Precalculus

TENTH EDITION

Michael Sullivan

To the Student

As you begin, you may feel anxious about the number of theorems, definitions, procedures, and equations. You may wonder if you can learn it all in time. Don't worry—your concerns are normal. This textbook was written with you in mind. If you attend class, work hard, and read and study this text, you will build the knowledge and skills you need to be successful. Here's how you can use the text to your benefit.

Read Carefully

When you get busy, it's easy to skip reading and go right to the problems. Don't . . . the text has a large number of examples and clear explanations to help you break down the mathematics into easy-to-understand steps. Reading will provide you with a clearer understanding, beyond simple memorization. Read before class (not after) so you can ask questions about anything you didn't understand. You'll be amazed at how much more you'll get out of class if you do this.

Use the Features

I use many different methods in the classroom to communicate. Those methods, when incorporated into the text, are called “features.” The features serve many purposes, from providing timely review of material you learned before (just when you need it) to providing organized review sessions to help you prepare for quizzes and tests. Take advantage of the features and you will master the material.

To make this easier, we've provided a brief guide to getting the most from this text. Refer to “Prepare for Class,” “Practice,” and “Review” on the following three pages. Spend fifteen minutes reviewing the guide and familiarizing yourself with the features by flipping to the page numbers provided. Then, as you read, use them. This is the best way to make the most of your text.

Please do not hesitate to contact us, through Pearson Education, with any questions, comments, or suggestions for improving this text. I look forward to hearing from you, and good luck with all of your studies.

Best Wishes!
Michael Sullivan

Prepare for Class “Read the Book”

Feature	Description	Benefit	Page
Every Chapter Opener begins with . . .			
Chapter-Opening Topic & Project	Each chapter begins with a discussion of a topic of current interest and ends with a related project.	The Project lets you apply what you learned to solve a problem related to the topic.	282
 Internet-Based Projects	The projects allow for the integration of spreadsheet technology that you will need to be a productive member of the workforce.	The projects give you an opportunity to collaborate and use mathematics to deal with issues of current interest.	383
Every Section begins with . . .			
Learning Objectives	Each section begins with a list of objectives. Objectives also appear in the text where the objective is covered.	These focus your studying by emphasizing what’s most important and where to find it.	303
Sections contain . . .			
PREPARING FOR THIS SECTION	Most sections begin with a list of key concepts to review with page numbers.	Ever forget what you’ve learned? This feature highlights previously learned material to be used in this section. Review it, and you’ll always be prepared to move forward.	303
Now Work the ‘Are You Prepared?’ Problems	Problems that assess whether you have the prerequisite knowledge for the upcoming section.	Not sure you need the Preparing for This Section review? Work the ‘Are You Prepared?’ problems. If you get one wrong, you’ll know exactly what you need to review and where to review it!	303, 314
 Now Work PROBLEMS	These follow most examples and direct you to a related exercise.	We learn best by doing. You’ll solidify your understanding of examples if you try a similar problem right away, to be sure you understand what you’ve just read.	310, 315
WARNING	Warnings are provided in the text.	These point out common mistakes and help you to avoid them.	336
Exploration and Seeing the Concept	These graphing utility activities foreshadow a concept or solidify a concept just presented.	You will obtain a deeper and more intuitive understanding of theorems and definitions.	298, 323
 In Words	These provide alternative descriptions of select definitions and theorems.	Does math ever look foreign to you? This feature translates math into plain English.	320
 Calculus	These appear next to information essential for the study of calculus.	Pay attention—if you spend extra time now, you’ll do better later!	85, 287, 311
SHOWCASE EXAMPLES	These examples provide “how-to” instruction by offering a guided, step-by-step approach to solving a problem.	With each step presented on the left and the mathematics displayed on the right, you can immediately see how each step is employed.	214
 Model It! Examples and Problems	These examples and problems require you to build a mathematical model from either a verbal description or data. The homework Model It! problems are marked by purple headings.	It is rare for a problem to come in the form “Solve the following equation.” Rather, the equation must be developed based on an explanation of the problem. These problems require you to develop models that will allow you to describe the problem mathematically and suggest a solution to the problem.	327, 355

Practice “Work the Problems”

Feature	Description	Benefit	Page
‘Are You Prepared?’ Problems	These assess your retention of the prerequisite material you’ll need. Answers are given at the end of the section exercises. This feature is related to the Preparing for This Section feature.	Do you always remember what you’ve learned? Working these problems is the best way to find out. If you get one wrong, you’ll know exactly what you need to review and where to review it!	314, 328
Concepts and Vocabulary	These short-answer questions, mainly Fill-in-the-Blank, Multiple-Choice and True/False items, assess your understanding of key definitions and concepts in the current section.	It is difficult to learn math without knowing the language of mathematics. These problems test your understanding of the formulas and vocabulary.	314
Skill Building	Correlated with section examples, these problems provide straightforward practice.	It’s important to dig in and develop your skills. These problems provide you with ample opportunity to do so.	314–316
Mixed Practice	These problems offer comprehensive assessment of the skills learned in the section by asking problems that relate to more than one concept or objective. These problems may also require you to utilize skills learned in previous sections.	Learning mathematics is a building process. Many concepts are interrelated. These problems help you see how mathematics builds on itself and also see how the concepts tie together.	316–317
Applications and Extensions	These problems allow you to apply your skills to real-world problems. They also allow you to extend concepts learned in the section.	You will see that the material learned within the section has many uses in everyday life.	317–319
Explaining Concepts: Discussion and Writing	“Discussion and Writing” problems are colored red. They support class discussion, verbalization of mathematical ideas, and writing and research projects.	To verbalize an idea, or to describe it clearly in writing, shows real understanding. These problems nurture that understanding. Many are challenging, but you’ll get out what you put in.	319
NEW! Retain Your Knowledge	These problems allow you to practice content learned earlier in the course.	Remembering how to solve all the different kinds of problems that you encounter throughout the course is difficult. This practice helps you remember.	319
Now Work PROBLEMS	Many examples refer you to a related homework problem. These related problems are marked by a pencil and orange numbers.	If you get stuck while working problems, look for the closest Now Work problem, and refer to the related example to see if it helps.	312, 315, 316
Review Exercises	Every chapter concludes with a comprehensive list of exercises to practice. Use the list of objectives to determine the objective and examples that correspond to the problems.	Work these problems to ensure that you understand all the skills and concepts of the chapter. Think of it as a comprehensive review of the chapter.	379–381

Review “Study for Quizzes and Tests”

Feature	Description	Benefit	Page
The Chapter Review at the end of each chapter contains . . .			
Things to Know	A detailed list of important theorems, formulas, and definitions from the chapter.	Review these and you’ll know the most important material in the chapter!	377–378
You Should Be Able to . . .	Contains a complete list of objectives by section, examples that illustrate the objective, and practice exercises that test your understanding of the objective.	Do the recommended exercises and you’ll have mastered the key material. If you get something wrong, go back and work through the example listed and try again.	378–379
Review Exercises	These provide comprehensive review and practice of key skills, matched to the Learning Objectives for each section.	Practice makes perfect. These problems combine exercises from all sections, giving you a comprehensive review in one place.	379–381
Chapter Test	About 15–20 problems that can be taken as a Chapter Test. Be sure to take the Chapter Test under test conditions—no notes!	Be prepared. Take the sample practice test under test conditions. This will get you ready for your instructor’s test. If you get a problem wrong, you can watch the Chapter Test Prep Video.	382
Cumulative Review	These problem sets appear at the end of each chapter, beginning with Chapter 2. They combine problems from previous chapters, providing an ongoing cumulative review. When you use them in conjunction with the Retain Your Knowledge problems, you will be ready for the final exam.	These problem sets are really important. Completing them will ensure that you are not forgetting anything as you go. This will go a long way toward keeping you primed for the final exam.	382–383
Chapter Projects	The Chapter Projects apply to what you’ve learned in the chapter. Additional projects are available on the Instructor’s Resource Center (IRC).	The Chapter Projects give you an opportunity to apply what you’ve learned in the chapter to the opening topic. If your instructor allows, these make excellent opportunities to work in a group, which is often the best way of learning math.	383–384
 Internet-Based Projects	In selected chapters, a Web-based project is given.	These projects give you an opportunity to collaborate and use mathematics to deal with issues of current interest by using the Internet to research and collect data.	383

Achieve Your Potential

The author, Michael Sullivan, has developed specific content in MyMathLab® to ensure you have many resources to help you achieve success in mathematics - and beyond! The MyMathLab features described here will help you:

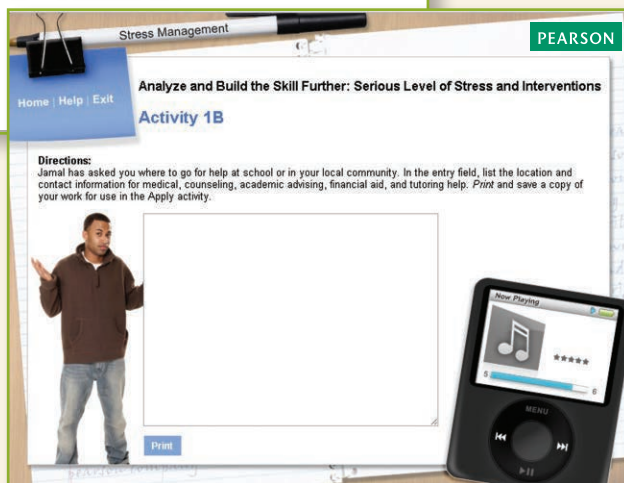

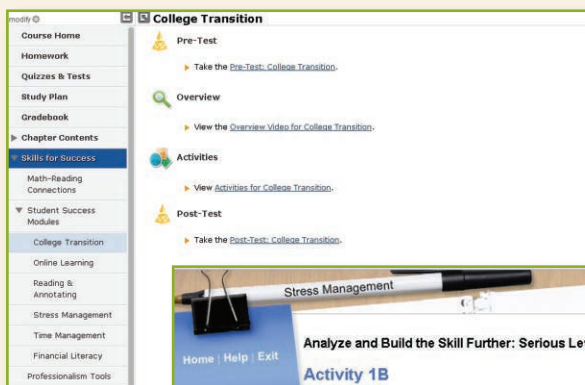

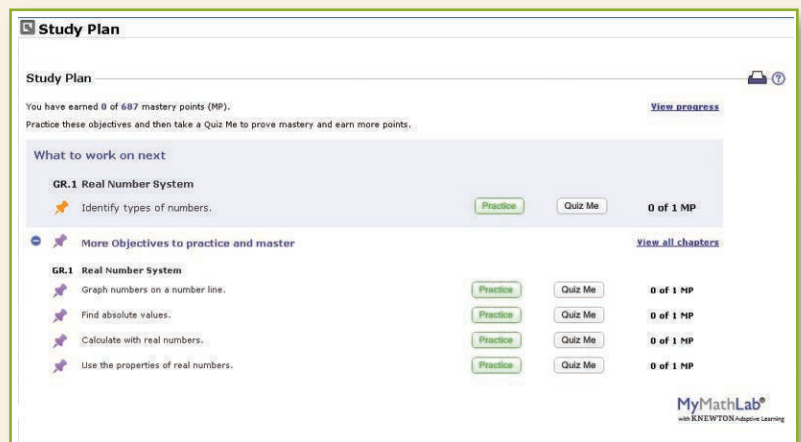

- **Review** math skills and concepts you may have forgotten
- **Retain** new concepts as you move through your math course
- **Develop** skills that will help with your transition to college

Adaptive Study Plan

The Study Plan will help you study more efficiently and effectively.

Your performance and activity are assessed continually in real time, providing a personalized experience based on your individual needs.

Skills for Success

The Skills for Success Modules support your continued success in college. These modules provide tutorials and guidance on a variety of topics, including transitioning to college, online learning, time management, and more.

Additional content is provided to help with the development of professional skills such as resume writing and interview preparation.

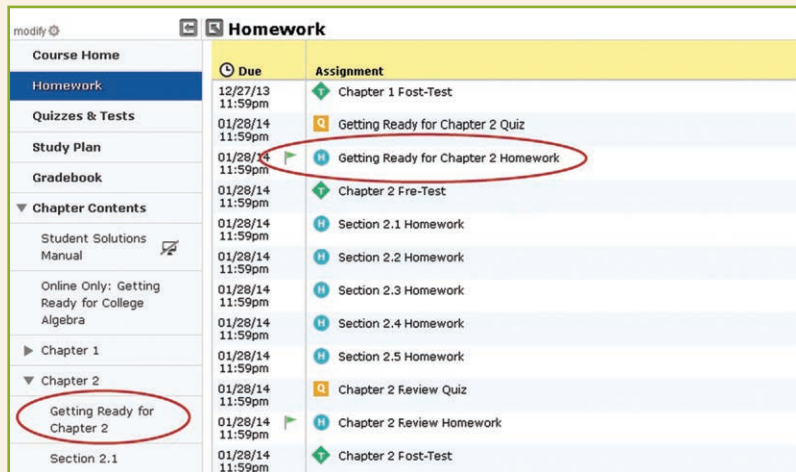

Getting Ready

Are you frustrated when you know you learned a math concept in the past, but you can't quite remember the skill when it's time to use it?

Don't worry!

The author has included Getting Ready material so you can brush up on forgotten material efficiently by taking a quick skill review quiz to pinpoint the areas where you need help.

Then, a personalized homework assignment provides additional practice on those forgotten concepts, right when you need it.

Due	Assignment
12/27/13 11:59pm	Chapter 1 Post-Test
01/28/14 11:59pm	Getting Ready for Chapter 2 Quiz
01/28/14 11:59pm	Getting Ready for Chapter 2 Homework
01/28/14 11:59pm	Chapter 2 Pre-Test
01/28/14 11:59pm	Section 2.1 Homework
01/28/14 11:59pm	Section 2.2 Homework
01/28/14 11:59pm	Section 2.3 Homework
01/28/14 11:59pm	Section 2.4 Homework
01/28/14 11:59pm	Section 2.5 Homework
01/28/14 11:59pm	Chapter 2 Review Quiz
01/28/14 11:59pm	Chapter 2 Review Homework
01/28/14 11:59pm	Chapter 2 Post-Test

Retain Your Knowledge

As you work through your math course, these MyMathLab® exercises support ongoing review to help you maintain essential skills.

The ability to recall important math concepts as you continually acquire new mathematical skills will help you be successful in this math course and in your future math courses.

Contents

	Three Distinct Series	20
	The Contemporary Series	21
	Preface to the Instructor	22
	Resources for Success	26
	Applications Index	28
1	Graphs	35
	1.1 The Distance and Midpoint Formulas	36
	Use the Distance Formula • Use the Midpoint Formula	
	1.2 Graphs of Equations in Two Variables; Intercepts; Symmetry	43
	Graph Equations by Plotting Points • Find Intercepts from a Graph • Find Intercepts from an Equation • Test an Equation for Symmetry with Respect to the x -Axis, the y -Axis, and the Origin • Know How to Graph Key Equations	
	1.3 Lines	53
	Calculate and Interpret the Slope of a Line • Graph Lines Given a Point and the Slope • Find the Equation of a Vertical Line • Use the Point–Slope Form of a Line; Identify Horizontal Lines • Find the Equation of a Line Given Two Points • Write the Equation of a Line in Slope–Intercept Form • Identify the Slope and y -Intercept of a Line from Its Equation • Graph Lines Written in General Form Using Intercepts • Find Equations of Parallel Lines • Find Equations of Perpendicular Lines	
	1.4 Circles	68
	Write the Standard Form of the Equation of a Circle • Graph a Circle • Work with the General Form of the Equation of a Circle	
	Chapter Review	74
	Chapter Test	76
	Chapter Project	77
2	Functions and Their Graphs	78
	2.1 Functions	79
	Determine Whether a Relation Represents a Function • Find the Value of a Function • Find the Difference Quotient of a Function • Find the Domain of a Function Defined by an Equation • Form the Sum, Difference, Product, and Quotient of Two Functions	
	2.2 The Graph of a Function	94
	Identify the Graph of a Function • Obtain Information from or about the Graph of a Function	
	2.3 Properties of Functions	103
	Determine Even and Odd Functions from a Graph • Identify Even and Odd Functions from an Equation • Use a Graph to Determine Where a Function Is Increasing, Decreasing, or Constant • Use a Graph to Locate Local Maxima and Local Minima • Use a Graph to Locate the Absolute Maximum and the Absolute Minimum • Use a Graphing Utility to Approximate Local Maxima and Local Minima and to Determine Where a Function Is Increasing or Decreasing • Find the Average Rate of Change of a Function	

2.4	Library of Functions; Piecewise-defined Functions	117
	Graph the Functions Listed in the Library of Functions • Graph Piecewise-defined Functions	
2.5	Graphing Techniques: Transformations	127
	Graph Functions Using Vertical and Horizontal Shifts • Graph Functions Using Compressions and Stretches • Graph Functions Using Reflections about the x -Axis and the y -Axis	
2.6	Mathematical Models: Building Functions	140
	Build and Analyze Functions	
	Chapter Review	146
	Chapter Test	150
	Cumulative Review	151
	Chapter Projects	151
3	Linear and Quadratic Functions	153
3.1	Properties of Linear Functions and Linear Models	154
	Graph Linear Functions • Use Average Rate of Change to Identify Linear Functions • Determine Whether a Linear Function Is Increasing, Decreasing, or Constant • Build Linear Models from Verbal Descriptions	
3.2	Building Linear Models from Data	164
	Draw and Interpret Scatter Diagrams • Distinguish between Linear and Nonlinear Relations • Use a Graphing Utility to Find the Line of Best Fit	
3.3	Quadratic Functions and Their Properties	170
	Graph a Quadratic Function Using Transformations • Identify the Vertex and Axis of Symmetry of a Quadratic Function • Graph a Quadratic Function Using Its Vertex, Axis, and Intercepts • Find a Quadratic Function Given Its Vertex and One Other Point • Find the Maximum or Minimum Value of a Quadratic Function	
3.4	Build Quadratic Models from Verbal Descriptions and from Data	182
	Build Quadratic Models from Verbal Descriptions • Build Quadratic Models from Data	
3.5	Inequalities Involving Quadratic Functions	192
	Solve Inequalities Involving a Quadratic Function	
	Chapter Review	195
	Chapter Test	198
	Cumulative Review	199
	Chapter Projects	200
4	Polynomial and Rational Functions	201
4.1	Polynomial Functions and Models	202
	Identify Polynomial Functions and Their Degree • Graph Polynomial Functions Using Transformations • Know Properties of the Graph of a Polynomial Function • Analyze the Graph of a Polynomial Function • Build Cubic Models from Data	
4.2	Properties of Rational Functions	223
	Find the Domain of a Rational Function • Find the Vertical Asymptotes of a Rational Function • Find the Horizontal or Oblique Asymptote of a Rational Function	

4.3	The Graph of a Rational Function	233
	Analyze the Graph of a Rational Function • Solve Applied Problems Involving Rational Functions	
4.4	Polynomial and Rational Inequalities	248
	Solve Polynomial Inequalities • Solve Rational Inequalities	
4.5	The Real Zeros of a Polynomial Function	255
	Use the Remainder and Factor Theorems • Use Descartes' Rule of Signs to Determine the Number of Positive and the Number of Negative Real Zeros of a Polynomial Function • Use the Rational Zeros Theorem to List the Potential Rational Zeros of a Polynomial Function • Find the Real Zeros of a Polynomial Function • Solve Polynomial Equations • Use the Theorem for Bounds on Zeros • Use the Intermediate Value Theorem	
4.6	Complex Zeros; Fundamental Theorem of Algebra	270
	Use the Conjugate Pairs Theorem • Find a Polynomial Function with Specified Zeros • Find the Complex Zeros of a Polynomial Function	
	Chapter Review	276
	Chapter Test	279
	Cumulative Review	279
	Chapter Projects	280

5 Exponential and Logarithmic Functions 282

5.1	Composite Functions	283
	Form a Composite Function • Find the Domain of a Composite Function	
5.2	One-to-One Functions; Inverse Functions	291
	Determine Whether a Function Is One-to-One • Determine the Inverse of a Function Defined by a Map or a Set of Ordered Pairs • Obtain the Graph of the Inverse Function from the Graph of the Function • Find the Inverse of a Function Defined by an Equation	
5.3	Exponential Functions	303
	Evaluate Exponential Functions • Graph Exponential Functions • Define the Number e • Solve Exponential Equations	
5.4	Logarithmic Functions	320
	Change Exponential Statements to Logarithmic Statements and Logarithmic Statements to Exponential Statements • Evaluate Logarithmic Expressions • Determine the Domain of a Logarithmic Function • Graph Logarithmic Functions • Solve Logarithmic Equations	
5.5	Properties of Logarithms	332
	Work with the Properties of Logarithms • Write a Logarithmic Expression as a Sum or Difference of Logarithms • Write a Logarithmic Expression as a Single Logarithm • Evaluate Logarithms Whose Base Is Neither 10 Nor e	
5.6	Logarithmic and Exponential Equations	341
	Solve Logarithmic Equations • Solve Exponential Equations • Solve Logarithmic and Exponential Equations Using a Graphing Utility	
5.7	Financial Models	348
	Determine the Future Value of a Lump Sum of Money • Calculate Effective Rates of Return • Determine the Present Value of a Lump Sum of Money • Determine the Rate of Interest or the Time Required to Double a Lump Sum of Money	

5.8 Exponential Growth and Decay Models; Newton's Law; Logistic Growth and Decay Models	358
Find Equations of Populations That Obey the Law of Uninhibited Growth • Find Equations of Populations That Obey the Law of Decay • Use Newton's Law of Cooling • Use Logistic Models	
5.9 Building Exponential, Logarithmic, and Logistic Models from Data	369
Build an Exponential Model from Data • Build a Logarithmic Model from Data • Build a Logistic Model from Data	
Chapter Review	377
Chapter Test	382
Cumulative Review	382
Chapter Projects	383

6 Trigonometric Functions 385

6.1 Angles and Their Measure	386
Convert between Decimals and Degrees, Minutes, Seconds Measures for Angles • Find the Length of an Arc of a Circle • Convert from Degrees to Radians and from Radians to Degrees • Find the Area of a Sector of a Circle • Find the Linear Speed of an Object Traveling in Circular Motion	
6.2 Trigonometric Functions: Unit Circle Approach	400
Find the Exact Values of the Trigonometric Functions Using a Point on the Unit Circle • Find the Exact Values of the Trigonometric Functions of Quadrantal Angles • Find the Exact Values of the Trigonometric Functions of $\frac{\pi}{4} = 45^\circ$ • Find the Exact Values of the Trigonometric Functions of $\frac{\pi}{6} = 30^\circ$ and $\frac{\pi}{3} = 60^\circ$ • Find the Exact Values of the Trigonometric Functions for Integer Multiples of $\frac{\pi}{6} = 30^\circ$, $\frac{\pi}{4} = 45^\circ$, and $\frac{\pi}{3} = 60^\circ$ • Use a Calculator to Approximate the Value of a Trigonometric Function • Use a Circle of Radius r to Evaluate the Trigonometric Functions	
6.3 Properties of the Trigonometric Functions	417
Determine the Domain and the Range of the Trigonometric Functions • Determine the Period of the Trigonometric Functions • Determine the Signs of the Trigonometric Functions in a Given Quadrant • Find the Values of the Trigonometric Functions Using Fundamental Identities • Find the Exact Values of the Trigonometric Functions of an Angle Given One of the Functions and the Quadrant of the Angle • Use Even–Odd Properties to Find the Exact Values of the Trigonometric Functions	
6.4 Graphs of the Sine and Cosine Functions	431
Graph Functions of the Form $y = A \sin(\omega x)$ Using Transformations • Graph Functions of the Form $y = A \cos(\omega x)$ Using Transformations • Determine the Amplitude and Period of Sinusoidal Functions • Graph Sinusoidal Functions Using Key Points • Find an Equation for a Sinusoidal Graph	
6.5 Graphs of the Tangent, Cotangent, Cosecant, and Secant Functions	446
Graph Functions of the Form $y = A \tan(\omega x) + B$ and $y = A \cot(\omega x) + B$ • Graph Functions of the Form $y = A \csc(\omega x) + B$ and $y = A \sec(\omega x) + B$	
6.6 Phase Shift; Sinusoidal Curve Fitting	454
Graph Sinusoidal Functions of the Form $y = A \sin(\omega x - \phi) + B$ • Build Sinusoidal Models from Data	

Chapter Review	464
Chapter Test	470
Cumulative Review	471
Chapter Projects	472

7 Analytic Trigonometry 474

7.1 The Inverse Sine, Cosine, and Tangent Functions	475
Find the Exact Value of an Inverse Sine Function • Find an Approximate Value of an Inverse Sine Function • Use Properties of Inverse Functions to Find Exact Values of Certain Composite Functions • Find the Inverse Function of a Trigonometric Function • Solve Equations Involving Inverse Trigonometric Functions	
7.2 The Inverse Trigonometric Functions (Continued)	488
Find the Exact Value of Expressions Involving the Inverse Sine, Cosine, and Tangent Functions • Define the Inverse Secant, Cosecant, and Cotangent Functions • Use a Calculator to Evaluate $\sec^{-1} x$, $\csc^{-1} x$, and $\cot^{-1} x$ • Write a Trigonometric Expression as an Algebraic Expression	
7.3 Trigonometric Equations	494
Solve Equations Involving a Single Trigonometric Function • Solve Trigonometric Equations Using a Calculator • Solve Trigonometric Equations Quadratic in Form • Solve Trigonometric Equations Using Fundamental Identities • Solve Trigonometric Equations Using a Graphing Utility	
7.4 Trigonometric Identities	504
Use Algebra to Simplify Trigonometric Expressions • Establish Identities	
7.5 Sum and Difference Formulas	512
Use Sum and Difference Formulas to Find Exact Values • Use Sum and Difference Formulas to Establish Identities • Use Sum and Difference Formulas Involving Inverse Trigonometric Functions • Solve Trigonometric Equations Linear in Sine and Cosine	
7.6 Double-angle and Half-angle Formulas	524
Use Double-angle Formulas to Find Exact Values • Use Double-angle Formulas to Establish Identities • Use Half-angle Formulas to Find Exact Values	
7.7 Product-to-Sum and Sum-to-Product Formulas	534
Express Products as Sums • Express Sums as Products	
Chapter Review	538
Chapter Test	541
Cumulative Review	542
Chapter Projects	543

8 Applications of Trigonometric Functions 544

8.1 Right Triangle Trigonometry; Applications	545
Find the Value of Trigonometric Functions of Acute Angles Using Right Triangles • Use the Complementary Angle Theorem • Solve Right Triangles • Solve Applied Problems	
8.2 The Law of Sines	558
Solve SAA or ASA Triangles • Solve SSA Triangles • Solve Applied Problems	
8.3 The Law of Cosines	568
Solve SAS Triangles • Solve SSS Triangles • Solve Applied Problems	

8.4 Area of a Triangle	575
Find the Area of SAS Triangles • Find the Area of SSS Triangles	
8.5 Simple Harmonic Motion; Damped Motion; Combining Waves	581
Build a Model for an Object in Simple Harmonic Motion • Analyze Simple Harmonic Motion • Analyze an Object in Damped Motion • Graph the Sum of Two Functions	
Chapter Review	590
Chapter Test	593
Cumulative Review	594
Chapter Projects	595

9 Polar Coordinates; Vectors **597**

9.1 Polar Coordinates	598
Plot Points Using Polar Coordinates • Convert from Polar Coordinates to Rectangular Coordinates • Convert from Rectangular Coordinates to Polar Coordinates • Transform Equations between Polar and Rectangular Forms	
9.2 Polar Equations and Graphs	607
Identify and Graph Polar Equations by Converting to Rectangular Equations • Test Polar Equations for Symmetry • Graph Polar Equations by Plotting Points	
9.3 The Complex Plane; De Moivre's Theorem	622
Plot Points in the Complex Plane • Convert a Complex Number between Rectangular Form and Polar Form • Find Products and Quotients of Complex Numbers in Polar Form • Use De Moivre's Theorem • Find Complex Roots	
9.4 Vectors	630
Graph Vectors • Find a Position Vector • Add and Subtract Vectors Algebraically • Find a Scalar Multiple and the Magnitude of a Vector • Find a Unit Vector • Find a Vector from Its Direction and Magnitude • Model with Vectors	
9.5 The Dot Product	644
Find the Dot Product of Two Vectors • Find the Angle between Two Vectors • Determine Whether Two Vectors Are Parallel • Determine Whether Two Vectors Are Orthogonal • Decompose a Vector into Two Orthogonal Vectors • Compute Work	
9.6 Vectors in Space	651
Find the Distance between Two Points in Space • Find Position Vectors in Space • Perform Operations on Vectors • Find the Dot Product • Find the Angle between Two Vectors • Find the Direction Angles of a Vector	
9.7 The Cross Product	661
Find the Cross Product of Two Vectors • Know Algebraic Properties of the Cross Product • Know Geometric Properties of the Cross Product • Find a Vector Orthogonal to Two Given Vectors • Find the Area of a Parallelogram	
Chapter Review	667
Chapter Test	670
Cumulative Review	671
Chapter Projects	671

10	Analytic Geometry	672
	10.1 Conics	673
	Know the Names of the Conics	
	10.2 The Parabola	674
	Analyze Parabolas with Vertex at the Origin • Analyze Parabolas with Vertex at (h, k) • Solve Applied Problems Involving Parabolas	
	10.3 The Ellipse	683
	Analyze Ellipses with Center at the Origin • Analyze Ellipses with Center at (h, k) • Solve Applied Problems Involving Ellipses	
	10.4 The Hyperbola	693
	Analyze Hyperbolas with Center at the Origin • Find the Asymptotes of a Hyperbola • Analyze Hyperbolas with Center at (h, k) • Solve Applied Problems Involving Hyperbolas	
	10.5 Rotation of Axes; General Form of a Conic	706
	Identify a Conic • Use a Rotation of Axes to Transform Equations • Analyze an Equation Using a Rotation of Axes • Identify Conics without a Rotation of Axes	
	10.6 Polar Equations of Conics	714
	Analyze and Graph Polar Equations of Conics • Convert the Polar Equation of a Conic to a Rectangular Equation	
	10.7 Plane Curves and Parametric Equations	720
	Graph Parametric Equations • Find a Rectangular Equation for a Curve Defined Parametrically • Use Time as a Parameter in Parametric Equations • Find Parametric Equations for Curves Defined by Rectangular Equations	
	Chapter Review	732
	Chapter Test	735
	Cumulative Review	735
	Chapter Projects	736
11	Systems of Equations and Inequalities	737
	11.1 Systems of Linear Equations: Substitution and Elimination	738
	Solve Systems of Equations by Substitution • Solve Systems of Equations by Elimination • Identify Inconsistent Systems of Equations Containing Two Variables • Express the Solution of a System of Dependent Equations Containing Two Variables • Solve Systems of Three Equations Containing Three Variables • Identify Inconsistent Systems of Equations Containing Three Variables • Express the Solution of a System of Dependent Equations Containing Three Variables	
	11.2 Systems of Linear Equations: Matrices	753
	Write the Augmented Matrix of a System of Linear Equations • Write the System of Equations from the Augmented Matrix • Perform Row Operations on a Matrix • Solve a System of Linear Equations Using Matrices	
	11.3 Systems of Linear Equations: Determinants	768
	Evaluate 2 by 2 Determinants • Use Cramer's Rule to Solve a System of Two Equations Containing Two Variables • Evaluate 3 by 3 Determinants • Use Cramer's Rule to Solve a System of Three Equations Containing Three Variables • Know Properties of Determinants	

11.4 Matrix Algebra	778
Find the Sum and Difference of Two Matrices • Find Scalar Multiples of a Matrix • Find the Product of Two Matrices • Find the Inverse of a Matrix Solve a System of Linear Equations Using an Inverse Matrix	
11.5 Partial Fraction Decomposition	795
Decompose $\frac{P}{Q}$ Where Q Has Only Nonrepeated Linear Factors • Decompose $\frac{P}{Q}$ Where Q Has Repeated Linear Factors • Decompose $\frac{P}{Q}$ Where Q Has a Nonrepeated Irreducible Quadratic Factor • Decompose $\frac{P}{Q}$ Where Q Has a Repeated Irreducible Quadratic Factor	
11.6 Systems of Nonlinear Equations	803
Solve a System of Nonlinear Equations Using Substitution • Solve a System of Nonlinear Equations Using Elimination	
11.7 Systems of Inequalities	812
Graph an Inequality • Graph a System of Inequalities	
11.8 Linear Programming	819
Set Up a Linear Programming Problem • Solve a Linear Programming Problem	
Chapter Review	826
Chapter Test	830
Cumulative Review	831
Chapter Projects	831
12 Sequences; Induction; the Binomial Theorem	833
12.1 Sequences	834
Write the First Several Terms of a Sequence • Write the Terms of a Sequence Defined by a Recursive Formula • Use Summation Notation • Find the Sum of a Sequence	
12.2 Arithmetic Sequences	844
Determine Whether a Sequence Is Arithmetic • Find a Formula for an Arithmetic Sequence • Find the Sum of an Arithmetic Sequence	
12.3 Geometric Sequences; Geometric Series	850
Determine Whether a Sequence Is Geometric • Find a Formula for a Geometric Sequence • Find the Sum of a Geometric Sequence • Determine Whether a Geometric Series Converges or Diverges • Solve Annuity Problems	
12.4 Mathematical Induction	861
Prove Statements Using Mathematical Induction	
12.5 The Binomial Theorem	865
Evaluate $\binom{n}{j}$ • Use the Binomial Theorem	
Chapter Review	871
Chapter Test	874
Cumulative Review	874
Chapter Projects	875

13	Counting and Probability	876
	13.1 Counting	877
	Find All the Subsets of a Set • Count the Number of Elements in a Set • Solve Counting Problems Using the Multiplication Principle	
	13.2 Permutations and Combinations	882
	Solve Counting Problems Using Permutations Involving n Distinct Objects • Solve Counting Problems Using Combinations • Solve Counting Problems Using Permutations Involving n Nondistinct Objects	
	13.3 Probability	891
	Construct Probability Models • Compute Probabilities of Equally Likely Outcomes • Find Probabilities of the Union of Two Events • Use the Complement Rule to Find Probabilities	
	Chapter Review	901
	Chapter Test	903
	Cumulative Review	904
	Chapter Projects	904
14	A Preview of Calculus: The Limit, Derivative, and Integral of a Function	906
	14.1 Finding Limits Using Tables and Graphs	907
	Find a Limit Using a Table • Find a Limit Using a Graph	
	14.2 Algebra Techniques for Finding Limits	912
	Find the Limit of a Sum, a Difference, and a Product • Find the Limit of a Polynomial • Find the Limit of a Power or a Root • Find the Limit of a Quotient • Find the Limit of an Average Rate of Change	
	14.3 One-sided Limits; Continuous Functions	919
	Find the One-sided Limits of a Function • Determine Whether a Function Is Continuous	
	14.4 The Tangent Problem; The Derivative	926
	Find an Equation of the Tangent Line to the Graph of a Function • Find the Derivative of a Function • Find Instantaneous Rates of Change • Find the Instantaneous Speed of a Particle	
	14.5 The Area Problem; The Integral	933
	Approximate the Area under the Graph of a Function • Approximate Integrals Using a Graphing Utility	
	Chapter Review	939
	Chapter Test	942
	Chapter Projects	943
Appendix A	Review	945
	A.1 Algebra Essentials	945
	Work with Sets • Graph Inequalities • Find Distance on the Real Number Line • Evaluate Algebraic Expressions • Determine the Domain of a Variable • Use the Laws of Exponents • Evaluate Square Roots • Use a Calculator to Evaluate Exponents	
	A.2 Geometry Essentials	958
	Use the Pythagorean Theorem and Its Converse • Know Geometry Formulas • Understand Congruent Triangles and Similar Triangles	

A.3 Polynomials	966
Recognize Monomials • Recognize Polynomials • Know Formulas for Special Products • Divide Polynomials Using Long Division • Factor Polynomials • Complete the Square	
A.4 Synthetic Division	975
Divide Polynomials Using Synthetic Division	
A.5 Rational Expressions	979
Reduce a Rational Expression to Lowest Terms • Multiply and Divide Rational Expressions • Add and Subtract Rational Expressions • Use the Least Common Multiple Method • Simplify Complex Rational Expressions	
A.6 Solving Equations	987
Solve Equations by Factoring • Solve Equations Involving Absolute Value • Solve a Quadratic Equation by Factoring • The Square Root Method • Solve a Quadratic Equation by Completing the Square • Solve a Quadratic Equation Using the Quadratic Formula	
A.7 Complex Numbers; Quadratic Equations in the Complex Number System	997
Add, Subtract, Multiply, and Divide Complex Numbers • Solve Quadratic Equations in the Complex Number System	
A.8 Problem Solving: Interest, Mixture, Uniform Motion, Constant Rate Job Applications	1006
Translate Verbal Descriptions into Mathematical Expressions • Solve Interest Problems • Solve Mixture Problems • Solve Uniform Motion Problems • Solve Constant Rate Job Problems	
A.9 Interval Notation; Solving Inequalities	1016
Use Interval Notation • Use Properties of Inequalities • Solve Inequalities • Solve Combined Inequalities • Solve Inequalities Involving Absolute Value	
A.10 nth Roots; Rational Exponents	1026
Work with n th Roots • Simplify Radicals • Rationalize Denominators • Solve Radical Equations • Simplify Expressions with Rational Exponents	

Appendix B

Graphing Utilities	1035
B.1 The Viewing Rectangle	1035
B.2 Using a Graphing Utility to Graph Equations	1037
B.3 Using a Graphing Utility to Locate Intercepts and Check for Symmetry	1039
B.4 Using a Graphing Utility to Solve Equations	1040
B.5 Square Screens	1042
B.6 Using a Graphing Utility to Graph Inequalities	1043
B.7 Using a Graphing Utility to Solve Systems of Linear Equations	1043

*To the Memory of
My Mother and Father*

Three Distinct Series

Students have different goals, learning styles, and levels of preparation. Instructors have different teaching philosophies, styles, and techniques. Rather than write one series to fit all, the Sullivans have written three distinct series. All share the same goal—to develop a high level of mathematical understanding and an appreciation for the way mathematics can describe the world around us. The manner of reaching that goal, however, differs from series to series.

Contemporary Series, Tenth Edition

The Contemporary Series is the most traditional in approach yet modern in its treatment of precalculus mathematics. Graphing utility coverage is optional and can be included or excluded at the discretion of the instructor: *College Algebra*, *Algebra & Trigonometry*, *Trigonometry: A Unit Circle Approach*, *Precalculus*.

Enhanced with Graphing Utilities Series, Sixth Edition

This series provides a thorough integration of graphing utilities into topics, allowing students to explore mathematical concepts and encounter ideas usually studied in later courses. Using technology, the approach to solving certain problems differs from the Contemporary Series, while the emphasis on understanding concepts and building strong skills does not: *College Algebra*, *Algebra & Trigonometry*, *Precalculus*.

Concepts through Functions Series, Third Edition

This series differs from the others, utilizing a functions approach that serves as the organizing principle tying concepts together. Functions are introduced early in various formats. This approach supports the Rule of Four, which states that functions are represented symbolically, numerically, graphically, and verbally. Each chapter introduces a new type of function and then develops all concepts pertaining to that particular function. The solutions of equations and inequalities, instead of being developed as stand-alone topics, are developed in the context of the underlying functions. Graphing utility coverage is optional and can be included or excluded at the discretion of the instructor: *College Algebra*; *Precalculus, with a Unit Circle Approach to Trigonometry*; *Precalculus, with a Right Triangle Approach to Trigonometry*.

The Contemporary Series

College Algebra, Tenth Edition

This text provides a contemporary approach to college algebra, with three chapters of review material preceding the chapters on functions. Graphing calculator usage is provided, but is optional. After completing this book, a student will be adequately prepared for trigonometry, finite mathematics, and business calculus.

Algebra & Trigonometry, Tenth Edition

This text contains all the material in *College Algebra*, but also develops the trigonometric functions using a right triangle approach and showing how it relates to the unit circle approach. Graphing techniques are emphasized, including a thorough discussion of polar coordinates, parametric equations, and conics using polar coordinates. Graphing calculator usage is provided, but is optional. After completing this book, a student will be adequately prepared for finite mathematics, business calculus, and engineering calculus.

Precalculus, Tenth Edition

This text contains one review chapter before covering the traditional precalculus topic of functions and their graphs, polynomial and rational functions, and exponential and logarithmic functions. The trigonometric functions are introduced using a unit circle approach and showing how it relates to the right triangle approach. Graphing techniques are emphasized, including a thorough discussion of polar coordinates, parametric equations, and conics using polar coordinates. Graphing calculator usage is provided, but is optional. The final chapter provides an introduction to calculus, with a discussion of the limit, the derivative, and the integral of a function. After completing this book, a student will be adequately prepared for finite mathematics, business calculus, and engineering calculus.

Trigonometry: a Unit Circle Approach, Tenth Edition

This text, designed for stand-alone courses in trigonometry, develops the trigonometric functions using a unit circle approach and showing how it relates to the right triangle approach. Graphing techniques are emphasized, including a thorough discussion of polar coordinates, parametric equations, and conics using polar coordinates. Graphing calculator usage is provided, but is optional. After completing this book, a student will be adequately prepared for finite mathematics, business calculus, and engineering calculus.

Preface to the Instructor

As a professor of mathematics at an urban public university for 35 years, I understand the varied needs of precalculus students. Students range from being underprepared, with little mathematical background and a fear of mathematics, to being highly prepared and motivated. For some, this is their final course in mathematics. For others, it is preparation for future mathematics courses. I have written this text with both groups in mind.

A tremendous benefit of authoring a successful series is the broad-based feedback I receive from teachers and students who have used previous editions. I am sincerely grateful for their support. Virtually every change to this edition is the result of their thoughtful comments and suggestions. I hope that I have been able to take their ideas and, building upon a successful foundation of the ninth edition, make this series an even better learning and teaching tool for students and teachers.

Features in the Tenth Edition

A descriptive list of the many special features of *Precalculus* can be found on the endpapers in the front of this text.

This list places the features in their proper context, as building blocks of an overall learning system that has been carefully crafted over the years to help students get the most out of the time they put into studying. Please take the time to review this and to discuss it with your students at the beginning of your course. My experience has been that when students utilize these features, they are more successful in the course.

New to the Tenth Edition

- **Retain Your Knowledge** This new category of problems in the exercise set are based on the article “To Retain New Learning, Do the Math” published in the *Educational Review*. In this article, Kevin Washburn suggests that “the more students are required to recall new content or skills, the better their memory will be.” It is frustrating when students cannot recall skills learned earlier in the course. To alleviate this recall problem, we have created “Retain Your Knowledge” problems. These are problems considered to be “final exam material” that students can use to maintain their skills. Answers to all these problems appear in the back of the book, and all are programmed in MyMathLab.
- **Guided Lecture Notes** Ideal for online, emporium/redesign courses, inverted classrooms, or traditional lecture classrooms. These lecture notes help students take thorough, organized, and understandable notes as they watch the Author in Action videos. They ask students to complete definitions, procedures, and examples based on the content of the videos and text. In addition, experience suggests that students learn by doing and understanding the why/how of the concept or

property. Therefore, many sections will have an exploration activity to motivate student learning. These explorations introduce the topic and/or connect it to either a real-world application or a previous section. For example, when the vertical-line test is discussed in Section 2.2, after the theorem statement, the notes ask the students to explain why the vertical-line test works by using the definition of a function. This challenge helps students process the information at a higher level of understanding.

- **Illustrations** Many of the figures now have captions to help connect the illustrations to the explanations in the body of the text.
- **TI Screen Shots** In this edition we have replaced all the screen shots from the ninth edition with screen shots using TI-84Plus C. These updated screen shots help students visualize concepts clearly and help make stronger connections between equations, data, and graphs in full color.
- **Chapter Projects**, which apply the concepts of each chapter to a real-world situation, have been enhanced to give students an up-to-the-minute experience. Many projects are new and Internet-based, requiring the student to research information online in order to solve problems.
- **Exercise Sets** All the exercises in the text have been reviewed and analyzed for this edition, some have been removed, and new ones have been added. All time-sensitive problems have been updated to the most recent information available. The problem sets remain classified according to purpose.

The ‘*Are You Prepared?*’ problems have been improved to better serve their purpose as a just-in-time review of concepts that the student will need to apply in the upcoming section.

The *Concepts and Vocabulary* problems have been expanded and now include multiple-choice exercises. Together with the fill-in-the-blank and True/False problems, these exercises have been written to serve as reading quizzes.

Skill Building problems develop the student’s computational skills with a large selection of exercises that are directly related to the objectives of the section. *Mixed Practice* problems offer a comprehensive assessment of skills that relate to more than one objective. Often these require skills learned earlier in the course.

Applications and Extensions problems have been updated. Further, many new application-type exercises have been added, especially ones involving information and data drawn from sources the student will recognize, to improve relevance and timeliness.

The *Explaining Concepts: Discussion and Writing* exercises have been improved and expanded to provide more opportunity for classroom discussion and group projects.

New to this edition, *Retain Your Knowledge* exercises consist of a collection of four problems in each exercise set that are based on material learned earlier in the course. They serve to keep information that has already been learned “fresh” in the mind of the student. Answers to all these problems appear in the book.

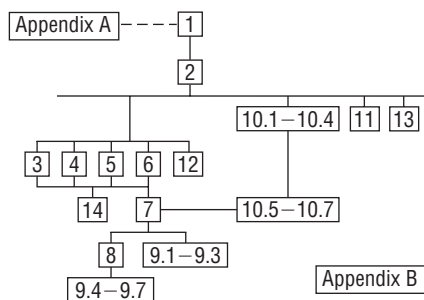

The *Review Exercises* in the Chapter Review have been streamlined, but they remain tied to the clearly expressed objectives of the chapter. Answers to all these problems appear in the book.

Content Changes in the Tenth Edition

- **Section 2.1** The objective Find the Difference Quotient of a Function has been added.
- **Section 4.1** The subsection Behavior of the Graph of a Polynomial Function Near a Zero has been removed.
- **Section 4.3** A subsection has been added that discusses the role of multiplicity of the zeros of the denominator of a rational function as it relates to the graph near a vertical asymptote.
- **Section 4.5** The objective Use Descartes’ Rule of Signs has been included.
- **Section 4.5** The theorem Bounds on the Zeros of a Polynomial Function is now based on the traditional method of using synthetic division.

Using the Tenth Edition Effectively with Your Syllabus

To meet the varied needs of diverse syllabi, this text contains more content than is likely to be covered in a *Precalculus* course. As the chart illustrates, this text has been organized with flexibility of use in mind. Within a given chapter, certain sections are optional (see the details that follow the figure below) and can be omitted without loss of continuity.

Appendix A Review

This chapter consists of review material. It may be used as the first part of the course or later as a just-in-time review when the content is required. Specific references to this chapter occur throughout the book to assist in the review process.

Chapter 1 Graphs

This chapter lays the foundation for functions.

Chapter 2 Functions and Their Graphs

Perhaps the most important chapter. Section 2.6 is optional.

Chapter 3 Linear and Quadratic Functions

Topic selection depends on your syllabus. Sections 3.2 and 3.4 may be omitted without loss of continuity.

Chapter 4 Polynomial and Rational Functions

Topic selection depends on your syllabus.

Chapter 5 Exponential and Logarithmic Functions

Sections 5.1–5.6 follow in sequence. Sections 5.7, 5.8, and 5.9 are optional.

Chapter 6 Trigonometric Functions

Section 6.6 may be omitted in a brief course.

Chapter 7 Analytic Trigonometry

Sections 7.7 may be omitted in a brief course.

Chapter 8 Applications of Trigonometric Functions

Sections 8.4 and 8.5 may be omitted in a brief course.

Chapter 9 Polar Coordinates; Vectors

Sections 9.1–9.3 and Sections 9.4–9.7 are independent and may be covered separately.

Chapter 10 Analytic Geometry

Sections 10.1–10.4 follow in sequence. Sections 10.5, 10.6, and 10.7 are independent of each other, but each requires Sections 10.1–10.4.

Chapter 11 Systems of Equations and Inequalities

Sections 11.2–11.7 may be covered in any order, but each requires Section 11.1. Section 11.8 requires Section 11.7.

Chapter 12 Sequences; Induction; The Binomial Theorem

There are three independent parts: Sections 12.1–12.3; Section 12.4; and Section 12.5.

Chapter 13 Counting and Probability

The sections follow in sequence.

Chapter 14 A Preview of Calculus: The Limit, Derivative, and Integral of a Function

If time permits, coverage of this chapter will give your students a beneficial head start in calculus.

Acknowledgments

Textbooks are written by authors, but evolve from an idea to final form through the efforts of many people. It was Don Dellen who first suggested this text and series to me. Don is remembered for his extensive contributions to publishing and mathematics.

Thanks are due to the following people for their assistance and encouragement to the preparation of this edition:

- From Pearson Education: Anne Kelly for her substantial contributions, ideas, and enthusiasm; Dawn Murrin, for her unmatched talent at getting the details right; Joseph Colella for always getting the reviews and pages to me on time; Peggy McMahon for directing the always difficult production process; Rose Kernan for handling

liaison between the compositor and author; Peggy Lucas for her genuine interest in marketing this text; Chris Hoag for her continued support and genuine interest; Paul Corey for his leadership and commitment to excellence; and the Pearson Math and Science Sales team, for their continued confidence and personal support of our texts.

- Accuracy checkers: C. Brad Davis, who read the entire manuscript and accuracy checked answers. His attention to detail is amazing; Timothy Britt, for creating the Solutions Manuals and accuracy checking answers.

Finally, I offer my grateful thanks to the dedicated users and reviewers of my texts, whose collective insights form the backbone of each textbook revision.

 George Zazi, Chicago State University
 Steve Zuro, Joliet Junior College

Michael Sullivan

Chicago State University

Pearson would like to thank and acknowledge Sunila Sharma, Miranda House, Anuj Chatterje, and Monica Sethi for contributing to the Global Edition, and Mani Sankar, East Point College of Engineering and Technology, and Jairusha Jackson, for reviewing the Global Edition.

Resources for Success

MyMathLab® Online Course (access code required)

MyMathLab delivers **proven results** in helping individual students succeed. It provides **engaging experiences** that personalize, stimulate, and measure learning for each student. And it comes from an **experienced partner** with educational expertise and an eye on the future. MyMathLab helps prepare students and gets them thinking more conceptually and visually through the following features:

Adaptive Study Plan

The Study Plan makes studying more efficient and effective for every student. Performance and activity are assessed continually in real time. The data and analytics are used to provide personalized content-reinforcing concepts that target each student's strengths and weaknesses.

Getting Ready

Students refresh prerequisite topics through assignable skill review quizzes and personalized homework integrated in MyMathLab.

Video Assessment

Video assessment is tied to key Author in Action videos to check students' conceptual understanding of important math concepts.

EXAMPLE
Solving an Exponential Equation
Solve: $2^{x-1} = 5^{2x+3}$

Algebraic Solution
 $\log 2^{x-1} = \log 5^{2x+3}$
 $(x-1)\log 2 = (2x+3)\log 5$
 $x\log 2 - \log 2 = (2\log 5)x + 3\log 5$
 $(\log 2)x - (2\log 5)x = 3\log 5 + \log 2$

Graphing Solution
 $(x-1)\log 2 = (2x+3)\log 5$

Enhanced Graphing Functionality

New functionality within the graphing utility allows graphing of 3-point quadratic functions, 4-point cubic graphs, and transformations in exercises.

Skills for Success Modules are integrated within the MyMathLab course to help students succeed in collegiate courses and prepare for future professions.

Retain Your Knowledge These new exercises support ongoing review at the course level and help students maintain essential skills.

Instructor Resources

Additional resources can be downloaded from www.pearsonglobaleditions.com/sullivan.

TestGen®

TestGen® (www.pearsoned.com/testgen) enables instructors to build, edit, print, and administer tests using a computerized bank of questions developed to cover all the objectives of the text.

PowerPoint® Lecture Slides

Fully editable slides correlated with the text.

Instructor Solutions Manual

Includes fully worked solutions to all exercises in the text.

Mini Lecture Notes

Includes additional examples and helpful teaching tips, by section.

Online Chapter Projects

Additional projects that give students an opportunity to apply what they learned in the chapter.

Student Resources

Additional resources to enhance student success:

Lecture Video

Author in Action videos are actual classroom lectures with fully worked out examples presented by Michael Sullivan. All video is assignable within MyMathLab.

Chapter Test Prep Videos

Students can watch instructors work through step-by-step solutions to all chapter test exercises from the text. These are available in MyMathLab and on YouTube.

Guided Lecture Notes

These lecture notes assist students in taking thorough, organized, and understandable notes while watching Author in Action videos. Students actively participate in learning the how/why of important concepts through explorations and activities. The Guided Lecture Notes are available as PDF's and customizable Word files in MyMathLab. They can also be packaged with the text and the MyMathLab access code.

Algebra Review

Four chapters of Intermediate Algebra review. Perfect for a slower-paced course or for individual review.

Applications Index

Acoustics

amplifying sound, 380
loudness of sound, 331
loudspeaker, 588
tuning fork, 588, 589
whispering galleries, 689–690

Aerodynamics

modeling aircraft motion, 671

Aeronautics

Challenger disaster, 368

Agriculture

farm management, 825
farm workers in U.S., 367
field enclosure, 810
grazing area for cow, 580
milk production, 374
minimizing cost, 825
removing stump, 643

Air travel

bearing of aircraft, 555
distance between two planes, 142
flight time and ticket price, 169
frequent flyer miles, 565
holding pattern, 502
parking at O'Hare International Airport, 125
revising a flight plan, 573
speed and direction of aircraft, 637, 641

Archaeology

age of ancient tools, 360–361
age of fossil, 366
age of tree, 366
date of prehistoric man's death, 380

Architecture

brick staircase, 849, 873
Burj Khalifa building, 959
Flatiron Building, 579
floor design, 847–848, 873
football stadium seating, 849
mosaic design, 849, 873
Norman window, 189, 964
parabolic arch, 189
racetrack design, 692
special window, 189, 197
stadium construction, 849
window design, 189

Area. *See also* Geometry

of Bermuda Triangle, 579
under a curve, 487
of isosceles triangle, 533
of sector of circle, 396
of segment of circle, 591

Art

fine decorative pieces, 415

Astronomy

angle of elevation of Sun, 554
distances of planets from Sun, 843
International Space Station (ISS), 732
planetary orbits
 Earth, 692
 elliptical, 692
 Jupiter, 692
 Mars, 692
 Mercury, 719
 Pluto, 692
radius of Moon, 416

Aviation

modeling aircraft motion, 671
orbital launches, 750
speed of plane, 1015

Biology

alcohol and driving, 327, 332
bacterial growth, 359–360, 373
 E-coli, 115, 155
blood types, 881–882
bone length, 197–198
cricket chirp rate and temperature, 191
healing of wounds, 317, 331
maternal age versus Down syndrome, 170
muscle force, 642
yeast biomass as function of time, 372

Business

advertising, 198
automobile production, 289, 766
blending coffee, 1013
checkout lines, 900
clothing store, 902
cookie orders, 829
cost
 of can, 244, 247
 of commodity, 290
 of manufacturing, 254, 818–819, 957, 1013
 marginal, 181, 197
 minimizing, 197, 825, 830
 of printing, 217
 of production, 114, 289, 793, 830
 of transporting goods, 126
cost equation, 66
cost function, 162
 average, 97
demand equation, 197, 280
depreciation, 282
discount pricing, 290
drive-thru rate
 at Burger King, 313

 at Citibank, 317, 331
 at McDonald's, 318
equipment depreciation, 859
ethanol production, 373
expense computation, 1014
farm workers in U.S., 367
Jiffy Lube's car arrival rate, 317, 331
managing a meat market, 825
milk production, 374
mixing candy, 1013
mixing nuts, 1013
new-car markup, 1025
orange juice production, 766
precision ball bearings, 957
presale orders, 750
product design, 826
production scheduling, 825
product promotion, 67
profit, 793–794
 maximizing, 823–824, 825–826
profit function, 93
rate of return on, 355
restaurant management, 750
revenue, 181, 194–195, 1013
 airline, 826
 of clothing store, 783
 daily, 181
 from digital music, 139
 from football seating, 860
 instantaneous rate of change of, 734, 932, 933
 maximizing, 181, 188
 monthly, 181
 theater, 751
RV rental, 198–199
salary, 290, 849
 gross, 92
 increases in, 859, 873
sales
 commission on, 197, 1024
 of movie theater ticket, 738, 742–743, 750
 net, 42
 profit from, 1015
salvage value, 380
straight-line depreciation, 158–159, 162
supply and demand, 159–160, 162
tax, 254
toy truck manufacturing, 818–819
transporting goods, 819
truck rentals, 66, 162–163
unemployment, 903
wages
 of car salesperson, 66

Calculus

absolute maximum/minimum in, 108
area under a curve, 114, 140, 487
asymptotes in, 226–227

average rate of change in, 110
 carrying a ladder around a corner, 502–503
 cylinder inscribed in a cone, 144
 cylinder inscribed in a sphere, 144
 difference quotient in, 85–86, 92, 319, 340, 523
ex in, 311–312
 filling conical tank, 145
 functions approximated by polynomial functions in, 222
 increasing/decreasing functions in, 105–106
 infinite geometric series, 854
 infinite limits, 212
 Intermediate Value Theorem, 264, 265
 limit notation in, 854
 limits at infinity, 212
 local maxima/minima in, 107
 longest ladder carried around corner, 454, 502–503
 maximizing projectile range, 502, 528, 533
 maximizing rain gutter construction, 532–533
 open box construction, 145
 partial fraction decomposition, 796
 secant line in, 111
 Simpson's rule, 189
 Snell's Law of Refraction, 503–504
 tangent line, 579
 trigonometric functions, 526–527, 534
 wire into geometric shapes, 144

Carpentry. *See also Construction*
 pitch, 68

Chemistry

alpha particles, 705
 decomposition reactions, 367
 drug concentration, 246
 pH, 330
 purity of gold, 1014
 radioactive decay, 366, 373–374, 380, 826
 radioactivity from Chernobyl, 367
 reactions, 189
 salt solutions, 1014
 sugar molecules, 1014
 volume of gas, 1024

Combinatorics

airport codes, 883
 binary codes, 902
 birthday permutations, 885, 889, 890, 896–897, 901, 902–903
 blouses and skirts combinations, 881
 book arrangements, 889
 box stacking, 889
 code formation, 889
 combination locks, 890
 committee formation, 887, 889–890, 902
 Senate committees, 890
 flag arrangement, 888, 902
 gender composition of children in family, 894
 letter codes, 883
 license plate possibilities, 889, 902, 903

lining up people, 884, 889
 number formation, 881, 889, 890, 903
 objects selection, 890
 seating arrangements, 902
 shirts and ties combinations, 881
 telephone numbers, 902
 two-symbol codewords, 880
 word formation, 887–888, 890, 903

Communications

cell phone towers, 375
 installing cable TV, 145
 international call plan, 163
 phone charges, 162
 satellite dish, 679–680, 681
 spreading of rumors, 317, 331
 tablet service, 125
 Touch-Tone phones, 537, 589
 wireless data plan, 78, 114–115, 151–152

Computers and computing

graphics, 643, 794–795
 households owning computers, 367
 iPod storage capacity, 163
 laser printers, 1014
 three-click rule, 794
 website design, 794
 website map, 794
 Word users, 367

Construction

of box, 810, 1015
 closed, 149
 open, 145
 of brick staircase, 873
 of can, 278
 of coffee can, 1015
 of cylindrical tube, 810
 of enclosures
 around garden, 1014
 around pond, 1014
 maximizing area of, 184, 188, 197
 of fencing, 184, 188, 197, 810
 minimum cost for, 246
 of flashlight, 681
 of headlight, 681
 of highway, 555, 566, 592
 installing cable TV, 145
 pitch of roof, 556
 of rain gutter, 189, 408, 532–533, 546–547
 of ramp, 565
 access ramp, 67
 of rectangular field enclosure, 188
 of stadium, 189, 849
 of steel drum, 247
 of swimming pool, 964, 965
 of swing set, 574
 of tent, 578
 TV dish, 681
 vent pipe installation, 692

Cryptography

matrices in, 794

Decorating

Christmas tree, 960

Demographics

birth rate
 age of mother and, 191
 of unmarried women, 181
 diversity index, 330
 divorced population, 186–187
 life expectancy, 1024
 marital status, 882
 mosquito colony growth, 366
 population. *See Population*
 rabbit colony growth, 842

Design

of awning, 567
 of box with minimum surface area, 247
 of fine decorative pieces, 415
