PRACTICE: Gap Inc.	154		

HOW DO YOU FIT THE DESIGN? Mind and Environment, 164	
<i>Planning, Forecasting, and Responsiveness, 165</i>	
Framework for Adapting to Complexity and Dynamism	166
Dependence on Financial Resources	167
Influencing Financial Resources	168
<i>Establishing Formal Relationships, 168</i>	
IN PRACTICE: Publicis and Omnicom	169
<i>Influencing Key Sectors, 171</i>	
IN PRACTICE: Amazon and Walmart	171
Organization–Environment Integrative Framework	174
Chapter 4 Workshop: Organizations You Rely On	176
Case for Analysis: CPI Corporation	176
Case for Analysis: Farrington Medical Devices	177
Chapter 5: Interorganizational Relationships	184
<i>Purpose of This Chapter, 186</i>	
Organizational Ecosystems	186
<i>Is Competition Dead?, 187</i>	
IN PRACTICE: Apple and Samsung	189
<i>The Changing Role of Management, 189</i>	
• <i>Interorganizational Framework, 191</i>	
Resource Dependence	192
<i>Types of Resource-Dependence Relationships, 192</i>	
• <i>Power Implications, 194</i>	
IN PRACTICE: JPMorgan Chase and Amazon	195
Collaborative Networks	195
HOW DO YOU FIT THE DESIGN? Personal Networking	196
<i>Why Collaboration?, 197</i>	
IN PRACTICE: Accelerating Medicines Partnership	198
<i>From Adversaries to Partners, 198</i>	
BOOKMARK 5.0: Managing Strategic Relationships: The Key to Business Success	200
Population Ecology	201
IN PRACTICE: Blockbuster	202
<i>What Hinders Adaptation?, 202</i>	
IN PRACTICE: LVMH Moët Hennessy Louis Vuitton	202
<i>Organizational Form and Niche, 203</i>	
• <i>Process of Ecological Change, 204</i>	
• <i>Strategies for Survival, 205</i>	
Institutionalism	207
<i>The Institutional View and Organization Design, 207</i>	
• <i>Institutional Similarity, 208</i>	
Chapter 5 Workshop: The Shamatosi	212
Case for Analysis: Technomagia and AUD	214
Case for Analysis: Bradford Chemicals Company	215
Chapter 6: Designing Organizations for the International Environment	222
<i>Purpose of This Chapter, 224</i>	
Entering the Global Arena	224
<i>Motivations for Global Expansion, 225</i>	
BOOKMARK 6.0: The World Is Flat: A Brief History of the Twenty-First Century	225
IN PRACTICE: Amway	227
<i>Managing the Stages of International Development, 229</i>	
HOW DO YOU FIT THE DESIGN? What Is Your Cultural Intelligence?	231
<i>Global Expansion Through International Alliances and Acquisitions, 232</i>	
IN PRACTICE: Walmart and Flipkart	233
The Challenges of Global Design	234
<i>Increased Complexity and Differentiation, 235</i>	
• <i>Increased Need for Coordination, 236</i>	
• <i>Transfer of Knowledge and Reverse Innovation, 237</i>	
Designing Structure to Fit Global Strategy	239
<i>Strategies for Global Versus Local Opportunities, 239</i>	
IN PRACTICE: General Electric	242
<i>International Division, 243</i>	
• <i>Global Product Division Structure, 243</i>	
• <i>Global Geographic Division Structure, 245</i>	
IN PRACTICE: Colgate-Palmolive Company	246
<i>Global Matrix Structure, 247</i>	
IN PRACTICE: ABB Group	248
Additional Global Coordination Mechanisms	250
<i>Global Teams, 250</i>	
IN PRACTICE: L'Oréal	251
<i>Headquarters Planning, 252</i>	
• <i>Expanded Coordination Roles, 252</i>	
• <i>Benefits of Coordination, 253</i>	
The Transnational Model of Organization	254
Chapter 6 Workshop: Made in the U.S.A.?	259
Case for Analysis: Halogen Analytics	260
Case for Analysis: Rhinebeck Industrial	261

Chapter 7: Designs for Societal Impact: Dual-Purpose Organizations, Corporate Sustainability, and Ethics	270	The Consequences for Doing Good	290
<i>Purpose of This Chapter</i> , 272		Designing a Structure for Executing a Sustainability Program	291
Designing the Dual-Purpose Organization	272	<i>A Separate Department or Include Everyone?</i> , 292 • <i>Involve External Stakeholders</i> , 293 • <i>Set Goals, Measure, and Reward</i> , 294	
<i>Facing the Challenge</i> , 274 • <i>Designs for Achieving Dual Commercial and Social Welfare Goals</i> , 276		HOW DO YOU FIT THE DESIGN? How Sustainable are You?	296
IN PRACTICE: Grameen Veolia Water	278	Designs to Uphold Ethical Values	297
Corporate Social Responsibility	281	<i>Sources of Individual Ethical Principles</i> , 297 • <i>Organizational Ethics</i> , 298 • <i>Formal Structure and Systems</i> , 299	
<i>The Green Movement</i> , 282 • <i>The Triple Bottom Line</i> , 283		IN PRACTICE: Google	302
IN PRACTICE: Gravity Payments	284	Corporate Ethics in a Global Environment	303
<i>Conscious Capitalism</i> , 285		Chapter 7 Workshop: What is Your Level of Ethical Maturity?	305
BOOKMARK 7.0: Conscious Capitalism: Liberating the Heroic Spirit of Business	285	Case for Analysis: Solo: Helping a Million People See Again	305
<i>Serving Organizational Stakeholders</i> , 286 • <i>Serving the Bottom of the Pyramid</i> , 288		Case for Analysis: Fiedler, Phillips & Wilson Design	307
IN PRACTICE: Godrej & Boyce	289		

PART 4 Internal Design Elements

313

Chapter 8: Designs for Manufacturing and Service Technologies	314	IN PRACTICE: Memorial Sloan-Kettering Cancer Center	341
<i>Purpose of This Chapter</i> , 317		Workflow Interdependence Among Departments	343
Core Manufacturing Technology	318	<i>Types</i> , 343	
<i>Manufacturing Firms</i> , 318 • <i>Strategy, Technology, and Performance</i> , 320 • <i>The Smart Factory</i> , 321 • <i>Mass Customization</i> , 323 • <i>Performance and Structural Implications</i> , 324		IN PRACTICE: Southwest Airlines	346
Surviving Extremely Complex Technologies	326	<i>Structural Priority</i> , 347 • <i>Structural Implications</i> , 347	
<i>Extreme Technology Complexity</i> , 326		IN PRACTICE: Athletic Teams	348
IN PRACTICE: Carnival Cruise Lines	327	Chapter 8 Workshop: Small Business Workflow Technology	350
BOOKMARK 8.0: Meltdown: Why Our Systems Fail and What We Can Do About It	327	Case for Analysis: Acetate Department	351
<i>High Reliability Organizing</i> , 328		Case for Analysis: Digitalization in the Manufacturing Sector: Skills in Transition	354
Core Service Technology	331	Chapter 9: Designs for Digital Organizations and Big Data Analytics	360
<i>Service Firms</i> , 331		<i>Purpose of This Chapter</i> , 362	
HOW DO YOU FIT THE DESIGN?: Manufacturing Versus Service	333	The Digital Information Explosion	362
IN PRACTICE: Panera Bread Company	335	Pipes versus Platforms: A New Organization Form	365
<i>Designing the Service Organization</i> , 335		<i>Two Types</i> , 367 • <i>Foundational Assumptions</i> , 367	
IN PRACTICE: Home Depot Inc.	336	IN PRACTICE: Uber	369
Noncore Departmental Technology	337	<i>Platform Design Recommendations</i> , 370	
<i>Variety</i> , 338 • <i>Analyzability</i> , 338 • <i>Framework</i> , 338 • <i>Department Design</i> , 340		Big Data Analytics	372
		IN PRACTICE: Siemens Gamesa	373
		<i>Big Data Requirements</i> , 373	

BOOKMARK 9.0: Astroball: The New Way to Win It All <i>Big Data and Organization Structure, 376</i>	376	Organizational Life Cycle <i>Stages of Life-Cycle Development, 410</i>	410
IN PRACTICE: Morgan Stanley	378	IN PRACTICE: Airbnb <i>Organizational Characteristics During the Life Cycle, 414</i>	413
Artificial Intelligence	380	Organizational Size, Bureaucracy, and Control <i>What Is Bureaucracy?, 415</i>	415
<i>Is AI an Objective Decision Maker?, 381 • Is Nudge Management Going to Be Your Coach?, 383 • Algorithmic Control May Be Your New Boss, 383 • AI Implications for Organization Design, 385</i>		IN PRACTICE: United Parcel Service (UPS) <i>Size and Structural Control, 418</i>	417
HOW DO YOU FIT THE DESIGN? How Will You Handle Decentralization and Autonomy?	386	Bureaucracy in a Changing World	420
Other Digital Applications in Organizations <i>Social Network Analysis, 387</i>	387	BOOKMARK 10.0: The Conversational Firm: Rethinking Bureaucracy in the Age of Social Media <i>Organizing Temporary Systems, 421</i>	420
IN PRACTICE: Exploration and Production Division <i>Knowledge Management, 389</i>	387	IN PRACTICE: Salvation Army <i>Other Approaches to Busting Bureaucracy, 423</i>	422
IN PRACTICE: BAE Systems	390	Bureaucracy and Other Forms of Control <i>Bureaucratic Control, 425</i>	424
Digital Impact on Organization Design	392	IN PRACTICE: East Resources Inc. and Royal Dutch Shell PLC <i>Market Control, 427 • Clan Control, 427</i>	426
Chapter 9 Workshop: Manufacturing and Big Data: Organize the Project	394	IN PRACTICE: Valve Corporation and FAVI	428
Case for Analysis: Hermitage Escalator Company	395	Organizational Decline <i>Definition and Causes, 430</i>	429
Chapter 10: Organization Size, Life Cycle, and Decline	402	IN PRACTICE: Eastman Kodak <i>A Model of Decline Stages, 431</i>	431
<i>Purpose of This Chapter, 404</i>		Chapter 10 Workshop: Classroom Control	434
Organization Size: Is Bigger Better? <i>Pressures for Growth, 404 • Dilemmas of Large Size, 405</i>	404	Case for Analysis: Yahoo!: “Get to Work!”	434
HOW DO YOU FIT THE DESIGN? What Size Organization For You?	407	Case for Analysis: Bachmeyer Foods, Inc.	435
IN PRACTICE: Dell Inc.	409		

PART 5

Managing Dynamic Processes 441

Chapter 11: Organizational Culture and Control	442	Culture Strength and Organizational Subcultures	456
<i>Purpose of This Chapter, 444</i>		IN PRACTICE: Pitney Bowes Credit Corporation	457
Organizational Culture	444	BOOKMARK 11.0: Rule Makers, Rule Breakers: How Tight and Loose Cultures Wire Our World	458
<i>What Is Culture?, 445 • Emergence and Purpose of Culture, 446</i>		Culture and Performance	459
IN PRACTICE: Google	446	The Cultural Focus of Control Systems <i>The Changing Philosophy of Control, 461 • Feedback Control Model, 463 • Organization Level: The Balanced Scorecard, 465 • Department Level: Behavior Versus Outcome Control, 468</i>	461
<i>Interpreting/Shaping Culture, 447</i>		Chapter 11 Workshop: Balanced Scorecard Exercise	471
Culture and Organization Design <i>The Adaptability Culture, 453 • The Achievement Culture, 453</i>	451	Case for Analysis: Midwest Controls, Inc.	472
IN PRACTICE: Huawei	453	Case for Analysis: NASCAR	473
<i>The Clan Culture, 454 • The Bureaucratic Culture, 454</i>			
HOW DO YOU FIT THE DESIGN? Corporate Culture Preference	455		

Chapter 12: Innovation and Change	478		
<i>Purpose of This Chapter</i> , 480			
The Strategic Role of Innovation	480		
<i>Innovate or Be Disrupted</i> , 480			
IN PRACTICE: Netflix	481		
<i>Strategic Types of Innovation</i> , 482			
Elements for Successful Change	484		
Technology Innovation	487		
HOW DO YOU FIT THE DESIGN? Are You Innovative?	488		
<i>The Ambidextrous Approach</i> , 488 • <i>The Bottom-Up Approach</i> , 489 • <i>Techniques for Encouraging Technology Change</i> , 490			
BOOKMARK 12.0: Creativity, Inc.: Overcoming the Unseen Forces That Stand in the Way of True Inspiration	492		
New Products and Services	494		
IN PRACTICE: Eltek Manufacturing	494		
<i>New Product Success Rate</i> , 495 • <i>Reasons for New Product Success</i> , 496 • <i>Horizontal Coordination Model</i> , 497			
IN PRACTICE: Corning, Inc.	498		
<i>Open Innovation and Crowdsourcing</i> , 499 • <i>The Need for Speed</i> , 500			
Strategy and Structure Change	501		
<i>The Dual-Core Approach</i> , 502 • <i>Organization Design for Implementing New Management Processes</i> , 502			
IN PRACTICE: GlaxoSmithKline	504		
Culture Change	504		
<i>Forces for Culture Change</i> , 505			
IN PRACTICE: Taco Bell	506		
<i>Culture Change Interventions</i> , 507			
IN PRACTICE: UnitedHealth Group	508		
Tactics for Implementing Change	509		
<i>Leadership for Change</i> , 509 • <i>Techniques for Implementation</i> , 510 • <i>Techniques for Overcoming Resistance</i> , 511			
Chapter 12 Workshop: Innovation Climate	514		
Case for Analysis: Fabulous Footwear	515		
Case for Analysis: Lamprey, Inc.	519		
Chapter 13: Decision-Making Processes	526		
<i>Purpose of This Chapter</i> , 528			
Types of Decisions	528		
IN PRACTICE: Twitter	529		
Individual Decision Making	531		
<i>Rational Approach</i> , 531			
		IN PRACTICE: Veracruz Consulting	534
		<i>Bounded Rationality Perspective</i> , 535	
		HOW DO YOU FIT THE DESIGN? Making Important Decisions	537
		BOOKMARK 13.0: Blink: The Power of Thinking Without Thinking	539
		Cognitive Biases	540
		<i>Specific Biases That May Influence Decision Making</i> , 542 • <i>Overcoming Cognitive Biases</i> , 543	
		Organizational Decision Making	545
		<i>Management Science Approach</i> , 545 • <i>Carnegie Model</i> , 547	
		IN PRACTICE: The New York Times	548
		<i>Incremental Decision Model</i> , 550	
		IN PRACTICE: The Los Angeles Rams	550
		Organizational Decisions and Change	554
		<i>Combining the Incremental and Carnegie Models</i> , 554 • <i>Garbage Can Model</i> , 555	
		IN PRACTICE: Volkswagen	558
		Contingency Decision-Making Framework	560
		<i>Problem Consensus</i> , 560 • <i>Technical Knowledge about Solutions</i> , 561 • <i>Contingency Framework</i> , 561	
		Special Decision Circumstances	564
		<i>High-Velocity Environments</i> , 564 • <i>Decision Mistakes and Learning</i> , 565	
		Chapter 13 Workshop: Style of Decision Making	568
		Case for Analysis: Government DTS	568
		Case for Analysis: Dubois French Eatery	570
		Chapter 14: Conflict, Power, and Politics	576
		<i>Purpose of This Chapter</i> , 578	
		Interdepartmental Conflict in Organizations	578
		<i>Sources of Conflict</i> , 580	
		IN PRACTICE: National Rifle Association (NRA)	582
		<i>Rational Versus Political Model</i> , 582 • <i>Tactics for Enhancing Collaboration</i> , 584	
		IN PRACTICE: The Freaky Friday Management Technique	586
		Power and Organizations	588
		<i>Individual Versus Organizational Power</i> , 588 • <i>Power Versus Authority</i> , 589 • <i>Vertical Sources of Power</i> , 590	
		IN PRACTICE: Jay Bower, Crossbow Group	593
		<i>The Power of Empowerment</i> , 594 • <i>Horizontal Sources of Power</i> , 594	

IN PRACTICE: International Alliance of Theatrical Stage Employees	597	<i>Tactics for Increasing Power, 605 • Political Tactics for Using Power, 606</i>	
Political Processes in Organizations	600	IN PRACTICE: The Vatican	607

My vision for the Thirteenth Edition of *Organization Theory and Design* is to integrate current organization design problems with significant ideas and theories in a way that is engaging and enjoyable for students. The biggest changes in the world of organizations are the emergence of large digital, platform-based organizations and the increasing focus in corporate America on the issues of social welfare and sustainability. A new chapter in this edition gives students the chance to learn about the design of dual-purpose organizations that combine profit-seeking and social welfare goals to provide self-sustaining social benefits to society. In addition, the chapter covering information technology has been completely revised to look at the exciting development of new platform-based digital organizations, including companies such as Uber, Airbnb, Facebook, and YouTube, and the increasing digitalization of traditional organizations. An important change to the Thirteenth Edition is a “Remember This” section at the end of each major section in a chapter that reviews the key ideas and concepts covered in that section. Other significant elements of this edition include “Managing by Design Questions” and “How Do You Fit the Design?” boxes, along with updates to every chapter that incorporate the most recent ideas, new case examples, new book reviews, and new end-of-book integrative cases. The research and theories in the field of organization studies are rich and insightful and will help students and managers understand their organizational world and solve real-life problems. My mission is to combine the concepts and models from organization theory with changing events in the real world to provide the most up-to-date view of organization design available.

Distinguishing Features of the Thirteenth Edition

Many students in a typical organization theory course do not have extensive work experience, especially at the middle and upper levels, where organization theory is most applicable. Moreover, word from the field is that many students today often do not read lengthy chapter opening examples or boxed examples, preferring instead to focus on chapter content. To engage students in the world of organizations, the Thirteenth Edition uses “Managing by Design Questions” at the start of each chapter. These questions immediately engage students in thinking and expressing their beliefs and opinions about organization design concepts. Another in-chapter feature, “How Do You Fit the Design?” engages students in how their personal style and approach will fit into an organization. Other experiential activities that engage students in applying chapter concepts include new “BookMarks,” new “In Practice” examples, new end-of-chapter cases, and new integrative cases for student analysis. The total set of features substantially expands and improves the book’s content and accessibility. These multiple pedagogical devices are used to enhance student involvement in text materials.

New Chapters. Two chapters in the Thirteenth Edition contain virtually all new material. Chapter 7 introduces students to the design of a new organizational form called a dual-purpose or hybrid organization that combines profit-seeking and social welfare goals to provide self-sustaining social benefits to society. Chapter 7 also discusses the design issues associated with an increasing corporate focus on corporate social responsibility and sustainability. In addition, Chapter 9 (Chapter 8 in the previous edition) has been completely revised to explain the emerging platform-based organization form, including companies such as Facebook, YouTube, Uber, and Airbnb, and the increasing digitalization of traditional industrial organizations, such as GE and Siemens.

How Do You Fit the Design? The “How Do You Fit the Design?” feature presents a short questionnaire in each chapter about the student’s own style and preferences, to quickly provide feedback about how they fit particular organizations or situations. For example, questionnaire topics include “What Is Your Cultural Intelligence?” “Your Strategy Strength,” “How Sustainable Are You?” “Are You Ready to Fill an International Role?” “How Will You Handle Decentralization and Autonomy?” “Corporate Culture Preference,” “Making Important Decisions,” and “Personal Networking.” These short feedback questionnaires connect the student’s personal preferences to chapter material to heighten interest and show the relevance of chapter concepts.

Managing by Design Questions. Each chapter opens with three short opinion questions that engage students in clarifying their thoughts about upcoming material and concepts. These questions are based on the idea that when students express their opinions first, they are more open to and interested in receiving material that is relevant to the questions. Example questions, which ask students to agree or disagree, include:

A certain amount of conflict is good for an organization.

The best measures of business performance are financial.

Artificial intelligence is objective and bias-free compared to human decision making in organizations.

Platform-based organizations are a new form of organization, but the fundamental assumptions are the same as for a traditional industrial organization.

A CEO’s top priority is to make sure the organization is designed correctly.

Managers should use the most objective, rational process possible when making a decision.

As a follow-up to the three “Managing by Design” questions, each chapter contains three “Assess Your Answer” inserts that allow students to compare their original opinions with the “correct” or most appropriate answers based on chapter concepts. Students learn whether their mental models and beliefs about organizations align with the world of organizations.

Opening Examples. Following the Managing by Design questions, each chapter’s text begins with a brief, interesting example, often involving a problem or a sticky situation, that gets students thinking about how the chapter topics apply in the real world of organizations. Chapter 1 begins with a longer opening case about GE’s successes and difficulties and the relevance of each chapter’s content to GE’s

issues. Nine of the 14 chapters are introduced by new real-life examples, including Waymo's self-driving cars, the U.S. Marine Corps Rifle Squads, Patagonia, and the Coca-Cola Company.

BookMarks. “BookMarks” are short book reviews that reflect current issues of concern for managers working in real-life organizations. These reviews, which represent a unique feature of this text, describe the varied ways companies are dealing with the challenges of today's changing environment. New “BookMarks” in the Thirteenth Edition include *The Vanishing American Corporation: Navigating the Hazards of a New Economy*, *Meltdown: Why Our Systems Fail and What We Can Do About It*, *The Conversational Firm: Rethinking Bureaucracy in the Age of Social Media*, *Astrobball: The New Way to Win It All*, *Blue Ocean Shift: Beyond Competing*, and *Rule Makers, Rule Breakers: How Tight and Loose Cultures Wire Our World*.

In Practice. This edition contains many new “In Practice” examples that illustrate theoretical concepts in organizational settings. Many examples are international, and all are based on real organizations. There are 38 new “In Practice” cases used within chapters, including Uber and Didi Chuxing, Grameen Veolia Water, Warner Media, LVMH Moët Hennessy Louis Vuitton, the Los Angeles Rams, Google and Alphabet, Netflix, Panera Bread Company, Inditex S.A.'s Zara, BAE Systems, Twitter, Volkswagen, Siemens Gamesa, Wells Fargo, Morgan Stanley, Huawei, and the National Rifle Association. “In Practice” examples that have been retained from the previous edition with substantial updating include Amazon Versus Walmart, Carnival Cruise Lines, Omnicom and Publicis, Taco Bell, Allegiant Air, and Apple and Samsung.

Manager's Briefcase. Located in the chapter margins, this feature tells students how to use concepts to analyze cases and manage organizations.

Text Exhibits. Frequent exhibits are used to help students visualize organizational relationships, and the artwork has been designed to clearly communicate chapter concepts.

Remember This. At the end of each major section of a chapter is a “Remember This” bullet-point summary of the key ideas and concepts discussed in that section. The “Remember This” feature gives students a convenient way to review the essential points covered in each major section of the chapter.

Case for Analysis. These cases are tailored to chapter concepts and provide a vehicle for student analysis and discussion. New cases for analysis include “Solo Eyewear,” “Craft Originalities Inc.,” “Hermitage Escalator Company,” “Fiedler, Philips & Wilson Design,” and “Digitalization in the Manufacturing Sector: Skills in Transition.”

Integrative Cases. The integrative cases at the end of the text have been expanded and positioned to encourage student discussion and involvement. The new cases include *The New York Times Versus Amazon*, *Lampang: Overcoming Community Resistance to a Sustainability Project*, *Walmart's Failures in Entering*

Three Developed Markets, and ToolTopia.com. Previous cases that have been substantially revised and updated include Cisco Systems: Evolution of Structure, Costco: Join the Club, and IKEA: Scandinavian Style.

New Concepts

The Thirteenth Edition contains an exceptional amount of new content. A new chapter looks at *dual-purpose organizations* that combine profit-seeking and social welfare goals, outlining designs for managing *mission drift* and the inherent goal conflict in these companies. This chapter also includes a significant consideration of designs for corporate sustainability and corporate social responsibility, including CSR, ESG, the triple bottom line, conscious capitalism, and the bottom of the pyramid concept. The chapter dealing with information technology has been completely revised to include new *platform-based digital organization designs*, the impact of *artificial intelligence* on organization design and management systems, and the trend toward *digitalization* of all organizations.

Other concepts that have been added or expanded in the Thirteenth Edition include the *Internet of Things* and its impact on big data analytics, a new form of control over employees called *algorithmic control*, the use of *nudge management* for influencing employees, the trend toward *bossless organization designs* and a new design called the *holacracy team structure*, new material on overly complex technologies and *high reliability organizations*, *cultural intelligence*, *reverse innovation*, the trend toward *glocalization*, decision fallacies and *cognitive biases*, designing a *high-performance culture*, *SWOT analysis*, *scenario planning*, and *hard versus soft power*.

Chapter Organization

Each chapter is highly focused and is organized into a logical framework. Many organization theory textbooks treat material in sequential fashion, such as “Here’s View A, Here’s View B, Here’s View C,” and so on. *Organization Theory and Design* shows how they apply in organizations. Moreover, each chapter sticks to the essential point. Students are not introduced to extraneous material or confusing methodological squabbles that occur among organizational researchers. The body of research in most areas points to a major trend, which is reported here. Several chapters develop a framework that organizes major ideas into an overall scheme.

This book has been extensively tested on students. Feedback from students and faculty members has been used in the revision. The combination of organization theory concepts, book reviews, examples of leading organizations, self-insight questionnaires, case illustrations, experiential exercises, and other teaching devices is designed to meet student learning needs, and students have responded favorably.

Supplements

Instructor Companion Website. Access important teaching resources on the companion website. For your convenience, you can download electronic versions of the instructor supplements at the password-protected section of the site, including the Instructor’s Manual, Test Bank, and PowerPoint presentations.

To access these additional course materials and companion resources, please visit www.cengagebrain.com. At the CengageBrain.com home page, search for the ISBN of your title (from the back cover of your book) using the search box at the top of the page. This will take you to the product page where free companion resources can be found.

Instructor’s Manual. The Instructor’s Manual contains chapter overviews, chapter outlines, lecture enhancements, discussion questions, discussion of activities, discussion of chapter cases, and case notes for integrative cases.

Cognero Test Bank. The Cognero Test Bank contains easy-to-use test creation software. Instructors can add or edit questions, instructions, and answers and can select questions (randomly or numerically) by previewing them on the screen. Instructors can also create and administer quizzes online.

PowerPoint Lecture Presentation. The PowerPoint Lecture Presentation enables instructors to customize their own multimedia classroom presentations. Prepared in conjunction with the text and instructor’s resource guide, the package contains approximately 150 slides. It includes exhibits from the text as well as outside materials to supplement chapter concepts. Material is organized by chapter and can be modified or expanded for individual classroom use.

Acknowledgments

Textbook writing is a team enterprise. The Thirteenth Edition has integrated ideas and hard work from many people to whom I am grateful. Reviewers and focus group participants made an especially important contribution. They praised many features, were critical of things that didn’t work well, and offered valuable suggestions.

Among my professional colleagues, I am grateful to my friends and colleagues at Vanderbilt’s Owen School—Bruce Barry, Ranga Ramanujam, Bart Victor, and Tim Vogus—for their intellectual stimulation and feedback. I also owe a special debt to Dean Eric Johnson and Associate Dean Richard Willis for providing the time and resources for me to stay current on the organization design literature and develop the revisions for the text.

I want to extend special thanks to my editorial associate, Pat Lane. She skillfully wrote materials on a variety of topics and special features, found resources, and did an outstanding job with the copyedited manuscript and page proofs. Pat’s personal enthusiasm and care for the content of this text enabled the Thirteenth

Edition to continue its high level of excellence. I also thank DeeGee Lester for her work drafting new end-of-chapter and integrative cases. DeeGee's creative writing skills brought to life key organizational issues that students will enjoy discussing and solving.

The team at Cengage also deserves special mention. Mike Giffen, Senior Product Manager, gave his administrative support, encouragement, and ideas for improvement to this new edition. Julia Chase, Senior Content Manager, managed the production of the new edition superbly and made multiple insightful suggestions along the way for content improvement. Courtney Wolstoncroft, Learning Designer, and Carol Moore, Subject Matter Expert, offered expert advice for enhancing student learning opportunities. Joseph Malcolm, Senior Project Manager, provided superb project coordination and applied his creativity and management skills to facilitate the book's on-time completion. Audrey Wyrick, Marketing Manager, and Alexis Cortez, Marketing Coordinator, offered additional support, creativity, and valuable market expertise.

Finally, I want to acknowledge the love and support of my daughters, Danielle, Amy, Roxanne, Solange, and Elizabeth, and my newest grandchildren, Nelson and Samantha, Reed and Brielle, Phoenix and Roman, who make my life special during our precious times together.

Learning Objectives

After reading this chapter you should be able to:

1. Discuss current challenges that organizations face.
2. Describe the importance of organizations in society.
3. Describe how the structural dimensions of organizations are shaped by contingencies organizations face.
4. Outline the evolution of organizational design.
5. Compare and contrast organic and mechanistic organization designs, including the contingency factors typically associated with each.
6. Explain the current trend toward bossless organization design.

Chapter Outline

A Look Inside General Electric

The Jack Welch Era 1981–2001 • The Jeff Immelt Era 2001–2017 • Events Since 2017

Organization Design in Action

Topics • Purpose of This Chapter • Current Challenges

What Is an Organization?

Definition • From Multinationals to Nonprofits
• Importance of Organizations

Dimensions of Organization Design

Structural Dimensions • Contingency Factors
• Performance and Effectiveness Outcomes

The Evolution of Organization Design

Historical Perspectives • It All Depends: Key Contingencies

The Contrast of Organic and Mechanistic Designs

The Emerging Bossless Design Trend

Framework for the Book

Levels of Analysis • Plan of the Book • Plan of Each Chapter

Before reading this chapter, please check whether you agree or disagree with each of the following statements:

1 An organization can be understood primarily by understanding the people who make it up.

I AGREE _____

I DISAGREE _____

2 The primary role of managers in business organizations is to achieve maximum efficiency.

I AGREE _____

I DISAGREE _____

3 A CEO's top priority is to make sure the organization is designed correctly.

I AGREE _____

I DISAGREE _____

**MANAGING
BY DESIGN
QUESTIONS**

1.1 A Look Inside General Electric

General Electric (GE) has a glorious heritage. Founded by Thomas Edison in 1878 to generate and distribute electric power, GE became a world leader as a diversified industrial company. For decades, GE had a reputation for excellent and innovative management practices that other companies copied. As a model industrial company, General Electric's stock had been part of the Dow Jones Industrial Average since 1907.

Since the late 1800s, GE moved in and out of multiple businesses as a key part of its strategy and success. In 2019, GE was still a diversified worldwide conglomerate. Its industrial businesses included the power segment (gas and steam power systems), renewable energy (wind turbines), oil and gas (drilling systems), aviation (jet engines), healthcare (MRI machines), transportation (locomotives), and capital (loans to buy equipment).

However, by 2019 GE's value had fallen precipitously from its earlier prosperity, hitting a low of about 10 percent of its former value. How could a company that rose to fame as the best managed company in the world fall on such hard times? The answer to GE's ups and downs lies partly with how its leaders used organization design.

Reginald Jones was CEO from 1972 to 1981 and helped build GE's sophisticated strategic planning system. The GE conglomerate was composed of 43 autonomous businesses, within which it had 10 groups, 46 divisions, and 190 departments that participated in strategic planning. To help manage the massive amounts of paperwork and information required from 43 strategic plans, GE added a management layer to its structure to oversee sectors or groupings of businesses and reduce the load on top management. GE was a respected and highly successful company, and paperwork and bureaucracy seemed to increase along with organization size and complexity.

1.1a The Jack Welch Era 1981–2001

When he was hired as an engineer at GE in the early 1960s, Jack Welch hated the company's bureaucracy so much that he submitted his resignation after only six months on the job. Fortunately for GE, Welch's boss convinced him to stay and

make a difference. After rising to CEO, Welch was quick to begin busting the ever-growing GE bureaucracy. Near the end of his two-decade run as CEO, in 2001, *Fortune* magazine named Welch “Manager of the Century” to recognize his astonishing record at GE and also named GE the “Most Admired Company in the United States.” What changes did Welch and GE managers make to achieve these accolades?

Strategy Changes. GE had begun using the advertising slogan “We bring good things to life” in the late 1970s and it continued in the Welch era, with Welch maintaining the strategy of being a conglomerate of diverse businesses. But Welch added a new key objective: each business must become the No. 1 or No. 2 competitor in its industry or risk being cut. GE’s new strategy was to be a leader in each of its industries.

Changes in Structure. Welch attacked the bureaucratic layers within GE by first eliminating the sector level of management hierarchy that Reginald Jones created. He continued to fight the over-managed hierarchy until the number of levels was reduced from nine to as few as four. In many cases, department managers, sub-sector managers, unit managers, and sometimes supervisors were eliminated along with the sector managers. Now the CEO and top managers could deal directly with each business without going through multiple layers of hierarchy. Moreover, Welch stretched senior managers’ span of control to 15 or more direct reports to force more delegation and autonomy downward.

Downsizing. Welch’s assault on the bureaucracy also involved cutting down the number of employees. GE eliminated tens of thousands of managers and employees through delayering and de-staffing and even more through divestitures. The number of GE employees declined from about 404,000 in 1982 to 292,000 by 1989. Welch was given the nickname “Neutron Jack” because a neutron bomb killed people and left buildings intact. The nickname was reinforced by the CEO’s replacement of 12 of his 14 business heads. During this period, Welch was named “toughest boss in America.”

A New Culture. Welch wanted a corporate culture based on direct conversations of openness and candor, eyeball to eyeball, between managers and direct reports rather than via formal meetings and bureaucratic paperwork. A practice called Work-Out was one answer. Groups of up to 100 employees from a business unit would gather in a town meeting-style atmosphere. The business unit boss presented a challenge and left the room. Employees divided into teams and attacked problems and bureaucratic inefficiencies in their business unit with new, often dramatic, solutions. On the third day, bosses returned and listened to the teams’ presentations. Bosses had about one minute to decide whether to accept or reject each proposal. One boss from an aircraft engine factory accepted 100 of 108 proposals, enabling a transformation in factory operations. Bosses often lost their jobs if they were unable to accept the dramatic change proposals from subordinates. Over 10 years, about 200,000 GE members participated in Work-Out.

Going Global. Welch also focused GE on global expansion. The U.S. market was not big enough. Welch encouraged international expansion by increasing the standard for business unit performance from being the “No. 1 or No. 2” business in your industry to being the No. 1 or No. 2 business in *the world!* To support each company’s global effort, he hired a senior manager of International Operations to facilitate each business’s overseas expansion. GE managers had to learn to think and act globally.

Performance Management, Stretch Goals, and Control. Welch and his most senior executives were responsible for the progress of GE's top 3,000 executives. They visited each company to review progress toward stated targets, often including "stretch" goals, another concept Welch introduced. Stretch goals used managers' "dreams" as targets that might be impossible to reach but would motivate exceptional accomplishment. In another move, Welch installed a manager evaluation system on a "vitality curve." This annual review process became known as "rank and yank," because the top 20 percent received generous rewards, the vital 70 percent were largely left alone, and the bottom 10 percent were encouraged to leave the company.

E-Business. About two years from retirement, Welch saw the potential of the Internet as "the biggest change I have ever seen." He thought a big, traditional company like GE might be afraid of the new technology, so he required each business unit to establish a full-time team charged with including strategic opportunities for the Internet. Digitizing the company was Welch's final major initiative.

To summarize, the Jack Welch era at GE was the most phenomenal in company history. Welch and GE earned prestigious awards, such as *Financial Times* naming GE the "Most Admired Company in the World." Moreover, Jack Welch became an icon for brilliant management and his name became known in popular culture. GE's market value increased an astonishing 27 times from \$18 billion to \$500 billion under Welch's guidance. In the year 2000, GE was the most valuable company in the world.

1.1b The Jeff Immelt Era 2001–2017

Welch personally chose Jeff Immelt to become GE's new CEO. Immelt had broad experience at GE, changing jobs often across GE Appliance, GE Plastics, and GE Healthcare, eventually running the healthcare unit.

The External Environment. Immelt and GE faced major environmental challenges almost from Day 1—starting with the September 11, 2001 terrorist attacks that stunned the world. GE also endured the 2002 stock market crash, an oil price collapse, and the 2008 collapse of Wall Street and the long global recession that followed.

Strategy Changes. Immelt shifted GE toward an industrial business focus consistent with GE's industrial roots while simultaneously learning to thrive in the Internet age. He added software capability to GE and predicted GE would become a major software company. Immelt also placed special emphasis on globalization and on more innovations via greater investments in research and development.

Innovation. Under Immelt's watch, GE developed a new concept called "reverse innovation." GE's innovation strategy for decades had been to develop high-end products in the United States and then sell the products internationally with modest adaptations to fit local conditions. Reverse innovation means to develop low-end products in poor countries and then sell those products in wealthy, well-developed countries. One example was the development of a cheap, portable ultrasound machine in China that was also sold successfully in the United States and Europe.

Sustainability. At GE, sustainability means aligning business strategy to meet societal needs, while minimizing environmental impact and advancing social development. Immelt pushed GE to embed sustainability at every level, from high-visibility

initiatives such as Ecomagination (building machines that produce cleaner energy, reduce greenhouse gas emissions, and reduce clean water use) down to day-to-day safety management for employees. Sustainability also means promoting diversity, investing for affordable healthcare, investing in clean energy, and meeting ambitious environmental goals to reduce emissions.

Big Decisions. Immelt's biggest decisions were to sell most of GE Capital and to acquire the French energy business Alstom. GE Capital provided a variety of financial services—credit cards, car loans, real estate loans, subprime mortgages, and equipment leasing. GE Capital was a highly profitable business. After the 2008 financial crisis, however, GE Capital was designated “too big to fail.” Investors feared huge losses, so large parts of GE Capital were divested. This was a tough decision because in some previous good years GE Capital provided nearly half of GE's revenue and profits.

The Alstom acquisition decision proved to be something of a disaster. At \$13 billion, it was GE's largest industrial acquisition. Managers soon realized not only that Alstom was operating inefficiently, but the demand for its gas-powered generation equipment was in decline. Immelt ordered Alstom to downsize by 12,000 employees. After paying \$13 billion for Alstom, GE later took a write down of almost \$20 billion.

More Globalization. Immelt pushed international business beyond Welch's earlier goals. He increased global revenue to 55 percent of total revenue compared to 30 percent when he took over. He explained that 90 percent of aircraft engines, 100 percent of gas turbines, and 50 percent of locomotives that GE manufactures leave the country. “That is where the customers are,” he said. Immelt championed the launch of GE's Global Growth Organization (GGO), designed to work across the business units to increase sales in markets outside the United States.

Digitalizing for Big Data Analytics. Immelt sponsored a large research effort into a sophisticated data analytics platform called Predix. This cloud-based operating system would allow GE to put sensors on industrial equipment sold to customers (e.g., jet engines, locomotives) that would provide huge volumes of data to analyze machine performance and predict maintenance requirements. These data would enable GE to offer new and profitable services to customers.

To summarize Immelt's era at General Electric, most analysts thought GE fell behind rather than moved ahead. Immelt did all he could over his time as CEO to increase the value of GE stock, but over those 17 years share price declined by close to 30 percent while comparable companies (the S&P 500) rose by 124 percent. GE shed more than \$150 billion in value compared to the \$480 billion increase during Jack Welch's reign. Some analysts argued that the GE conglomerate should be broken up or dramatically slimmed down by selling its pieces and killing all investments in R&D and innovation. They criticized Immelt for being overly optimistic in his decisions and for not confronting the reality of GE's problems.

1.1c Events Since 2017

In 2017, GE announced that John Flannery, head of GE Healthcare, would follow Immelt as CEO. GE's stock price soon dropped 45 percent. GE hit rock bottom during late 2018 and early 2019—its market value was about 1/10 of its peak under Jack Welch. The stock dividend that had supported GE widows and seniors for

decades was cut to a single penny. The icing on the not-so-pretty cake was when GE was cut from its coveted position in the prestigious Dow Jones Industrial Average.

GE's Board of Directors soon decided that Flannery lacked the experience to handle the flow of crises at GE while he was still learning the company. The new CEO was 55-year-old Larry Culp, Lead Director on GE's Board, who had 14 years' experience as CEO of Danaher Corporation. People are counting on Culp to reinstate the kind of business culture at GE that inspired other companies to copy it. Culp thought GE had become too large and complicated to be managed effectively, and he decided to slim down the company, including selling GE's biotechnology business for \$21 billion. During Culp's first few months as CEO in 2019, GE's stock started moving in a positive direction. With hope and hard work, managers, employees, and analysts expect the renewal of GE into an image of its former self will continue.¹

1.2 Organization Design in Action

Welcome to the real world of organization design. The shifting fortunes of GE illustrate organization design in action. GE managers were deeply involved in organization design each day of their working lives—but many never realized it. Company managers didn't fully understand how the organization related to the environment or how it should function internally. Organization design gives us the tools to evaluate and understand how and why some organizations grow and succeed while others do not. It helps us explain what happened in the past, as well as what might happen in the future, so that we can manage organizations more effectively. Organization design concepts can help Larry Culp and other GE managers analyze and diagnose what is happening and the changes that will help GE keep pace with a fast-changing world. Organization design gives people the tools to explain the decline of GE and recognize the steps managers might take to keep the company competitive.

Similar problems have challenged numerous organizations. Toyota Motor Corporation, for example, had the best manufacturing system in the world and was the unchallenged auto quality leader for decades. But when top managers started implementing high-pressure goals for extensive global growth, the famous quality system was strained to a breaking point. By 2009, Toyota found itself in the middle of a crisis that culminated in the recall of more than 9 million cars due to quality problems.² Sales at Papa John's pizza chain dropped after a highly-publicized incident of founder John Schnatter using a racial slur led to the exposure of a corporate culture that belittled women and minorities. Schnatter resigned. The Board of Directors asked an outside firm to oversee an audit of the corporate culture, and the company began holding workshops on diversity and inclusion to try to fix the dysfunctional culture.³ Or consider Kodak, the company that once ruled the photographic film business. Kodak invented one of the first digital cameras and spent hundreds of millions of dollars developing digital technology, but the fear of cannibalizing their lucrative film business paralyzed managers when the time came to go to market. Kodak filed for bankruptcy in 2012 and is now a shell of the company it was prior to the digital camera revolution.⁴

1.2a Topics

Each of the topics to be covered in this book is illustrated in the opening General Electric case. Indeed, managers at organizations such as General Electric, Toyota,

Kodak, and Papa John's are continually faced with a number of challenges. For example:

- How can the organization adapt to or control such external elements as competitors, customers, government, and creditors in a fast-paced environment?
- What strategic and structural changes are needed to help the organization attain effectiveness?
- How can the organization avoid management ethical lapses that could threaten its viability?
- What changes are needed to address the growing demand for organizations to pay attention to sustainability issues?
- How can managers cope with the problems of large size and bureaucracy?
- What is the appropriate use of power and politics among managers?
- How should internal conflict and coordination between work units be managed?
- What kind of corporate culture is needed and how can managers shape that culture?
- How much and what type of innovation and change is needed?

These are the topics with which organization theory and design is concerned. Organization design concepts apply to all types of organizations in all industries. Managers at Hyundai, for example, turned the Korean auto manufacturer once known for producing inexpensive no-frills cars with a poor reputation into the world's third largest automaker by relentlessly focusing on quality, cost-control, and customer satisfaction. After Google pulled its search engine and Gmail out of China in protest over censorship and government hacking, managers found a way to keep a foothold in the lucrative market by building relationships with local partners such as Mobvoi, Tencent Holdings Ltd., and others. Google has been negotiating to provide software and cloud-hosting services that would run on a data center owned by a Chinese local partner. Managers at the Swedish furniture giant IKEA are undertaking the most dramatic restructuring in company history to cope with rapid changes in shopping habits.⁵ All of these companies are using concepts based in organization design. Organization design also applies to nonprofit organizations such as United Way, Best Friends Animal Society, local arts organizations, colleges and universities, and the Make-A-Wish Foundation, which grants wishes to terminally ill children.

Organization design draws lessons from organizations such as GE, Google, and United Way and makes those lessons available to students and managers. As our opening example of GE shows, even large, successful organizations are vulnerable, lessons are not learned automatically, and organizations are only as strong as their decision makers. Research shows that many new companies don't survive past their fifth birthday, yet some organizations thrive for 50 or even 100 years. Organizations are not static; they continuously adapt to shifts in the external environment. Today, many companies are facing the need to transform themselves into dramatically different organizations because of new challenges in the environment.

BRIEFCASE

As an organization manager, keep these guidelines in mind:

Do not ignore the external environment or protect the organization from it. Because the environment is unpredictable, do not expect to achieve complete order and rationality within the organization. Strive for a balance between order and flexibility.

1.2b Purpose of This Chapter

The purpose of this chapter is to explore the nature of organizations and organization design today. Organization design has developed from the systematic study of organizations by scholars. Concepts are obtained from living, ongoing organizations. Organization theory and design has a practical application, as illustrated

by the GE case. It helps managers understand, diagnose, and respond to emerging organizational needs and problems.

We first take a deeper look at the challenges today's managers and organizations face. The next section begins with a formal definition of the organization as an open system and then explores introductory concepts for describing and analyzing organizations, including various structural dimensions and contingency factors. We introduce the concepts of efficiency and effectiveness and describe the most common approach to measuring organizational performance. Succeeding sections examine the history of organization design, the distinction between mechanistic and organic designs, and how organization theory can help people manage complex organizations in a rapidly changing world. The chapter closes with a brief overview of the themes to be covered in this book.

1.2c Current Challenges

Research into hundreds of organizations provides the knowledge base to make GE and other organizations more effective. Challenges organizations face today are different from those of the past, and thus the concept of organizations and organization design is evolving. This chapter's BookMark describes two recent organizational forms that are altering the organizational landscape. The world is changing more rapidly than ever before, and managers are responsible for positioning their organizations to adapt to new needs. Some specific challenges today's managers and organizations face are globalization, intense competition, rigorous scrutiny of sustainability and ethical practices, the need for rapid response, and incorporating digital business and big data analytics.

Globalization. The cliché that the world is getting smaller is dramatically true today. Markets, technologies, and organizations are becoming increasingly interconnected.⁶ Managers who can help their companies develop a global perspective are in high demand. For example, consider Ramon Laguarta, a native of Barcelona, Spain, who took over as CEO of PepsiCo in 2018, Indian American Sundar Pichai, CEO of Google, or Medtronic CEO Omar Ishrak, a Bangladesh native who was educated in the United Kingdom and worked in the United States for nearly two decades.

Today's successful organizations feel "at home" anywhere in the world. Companies can locate different parts of the organization wherever it makes the most business sense: top leadership in one country and technical brainpower and production in other locales. Related trends are *global outsourcing*, or contracting out some functions to organizations in other countries (Nike), and *strategic partnering* with foreign firms to gain a global advantage (Google). Cross-border acquisitions and the development of effective business relationships in other countries are vital to many organizations' success. Yet doing business on a global scale is not easy. After a new European Union privacy law went into effect in mid-2018, the French data protection authority fined Google 50 million euros (about \$57 million) for not properly disclosing to users how it collected data to provide personalized ads.⁷ Uber has pulled out of several global markets, including China, Russia, and Southeast Asia, after it got into trouble defying government regulations in various countries.⁸ Another issue concerns outsourcing and contractor relationships. Several garment factory fires in Bangladesh and the collapse of another apparel plant that killed more than 1,100 workers put the spotlight on poor working conditions in that country.
